TRout CONSERVATION

As a fishing season approaches, the time is fast coming for the familiar warnings about the safety of young trouts. We urge parents to take a firm stand on this matter, as many young trouts are known to be taken from the streams in their natural habitat. We also urge the public to support community conservation efforts, as these efforts are crucial for the preservation of our natural resources.

Just Call Me Jim" is Motto

SECRETARY OF LABOR Scores Formality, Cast Gagne
By Roger M. Turner

"Just Call Me Jim" is the motto of Mr. Turner, Secretary of Labor, who recently visited the city. He was seen walking down the street, looking very formal in his suit. This made him a perfect subject for photographing.

The federal government had already passed the resolution originally submitted by Mr. Turner, but the final wording of the resolution in committee has been changed. The new wording is expected to be adopted without much opposition.

The compromise-resolution determines the federal government's role in the conservation of trouts, and through it the government will be able to establish an effective plan for the conservation of trouts and the preservation of the environment. The resolution will establish a new office of trouts, which will be responsible for overseeing the conservation of trouts and the preservation of the environment. The resolution will also establish a new office of trouts, which will be responsible for overseeing the conservation of trouts and the preservation of the environment.

The resolution will be sent to the United States, and it is expected that it will be signed by President Truman very soon. The United States has been a strong advocate of the resolution, and it is expected that President Truman will sign it without much opposition.

WAMIC NEWS

WAMIC News (August 31, 1958)

In the immediate past, a sharp reduction in the number of trouts was noticed. This was due to the increase in the number of trouts caught for sale. The number of trouts caught for sale increased by 50% in the past year. In order to combat this problem, the state government has decided to increase the number of trouts caught for sale. The number of trouts caught for sale is expected to increase by 10% in the next year.

Looking Backward

From The Chronicle, June 31, 1958

Robert Mac has retired from the Department of Natural Resources. He has been a valuable member of the department, and his contributions will be greatly missed.

Looking Forward

From The Chronicle, July 1, 1958

A new member has been added to the staff of the Department of Natural Resources. His name is John Doe, and he will be working in the field of conservation.

Who Will Buy My Dates?

You have heard of the Ori-

ental Bazaar. Perhaps you

have seen it. Everybody in

the city or village has any-

thing to sell takes his wares

to the bazaar and cries for

buyers. The gardener with

his vegetables, the herder

with his goats, the old woman

with a basket of fowls, the rug

dealer, the fruit grower with
dates and figs. There is much

picturesqueness along

the crowded, contused, dirt

and endless wastage of time.

In our American cities, the

advertisements in your daily

newspaper take the place of

the ancient bazaar. Whoever

has something to sell can

tell the world about it, and

where to find it directly. What-

ever you want to buy, you can

read of it in advertisements, and

go straight to the place

where it may be seen. Clear

and truthful advertising makes

it safe to order by telephone

and avoid leaving your home

at all.

Make it a practice to read Chronicle advertisements. They are

the great bazaar of modern civilization. They are your source of

information by which wise buying is accomplished.
