

# THYE AND YOKEL BATTLE TO DRAW

MATCH GOES TWO HOURS WITH-  
OUT FALL ON EITHER  
SIDE.

By United Press  
PORTLAND, May 4.—Mike Yokel of Salt Lake and Ted Thye of Portland can each continue to call himself the middleweight wrestling champion of the world, and defy the other to disprove it. In fact, it looks as if the terrestrial sphere now had two middleweight champions, following a match last night between Thye and Yokel which was to have decided the conflicting claims.

The match was a herculean one, going two hours without a fall on either side. Referee Herbert Greenland pronounced it a draw. There was not a shade to choose between the two, the aggressive and defensive constantly switching. Both worked out of tight holes.

Two thousand persons witnessed the match.

## GRAIN GROWERS

(Continued From Page 1.)

and Idaho, if the national consolidation is made, will have to accept the contracts offered by the state associations, or stay out of the pool.

Fourth, all contracts secured by the respective state associations after consolidation with the national will contain clauses providing for the membership of each grower with the national as well as the state organization.

Fifth, a zone agency of the national, with officers, employees and banking facilities, will be established in Spokane, to be ready by July 1, 1921.

Sixth, members of state associations will not be required to pay membership fees in the national, but members secured after the consolidation is effected will have to pay a \$10 fee to the state association, and a portion of this will go to the national.

Seventh, state associations will be required to canvass their members for subscriptions to stock in the finance and export corporations.

Eighth, state associations will enjoy privileges and usage of the finance and export corporations.

Ninth, all farm organizations in the respective states will be advised of the resolutions and conditions of consolidation, and urged to assist in the organization work, in order that the largest possible amount of wheat may be placed under contract this season.

Tenth, that the general manager of the Spokane zone agency is to be named by the state associations in the zone, selection to be approved by the national.

Eleventh, state associations are to be given until July 1, 1921, to enter into the contract with the national.

The president and secretary of the national are empowered to execute this contract with the northwestern associations, subject to the approval of a committee consisting of J. R. Howard, president of the American Farm Bureau federation, U. L. Burdick and W. F. Schilling. This committee will make personal investigation in the northwest, and will probably be in The Dalles sometime this month.

For the selection of district delegates of the Oregon association, statewide primaries are to be held May 24.

The Willamette valley membership campaign is opening this week, a delegation of organizations having already started to work in Washington county.

The state association now has 3,317,000 bushels of wheat under contract. By counties the following are as follows: Jefferson 2,000,000;

Sherman, 820,000 bushels; Gilliam, 600,000; Wasco, 310,000; Baker, 164,000; Umatilla, 25,000; Morrow, 1,000,000; Wallowa, 90,000, and Union, 245,000.

The Senior play is coming soon. May 13 and 14, "Nothing But The Truth."

## ALLIES DEMAND

(Continued From Page 1.)

conferred, with the supreme council today.

It was reported that Germany had submitted a new offer approximating the allied demand. This was denied by the foreign office. The report was characterized as "a German invention."

Berlin, it was stated, realizes that the new allied terms are more favorable than those proposed at the first Paris conference on reparations.

It was believed by attaches that Germany started the rumor of a new offer to conceal what satisfaction she feels in the new allied proposals.

A copy of the allied ultimatum will be sent to Washington simultaneously with its dispatch to Berlin.

The supreme council's labors were reported to have been completed except for a decision on naval action in case of Germany's rejection of the ultimatum. It was stated that Washington will be consulted before war craft are sent to blockade German ports.

## By Carl D. Groat

(United Press Staff Correspondent)  
BERLIN, May 4.—Germany will yield to allied indemnity demands before submitting to further invasion, it was believed in well-informed circles today.

If the present government will not sign, a government will be found which will sign.

There were numerous declarations that Germany will reject the allied demands. Her capitalists were among those determined to refuse to pay. Hugo Stinnes, recognized as the real leader of this faction, was reported to have been approached by French agents who wished to learn his attitude on the threatened invasion of the Ruhr valley. Stinnes was said to have rebuffed the agents with the assertion:

"You will have to come and see me later. Anyway, you will find that American coal will put the Ruhr mines out of business just as they have the Saar coal.

"You may make a beggar out of me, but you will come to me later, nevertheless."

## BUFORD'S BOATS

(Continued From Page 1.)

with nitrate, when it was seen that the vessel was doomed and an SOS was flashed.

There was an explosion and the wireless went out of commission. The first call, however, had been picked up by the Buford.

A swell was running and the Tokuyo's small boats were bobbing about in danger of being swamped when the Buford hove to and picked them up.

## McARTHUR TO FIGHT

(Continued From Page 1.)

course, is a point of tremendous strategic importance.

"It would be the key to the Pacific in the event of war with Japan or with any foreign power that might seek to attack us from the west.

"The navy yard at Bremerton, Wash., should be enlarged and made equal to the best yards on the Atlantic coast. It has the best depth of water of all of our yards and many other natural advantages. Congress has already authorized large expenditures for the development of an aviation base, a destroyer and torpedo station, training school and machine barracks at San Diego, and,

much money has been spent in the development of the Mare Island yard, but owing to the shallow water between Mare Island and San Francisco Bay, there has been much agitation for a yard at Alameda for the accommodation of battleships and other large sized craft. It is quite apparent that congress must either establish this proposed yard or expend large sums of money in the improvement of the channel to Mare Island.

