Back of this new standard of prices is a bit of history. Last September the Franklin cut its price drastically. A remarkable sales record followed. For months past Franklin business has required normal capacity production. Since December last, there has not been on hand at the factory at any one day more than three days' production of cars.

This favorable situation has affected economies which make possible the present revision, thereby creating a new opportunity for purchasers, and again emphasizing the proven advantages of Franklin performance—

20 miles to the gallon of gasoline.
12,500 miles to the set of tires
50% slower yearly depreciation
