

THE EDITOR'S SON.

The editor sits at his table, Writing as well as he's able, Paragraphs, leader and puff;

His scissors beside him are lying, While he is in agony trying, Of copy to furnish enough.

Toil, toil, toil! What a weary life is mine! Wasting the precious midnight oil In reading and column, and line, Working from morn till night, Working from night till morn, Oh! why was printing press ever made, Oh! why was the editor born?

Toil, toil, toil! And whose is the gain when won? Whose are the trophies we achieve, And for whom are the trophies won? To stand in the foremost rank Of each hard fought party fray— To share the toil and only get Abuse—and neglect for pay.

Toil, toil, toil! What a thankless task is ours To bake the bread and press the cheese, That Senator Jones devours! To sit on a three-legged stool, Whilst others have hair-frizzed seats, To prepare the hash and cook up the stew, But never to taste the meats!

Toil, toil, toil! As the constant drop on the stone, So the ceaseless, endless work, Wears away body and soul! Though the post splutter and write, Though the orator bully and brawl, If it were not for the editor's pen, What were the use of it all?

Toil, toil, toil! Christians, Mormons and Jews Is there a man on this weary earth But grows richer by reading the news? Richer, richer, richer, As they read it by sunlight and taper— And yet there isn't a soul of them all But grudges to pay for his paper.

Toil, toil, toil! There's a row in the very next street! Somebody is going to murder his wife, And I must be ROUTE-SIXED.

Yesterday at this time, Two policemen got choked in a riot; And so it goes from morning till night, And an editor never knows quiet.

Science of Agriculture. Much has been said and written about the advantages of agricultural colleges, in order that the farmer may obtain a scientific education. There is no doubt but science, united with thoroughly practical habits of observation, is of immense value to the agriculturist. We do not know but a farmer might educate himself in many branches of science, without the aid of an agricultural college. Certainly every library should have a fair collection of elementary scientific works. We are led to these remarks by reading a pamphlet just issued in Scotland, on the advantages of science to a practical farmer, and extract below what the author says about botany. We should like to see on the shelves of every farmer's book case, a copy of Gray's First Lessons in Botany, and Darlington's Agricultural Botany.

The agriculturist has to do with plants every day. Without having some slight knowledge of botany, it is difficult to distinguish a growing stem of oats from that of barley until it approaches the time when the ears are about to shoot out. I do not mean to say that the agriculturist should be so conversant with the science as to be able to give, off hand, the technical name, &c., of every plant he may meet with; but to possess some knowledge of the information the botanist has recorded, is a very useful acquirement. The botanist, after describing the structure and functions of a plant, and the order, &c., to which it belongs, proceeds to inform us as to its habits and the uses to which it, or may be, applied, as also in what latitudes, altitudes, situations, and descriptions of soil it is to be found growing naturally in the greatest perfection, and, likewise, of the effects which may be produced by culture, &c. The science also explains the method of propagating one plant by another, and thereby producing new and useful varieties, and has contributed valuable practical information regarding the plants which impregnate each other when growing in close proximity.

By paying attention to the information imparted by botany, and examining the natural products of the land, the agriculturist has means within his power of forming a more correct opinion of any soil and climate of which he has not had practical experience; than he possibly could do without having recourse to the indications to be obtained by this science. This is of great importance to an agricultural settler in a new country, where the vegetable products to be found growing on the land are probably the surest—possibly the only—indications of the quality of the soil and climate which at the time he may be able to obtain. This is a benefit of no mean order to the agricultural settler in a new country, as his success in life will depend greatly on the quality of the land and climate he may select for his future home; but it also applies, although in a less degree, to the removal of an agriculturist from one district to another in our own country.

When the stock farmer goes to a distance to inspect a pastoral range, with the view of making arrangements for becoming the occupier, he may or he may not see the stock, or know the number thereof, which he has formerly maintained; but he has the opportunity of examining the herbage (the various grasses, heaths, and other plants), and can thereby form a very correct opinion of the

quality and value of the holding. Should he there meet with plants of which he has not had any practical experience, botany is prepared to supply the want, and give all necessary information.

Most of the arable land in this country has been so long under cultivation that most part of the indigenous plants are at least temporarily banished or extirpated, and have, or should have, given place to those which the occupier desires to produce; yet, even here botanical indications are not altogether valueless to the agriculturist, when he goes to inspect a piece of land of which he has not had any former experience.