"The last congress authorized the location of a submarine and destroyer base and aviation station at the mouth of the Columbia river and made the initial appropriation for beginning the work. This action was taken with the understanding that the people of Astoria would furnish the necessary site free of charge to the government. This was agreed to, but there has been a tedious delay in the matter of conveying the property, although it begins to look as though formal conveyance and acceptance will be an accomplished fact within a few days. The bureau of yards and docks announces that the work will begin just as soon as the property is formally accepted by the government.

"The mouth of the Columbia river is unprotected except for a few antiquated guns at Fort Columbia and Fort Stevens. There has been an urgent need for better facilities for many years past, but congress did not recognize this need until last year, when the new naval establishment was authorized. The mouth of the Columbia is the key to the great Columbia river basin, and it is of the utmost importance that it be amply fortified and protected.

"I am not a jingoist, nor am I unnecessarily alarmed about war with Japan, but I wish to play safe, not only with the Japanese, but with any other possible enemy that might attempt to attack any portion of our coast line or seek to land an army on our shores. We are not going to lessen the prospects of war with Japan by heeding the lamentations of the little navy fellows."

## GERMAN PLANTS

(Continued From Page 1.)

paper money. If this goes on the currency will have no value. The government will be compelled to allow some new form of valuation. Currencies have been abandoned before, and I presume the time is coming when the Germans will be compelled to abandon theirs."

## JUDGE LANDIS

(Continued From Page 1.)

give up the bench. Since the attack was made upon him in congress because of the fact that he held two positions, the judge has planned to quit the court. He would not quit under fire, however, and would not leave while the impeachment proceedings were pending.

With the resignation of Judge Landis, the federal court will lose one of its most picturesque characters. His ready wit, his broad-spoken humor, his vigorous, out-spoken method of dealing with attorneys, witnesses, court attaches and those on trial before him, made him nationally known.

The judge in leaving the bench gives up a salary of \$7,500 a year. His pay as baseball high commissioner is \$42,500 a year.

Landis has been setting dates on all cases for decision ahead, not later than June 15. He has started making arrangements to obtain a few moments from his court room. They include his desk, a chair and a few trinkets.

Judge Landis said today he had not resigned yet.

## PRE-HISTORIC PERU IS BLAMED FOR SHIMMY

By United News  
NEW YORK, May 4.—Pre-historic Peru—not California's Barbary coast—invented the jazz band and the shimmy.

Charles W. Mead, assistant curator of the department of anthropology in the American Museum of Natural History, has made the discovery on pottery fragments in his care.

Pictures of ancient Peruvians shimmying to the tune of drums, prehistoric saxophones, oboes, rattles, cymbals, pipes, and trumpets prove it, and the ladies wore bells on their ankles and rattles on their wrists.

## JURY IN CASE OF YOUNG BOND THIEF DISAGREES

By United Press  
CHICAGO, May 4.—The jury in the case of William Dalton, 17-year-old employe of the Northern Trust company who walked out of the bank with \$772,000 in Liberty bonds, reported a disagreement today and was discharged.

The jury had been out since 1 p. m. Tuesday.

It was understood that the jury was evenly divided.

## DEMPSEY HAS OLD SOCK SO HE'LL WIN SAYS RUTH

By United Press  
WASHINGTON, May 4.—Babe Ruth, champion home-run hitter:

"Dempsey will beat Carpenter. He will knock him out because it's the old sock that wins in every sport and Dempsey has the sock. I've never seen this Frenchman, but they tell me he will run away in the first rounds. Well, he won't have much room to run and Dempsey's kind of fast himself. It's the old sock and Carpenter hasn't enough."

## DEADLY PILLS ADD TO GIRL'S DEATH MYSTERY

By United Press  
LOS ANGELES, May 4.—Mystery surrounding the death of Miss Marie Vance from nicotine poisoning deepened today with the announcement that chemical analysis of the white pills administered to her during her

illness contained a poison other than nicotine.

The pills, according to the city chemist, contained no alkaloid poisoning, such as found in her organs at the autopsy at Chicago.

While ostensibly "tonic" in nature, the pills were in reality deadly in effect.

## ARK ABOUT FINISHED; DUSKY BUILDER HAPPY

By United Press  
LOS ANGELES, May 4.—The day of days is here for The Rev. James Lewis and his band of dusky castle builders.

For down at Terminal island, everything is in readiness for the launching of the "ark," a queer shaped hulk of wood and cement, which will soon slide into the waters of the Pacific to embark on a voyage to the golden shores of Africa.

The Rev. Lewis, skipper, sky-pilot and modern Noah, is busy offering final words of encouragement to the group of missionaries and speaking

glowing words of the great blessings awaiting on the distant coast.

The vessel was built at a cost of \$18,000. Nautical experts say that it will not float.

He's a likable,  
lovable, gay and  
dashing crook.  
He'll win your  
heart.
