D., from the Chicago Lutheran Seminary, will preach. Just when this may be is not definitely known as yet but will be announced in due time in THE CHRONICLE. Dr. Weidner will be in Portland about the 3d or 4th of July, and it is possible that he will be in The Dalles either the first or second Sunday after the regular services cease. The pastor will be in Michigan—his native state—to visit and spend his vacation with his parents.

Hicks for July.

A combination of astronomic events out of the ordinary falls on and about the opening of July. The opposition of the planet Jupiter falls on June 30th, and the opposition of Saturn falls on July 1st. The planets Venus and Mercury are also in conjunction with each other, and Mercury in aphelion and Venus in perihelion. Hicks says such a balancing and lining up of worlds is not an ordinary occurrence.

The storm period central on July 3d will bring a series of very active storms. The days of greatest storm danger are from July 1st to 6th; central storm period 13th to 18th; reactionary disturbances 21st and 22d.

More or less rain with probable cloud-

Senator Williamson for Governor.

Referring to some newspaper talk regarding the candidacy of Senator J. N. Williamson, of Prineville, for the secretaryship of state, the Salem Sentinel says:

East Oregon men may win big purses. They are entitled to them. But as related above, Mr. Williamson probably cannot have the secretaryship this time. But—there is a governor to elect! Nobody has ever denied Eastern Oregon men the right to seek that high honor, and with his ability, popularity and strength, why not place the toga upon Senator Williamson? Mr. Dunbar can be renominated for secretary of state. He has made a good officer. Geer cannot be renominated—and if nominated he can't be elected—governor. He has made a poor, weak, vacillant, mercenary milk-sop governor. He is defeated now. Let Mr. Williamson's friends—let Eastern Oregon—unite their demands before the state convention upon one man, and let that one man be Williamson for governor, and the nomination is theirs. But let the delegates come down from the range next spring demanding every office within the gift of the people and they will get what the small boy shot at.

Experiment With Brome Grass. In one of J. H. Cross' show windows is a small sheaf of Brome grass that was brought to town this morning by George Arnold of Chenoweth Creek. The grass averages fully four feet in length and its tops are heavily loaded with seed. The sheaf is a sample taken from a patch of four and a half acres that was seeded in April a year ago. The patch is on the ridge between Chenoweth and Mill Creeks, which is fairly representative of the driest soil in the neighborhood of The Dalles. This year it was cut for the first time and in that part of the patch where a reasonably good stand was obtained there was a yield of from a ton and a quarter to a ton and a half to the acre. Mr. Arnold is very much pleased so far with the result of the experiment. He is satisfied that Brome grass will stand any reasonable amount of trampling. In point of fact he is inclined to think that trampling agrees with it for it was markedly the best where wagons and teams had gone over it the most. And lastly and best of all cattle and horses eat it with marked avidity whether in hay or pasture.