I dare say most of you may have found yourselves occasionally taking advantage of botany when inspecting a grass park, and, from the plants you might find growing therein, making some such remarks on the soil, as "It is wet or dry, deep or shallow, stiff or light," &c. Or, if the land was under the plough at the time of inspection, you may have found yourselves examining the hedges, if any, and probably poking about the sides of the fences, to ascertain what natural plants might be growing on the undisturbed strip of land.

All of us are aware of the great benefits which agriculture has derived from this science, in the production of new and improved varieties of plants by hybridisation, such as in those of the turnip and clover, &c.; and the information the science has contributed in regard to the impregnation of one plant by another has been found to be of great value in the growing of turnip and other seeds.

From these, and from many other circumstances which could be adduced, I am under the impression that the science of botany has been of valuable service to agriculture.

PREPARED COFFEE.—The new advertisement of J. F. Jones & Co., corner of Second and Main streets, Portland, in our paper to-day, speaks of another article of home production to which we desire to ask special attention of our readers. The coffee prepared by Messrs. Jones & Co., is certainly superior to any other brand. The demand for it where it has been introduced, as well as the words of those who use it—commend it to all. Ask for this quality of coffee, and if your grocer has none on hand, combine to have him send for some on trial. We recommend Jones' Coffee.

—In climate and soil, in its general adaptability to the purposes of agriculture, no portion of the North American continent surpasses Oregon. On the Pacific coast, co-equal with California, it is the extreme limit whether the "star of empire takes its way." Yet superior to California as a land where the farmer may flourish—scarcely a year but what he will have a bountiful supply of rain to moisten, and ample sunshine to mature and garner his crops—a soil that will repay many fold for its culture.

The Sabbath School scholars of the M. E. Church, at this city, will give an exhibition on the evening of December 17th, 1868, for the benefit of the School. The exhibition will consist of exercises usual in such cases, and will commence at 7 o'clock, p. m.

—The San Diego cows are eating castor beans, in the absence of grass, and rather like them.

—Cut nails, heated red hot and dropped into cold water, will clinch as well as wrought nails.

—The last new color in Paris is called "the indescribable."

—All citizens of Oregon who desire to inform their friends in the old States of the condition and progress of this State, can have no more complete and comprehensive volume of facts to send them than by subscribing for this journal, and having us mail it weekly to their friends. We mail it as directed.

—Newspapers, by enhancing the value of property in their neighborhood, and giving the locality in which they are published a reputation abroad, benefit all particularly if they are merchants and real estate owners, thrice the amount yearly of the sum they pay for their support. Besides giving a spirit of emulation and pride in having a paper of which he is not ashamed, even though he should pick it up in New York or Washington. A good-looking, thriving, live newspaper helps to sell property, gives character to the locality, and in all respects is a desirable public convenience. If, from any cause, the matter in the paper, or editorial columns should not be quite up to your standard, do not act as if it were a bad one; do not act as if you were satisfied that there has been no more labor bestowed upon it than is paid for.

If it was a good one, it must be supported. The local press is the "power that moves the people."

Don't BELIEVE IN ADVERTISING.—The following from an exchange upon this subject expresses our sentiments, and we therefore give it to our readers in full:—"The man who doesn't believe in advertising is all the while doing what he preaches. He hangs round outside of his door, or puts dry goods in his windows—that's advertising. He has printed cards lying on his counter—that's advertising. He sends out drummers through the country, or puts his name on his wagon—that's advertising. He labels his articles or his manufactures—that's advertising. If he hangs out a sign, he puts a witness in the Post Office, or tells his sister-in-law—and that's advertising, too. He has his name put up in gilt letters over his door—that's advertising. A man can't do anything but advertise. He wears his shoon green or red; or if tailor, he wears the latest styles; if a doctor, he has the boys call him out of church in hand; if an auctioneer, he believes to attract the attention of passers-by; if a lawyer, he keeps a huge pile of boxes on his sidewalk in front of his store—and that's advertising. A man can't do a business without advertising, and the question is, whether to call to his aid the power that moves the world—the printing press, with its thousands of messengers working night and day, the steam engines adding to its repeating capacity untold power and miraculous speed; or, reject all these, to go back to the days when newspapers, telegraphs and railroads were unknown. But advertising costs money! So do all these things. If you want to have your advertisement do nothing, all the second-hand and fourth class petty shops would be responsible for it. If you want to prove to the world that yours is a first-class establishment, advertise!"

