THE EARTHQUAKES.

Particulars of the terrible earthmake of the 13th of August, in South America are at hand, by overland mail. The story shows a sad and heartrending picture. We quote:

-The earthquake commenced at half past five o'clock on the 13th of August, extending from Bolivia to the southern ports of Chili. The coast and over a hundred miles inland, with the towns and cities mentioned in the Chincha Islands felt the earthquake to have been heavier than the one dispatches of last night, were literally and wave, but not seriously as yet three years ago this month, but of ruined. All the buildings which known. were not destroyed by its ravages, were so badly injured as to require demolition for prudential reasons.

were destroyed, including the custom house, containing more than four million dollars' worth of goods, all of Callao to Valparaiso, put in port off which were lost.

Fredonia and Wateree are thus dis- snapped, and the vessel carried to sea.

They were both at anchor in the harbor of Arica, near each other. After the first shock had occurred on land, which created great consternation on both vessels, Dr. Dubois, the rand ball at the Oro Fino Hall, on surgeon of the Fredonia, and the paymaster of that vessel took a boat and went on shore to inquire for the welfare of friends and offer the services of the ship. In a few moments after leaving the vessel a great upheaving of the waters of the bay commenced and the Fredonia parting her chain, was dashed about at the mercy of the waves, and finally went to pieces on saved. Her officers and crew, twenty-seven in number, were lost, and also Mrs. Dyer, the wife of the lieutenant commanding.

The vessel had nearly two million of dollars' wort of naval stores on board, all of which were totally lost. The Wateree was more securly ancored, but dragged her anchors, and the great tidal wave swept her four hundred and fifty yards inland, about two miles north of the ruined town. She now lies between two hillocks of sand, very slightly injured, but it will be utterly impossible to extricate her. Admiral Turner is only hopeful
