FEAR POPE IS DYING

Despite Denials, Rumors Circulated in Rome Indicate That the End is Not Far Off.

LONDON, Nov. 18.—A dispatch to the Chronicle from Rome says: In spite of persistent and apparently well-founded denials that there is any imminent danger of the Pope's decease, the air is full of speculation and apprehension indicating that his end is not considered far off. Rumors of intrigue and state-making, which it is impossible to keep from the outside world, exude from every crevice of the jealously guarded inner precincts of the Vatican.

The Pope's closest personal attendants include his faithful valet, Sestro, one chaplain and one minor prelate, who constantly and tenderly guard his material comfort. His meals are served in his private apartment at a small table at which none other, even a crowned head, may sit down. No feminine hand may tend or soothe the august invalid.

More to Compensate St. Martin Hot Springs Stevenson, Wash., Nov. 18.—There is considerable talk here of making an effort to have St. Martin's Medical Springs condemned and taken over by the government, owing to the manner in which they are now conducted. This course was followed at the famous Arkansas Hot Springs, which are still owned by the government. These springs were conducted without due regard to the accommodations of the public, and

even without common courtesy, until the citizens of Little Rock circulated a petition, which finally contained a hundred thousand names, and which so influenced congress that this body made a government property of them, leasing them out, and furnishing free baths to those of the afflicted too poor to pay for their use, paying the original owners, however, a liberal sum for the use of them.

The St. Martin's Springs are phenomenal for their curative properties, are fully the rival of those of Arkansas, and by many are considered superior. People are carried there on stretchers and are able to walk in a short time. But the public is treated so insolently by the management that many persons will not patronize the place. Persons who complain of poor service are told if they are not satisfactory they may leave. The facilities are poor and accommodations not sufficient.

Now Said To Be Compounds. Boston, Nov. 18.—Professor E. O. Pickering, director of the Harvard Observatory has made a discovery that he regards as important. In a statement just out he says:

"The spectrum of a streak of lightning was photographed last July. From such a small beginning two discoveries have developed. Not only are the chemical elements, so called, compounds, but it is likely that hydrogen itself, which chemical theorists have thought to be the one element of which the others would sooner or later prove to be compounds, seems to be of composite nature."

Other photographs made at about the same time show the curious fact that the spectrum of lightning is not always the same. Some of the photographs show a doubling of the bright lines. Professor Pickering was at first inclined to believe that this was a sort of composite photo, but he now concludes that

the doubling looks as though hydrogen, the only element studied in the lightning spectrum, and hitherto believed to be least likely to be proved a compound body, is made up of at least three components. This conclusion he bases upon the fact that there were thirty lines in the hydrogen spectrum on one photo, three in another and one in the third, the different flashes having been photographed under different circumstances.

Suit For a Receiver.

CHICAGO, Nov. 18.—Samuel Stevenson, a brother-in-law of John Alexander Dowie, the "faith healer," today entered suit to have a receiver appointed for the Section Lace Industries, one of Dowie's enterprises, for which he imported fifty lacemakers from England. Stevenson himself came from England. He alleges that Dowie has withheld from him remuneration which had been promised. He charges that Dowie offered him a bonus of \$50,000, \$100,000 of the company's stock and the superintendency of the business at a good salary. He alleges that he got nothing but the superintendency, and that Dowie beguiled him into signing an innocent document which in reality gave Dowie entire ownership of the lace company.

Attractive Women.

All women sensibly desire to be attractive. Beauty is the stamp of health because it is the outward manifestation of inner purity. A healthy woman is always attractive, bright and happy. When every drop of blood in the veins is pure a beautiful flush is on the cheek. But when the blood is impure, unclean, bad temper and a sallow complexion tells the tale of sickness all too plainly. And women today know there is no beauty without health. Wine of Cardinal cures women with beauty and attractiveness by making strong and healthy their organs which make her a woman. Try Wine of Cardinal and in a month your friends will hardly know you.

Court Wins Its Point.

SALM, Nov. 18.—Circuit Judge R. P. Elice this morning rendered a decision in the Marion county book expiring case. It was argued Saturday, and the decision of the court dismisses the writ of review.

The case resulted from the order of the county court that books of certain Marion county officials be expaired by Messrs. Clark and Buchanan, of Portland, Sheriff Darbin, Clerk Hall, Recorder Roland and Treasurer Downing legally fought the execution of the order.

In his decision Judge Elice holds that the county court has authority to employ any competent person and at any time to expair the records of county officers.
