

MUSIC APPLIANCE IN RHYME.

Formerly much of agricultural instruction was committed to rhyme, that it might be more easily remembered.

It is kept in a close case with care, The taste is nice, and the matter is true.

To be in debt brings out the sweat, No half-cooked meat is fit to eat.

A woman who sneezes ought not to make cheese; For her hands are in mud, Or ever take snuff.

When the wife is east and turkeys gobble, It is no time for a hobble; But when she ranges to catch the breeze— Should be troubled with the heaves.

An ox with broad horns and short glossy hair, Is good for a team, the market, or fair.

One white foal is bad, and two are too many, That horse is best that does not have any.

A farmer without hogs, Bot an army of dogs, Will have more puppies than pork.

To the swill was the best, To the husbandman's cost, Dogs good for nothing to work, The slackest farmer, strange to say, Is known for being out of hay.

It is no place to set poles, Where modes of men have dug their holes. Cows make no fool for food to eat, But they are good for smoking meat.

When chickens roost about the new, It spoils the hay for horse or cow. The well-bred daughter for a farmer, A prudent helpmate and a charmer.

It is no place to set poles, Where modes of men have dug their holes. Cows make no fool for food to eat, But they are good for smoking meat.

Park and heans make muskles strong— Something farmers seek; It is a dish to make life long, When cooked but once a week.

A lovely dress, a shabby pete, The fences down, a broken plate, Figs in the garden, weeds very high, Condition unexcusable to fry.

Lots of great dogs and yavling tom cats, Willows repaired with a dozen old hats, A supply barn—out a load of hay, Cows in the clover, horse run away.

Things sold by guess without being weighed, Hills coming in and taxes unpaid, Pipes and tobacco—wisky—neglect, Drag in their train as all might expect.

Worst of the whole, an unhappy wife, Many estates are lost in the getting, Sues men have forsaken heaving and splitting, And women their knitting and sewing.

A mackerel sky— The wind will be high, Then bring in the grain, Close by there is rain.

A smoky chimney may be cured, A scolding woman not endured, A farmer's wife, like cream or curd— Is to be seen but once a year.

Base-fac'd girls, Withholding girls, About the gate— Though discontent, At no ornament, To the estate.

If you would thrive, Be up by five, For there is health, And certain wealth, When at the mill, Or milking cow.

A farmer at home should be found, And often looking at his ground, Inspecting fields, repairing fence— For dollars come by saving pence.

Clear the soil from moles and slugs, From the trees—keep off the bugs, Then fruits and melons, rich and fair, Will recompense for all your care.

Rattabags, carrots, and beets, Improve the character of meats; They make good beef, a mackerel too, Than any other feed will do.

At the farmer's cost, Is an early frost, Exercise regular, Harvest in season.

Of all the crops a farmer raises, Or capital employs, It pays best to raise and sell, Is a crop of girls and boys.

FARMERS' CLUBS.—We seriously believe one of the best means of improving agriculture in any farming community, is the formation of a farmers' club.

And just now is an appropriate time for commencing the work. Will not you who read this, supping you to be a farmer, call the attention of ten or twenty of your neighbor farmers to this subject, have a meeting appointed at your house, or at the school house, or any suitable place, and at this meeting organize a club? Don't have much formality. A simple constitution is sufficient. This was once recommended: "We agree to meet once a week to talk over our farming affairs." It will be well, however, to have a name, elect a president and secretary, and appoint a regular time and place for the meetings. Where the club is small, it is well to meet at the residence of the members, when time allows, during the day, so as to examine the practice of each. Select some practical question, appoint some one to open the discussion, either in writing or orally, and let each member give his views on the subject. Discourage fine speeches, or essays, and encourage practical talks. Let the secretary briefly record the views of the talkers for future reference. It will give your club importance, please the members, and benefit other farmers if those reports are published, and every sensible county paper will be glad to receive brief reports of useful discussions. Such a club will awaken interest, and incite reading and reflection, and bring out much practical and valuable information. No one farmer knows so much about any branch of his business that he cannot learn something from others. The social effects of frequent meetings of neighbors will also be good. Try the experiment in your neighborhood this season, and let us hear from you for our columns.

Mr. Sprague recently rebuked certain of his followers who declined to interfere in politics, on the ground that they were not of the world. This he argued was mere metaphor. "You might as well," he said, "be a sheep of the Lord, decline to eat a mutton-chop, on the plea that it would be cannibalism."

TO KEEP IRON UTENSILS OR IMPLEMENTS FROM RUST.—Wash and rub over them a mixture of lard and turpentine. The paint pot and brush should be kept and used by every farmer. All wood-work ought to be kept constantly well painted, especially the wood-work of wagons, plows, etc.

THE SABBATH FOR THE WORKING MAN.

The Sabbath is God's special present to the working man, and one of its chief objects is to prolong his life and preserve efficient his working-tone. In the vital system it acts like a compensation-pump; it replenishes the spirit, the elasticity and vigor which the last six days have drained away, and supplies the force which is to fill the six days succeeding; and in the economy of existence, it answers the same purpose as, in the economy of income, is answered by a savings bank. The frugal man who puts aside a pound to-day, and another pound next month, and who, in a quiet way, is always putting by his stated pound from time to time, when he gets old and frail, gets not only the same pounds back again, but a good many pounds besides. And the conscientious man, who husbands one day of his existence every week, who, instead of allowing the Sabbath to be trampled and torn in the hurry and scramble of life, treasures it devoutly up—the Lord of the Sabbath keeps it back with usury. The savings bank of human existence is the weekly Sabbath.

And the conscientious man, who husbands one day of his existence every week, who, instead of allowing the Sabbath to be trampled and torn in the hurry and scramble of life, treasures it devoutly up—the Lord of the Sabbath keeps it back with usury. PREMIUM GANG PLOWS.

As the age in which we live demands progress in Farming Implements as well as in all other branches of industry, we have determined to enter extensively upon the manufacture of the celebrated

Pfeil Gang Plow!

Better known in Oregon as the WOL-GAMOT PLOW. This Plow combines all the desirable points of a perfect implement, being simple in construction, cheap, durable, and of light draft. The only Premiums which were awarded to Gang Plows at the great Implement trial at Mattoon, Sept. 4, 1866, by the State Agricultural Society of Illinois, were awarded to this Plow. The following is an extract from the Report of the Commissioner of Agriculture, for the year 1866, and may be found on page 246 of that report:—

"The Gang Plow made by J. C. Pfeil, Arroyo, Co. Cal. county Illinois, is regarded with no little favor in the west. Almost incredible stories are told of its excellence and efficiency in plowing the prairie fields of Illinois and other States."

"The depth of the furrow is regulated by the spunk axle, which is so arranged that the plough can be driven deeper or shallower at the pleasure of the driver, when the team is moving, by means of the lever."

"We also manufacture sulkey plows for small boys, or infirm persons who are unable to manage a team of three or four horses."

"The committee who tested the draft of this plow with a dynamometer state, that it ran lighterly 10 pounds than other plows when running at the same depth, and held by the plowman white on foot."

"With this Plow one man can do more work than two men can do with walking plows, and the same amount of team. Hence, it will be seen that it will more than pay for itself in one season's plowing."

"In addition to the above, John W. Lewis will also manufacture the WEB-FOOT GANG PLOW!—AND THE—Web-Foot Walking Plow!

Both patterns of his own invention, for which patents have been applied for, and which have withstood practical tests with the best results, receiving flattering testimonials wherever seen or tried."

"Now, the Farmers of Oregon are invited to give the Oregon City Manufacturing a trial. Do not purchase a Plow of
