er up the river and then made his way in an automobile to Canada, later shipping to Australia on a steamer.

He was formerly convicted when he slit open 30 sacks of mail, while blacked as a negro. He had the police baffled for a long while. Gardner's suitcase was found near the spot where the San Diego robbery was committed. It was advertised, as the police had no reason to connect him with the crime.

An ex-convict then told the police that Gardner was the man who had robbed the mails, and also told where Gardner roomed. The bandit was then captured, after an exciting pistol battle.

Reports from Napa, Cal., indicate that Mrs. Gardner will not leave California. She said: "He is my husband and I am true to him. It would have been better if he had been made to go to prison, but since he has escaped, I am for him and hope that he makes the best of it. The world should not think of Gardner as entirely bad. I have lived with him for four years and know him."

SAN FRANCISCO, June 11.—Seaplanes will be used to capture Roy Gardner, escaped train bandit, according to advices received here today. United States Marshal Hoholan was today notified that Camp Lewis military authorities had granted the use of military planes to patrol southern Washington for some trace of the daring train robber.

DESIGNER OF METZ "MONSTROSITY" DEAD

By Hudson Hawley (United News Staff Correspondent) PARIS, June 11.—Paul Tormow, architect to the ex-kaiser, died in a little suburb of Metz on Wednesday, while preparing to leave France for Wurtemberg, following months hints from the French government, it was learned here today.

Death overtook Tormow while he was elaborating his plan to restore Rheims cathedral and the French press today expresses gratification that he "had the decency to die before completing them." Tormow was styled as a German, but feared as an architect, and his porch, which was built upon the Metz cathedral, replacing the original French Gothic porch, is considered a monstrosity, typical of German art.

Tormow's porch at Metz was designed to celebrate the German conquest of Lorraine and for this, and because he ordered torn down the French porch which commemorated the stay of Louis XV, the French never forgave him.

The "monstrosity" was dedicated in 1903, at the same time as the unveiling of the famous statue of the Prophet Daniel, which had a mousethatche resembling that of the ex-kaiser. Tormow's only reward from his master was decoration of the Order of the Sepulchre.

Tornow obtained the good graces of the Empress Augusta forty years ago and helped her sketch Rhine castle. Later he toadied to her grandson Wilhelm. When French troops entered Lorraine, he continued to live near Metz, in seclusion, the French deeming it unwise to stretch technicalities and expel him at the time. There he prepared his plans for the repair of Rheims cathedral, not, however, at the request of the French.

to himself and community for the year to follow." A report that America has about reached the limit of its progress until a revival of religion is brought about was recently made by Roger W. Babson, founder of the Babson Statistical organization. Dr. Macpherson pointed out, likewise Henry K. Rowe in his book on "Society—Its Origin and Development," says the decline of the church is a sign of social desecration. This sentiment of statistician and sociologist is considered most significant by Dr. Macpherson, who declared: "Religion supplies the dynamics

that empower men and women to overcome the obstacles of life. It enables them to winnow the wheat of human values from the chaff of dollar idealism. It gives inspiration to play one's part manfully in the h drum of life, and supplies the impetus for development. "No better investment can be made in the country community than for a strong church center dominated by a man whose religion reaches down and transforms the daily life of the people. The position of the country preacher is a commanding one."