GREAT EXCITEMENT! IN OREGON CITY.

THE P. T. COMPANY'S STEAMERS, AND THOSE OF THE OPPOSITION LINES.

ARE STILL RUNNING, IN ADDITION TO WHICH WE WILL SOON HAVE THE RAILWAY CARS, ALL OF WHICH WILL CONTINUE TO BRING THE LATEST STYLES OF GOODS, AND THE BEST QUALITIES TO ACKERMAN, AT THE OLD STAND, MAIN ST., OREGON CITY.

I DESIRE TO SAY TO THE PUBLIC THAT I HAVE ONE OF THE COMPETEST STOCKS OF FALL AND WINTER GOODS EVER BROUGHT TO THE MARKET, WHICH I AM SELLING AS CHEAP AS THE CHEAPEST!

I will say, COME ONE, COME ALL, and satisfy yourselves that it is so. I have received one of the largest stocks ever brought to this market, anticipating a brisk fall trade, and I am determined that the goods shall be sold. My stock consists in part of a fine assortment of:

The highest Cash prices paid for country produce. L. DILLER, A. F. MILLER.

OREGON BAKERY!

With this Plow one man can do more work than two men can do with walking Plows, and the same amount of time. Hence, it will be seen that it will more than pay for itself in one season's plowing.

In addition to the above, John W. Lewis will also manufacture the WEB-FOOT GANG PLOW!—AND THE—Web-Foot Walking Plow!

Both patterns of his own invention, for which patents have been applied for, and which have withstood practical tests with the best results, receiving flattering testimonials wherever seen or tried.

Now, the Farmers of Oregon are invited to give the Oregon City Manufacture a trial. Do not purchase a Plow of any description until you have examined our make and prices, as we are determined to sell at less than importer's rates, by giving you a more durable article, and a guarantee warranting the same.

For further information address LEWIS & WOLGAMOT, OREGON CITY.

C. H. MYERS, PLUMBING, GAS & STEAM Fitting Establishment, No. 110 First Street, Portland.

We have secured the services of Mr. John Nation, as Director of the Works, whose experience on this coast for fifteen years gives him a thorough knowledge of the various kinds of machinery required for mining and mill purposes. We are prepared to execute orders for all classes of machinery and boiler works, such as—

MINING AND STEAMBOAT MACHINERY! FLOURING MILLS! SAW MILLS! PLANING MILLS! MINING PUMPS! &c., &c., &c.

Manufacture and Repair Machinery of all kinds. IRON SHUTTLE WORK at San Francisco cost as freight. Wheel and Axle Grinding and Anvil Making. Dunder's and Stevens' Self Adjusting Patent Piston Packing, other special tools or new steam engines. Quartz Steamers, Steam Dies, if the best hard iron.

As the age in which we live demands progress in Farming Implements as well as in all other branches of industry, we have determined to enter extensively into the manufacture of the celebrated Pfeil Gang Plow!

Better known in Oregon as the WOLGAMOT PLOW. This Plow combines all the desirable points of a perfect implement, being simple in construction, cheap, durable, and of light draft. The only Premiums which were awarded to Gang Plows at the great Implement trial at Moulton, Sept. 4, 1866, by the State Agricultural Society of Illinois, were awarded to this Plow. The following is an extract from the Report of the Commissioner of Agriculture, for the year 1866, and may be found on page 246 of that report:

"The Gang Plow made by J. C. Pfeil, Arzenville, Cass county Illinois, is received with no little favor in the West. Almost incredible stories are told of its excellence and efficiency in plowing the prairie fields of Illinois and other States."

"The depth of the furrow is regulated by the committee, which is so arranged that the ploughs can be driven deeper or shallower at the pleasure of the driver, when the team is moving by means of the lever."

"We also manufacture sulkey plows for small boys, or infirm persons who are unable to manage a team of three or four horses. This gang or sulkey plow, will cut a furrow from 2 to 14 inches deep."

"The committee who tested the draft of this plow with a dynamometer state, that it ran lighter by 14 pounds than other plows when running at the same depth, and held by the plowman while on foot."

"With this Plow one man can do more work than two men can do with walking Plows, and the same amount of time. Hence, it will be seen that it will more than pay for itself in one season's plowing."

In addition to the above, John W. Lewis will also manufacture the WEB-FOOT GANG PLOW!—AND THE—Web-Foot Walking Plow!

Both patterns of his own invention, for which patents have been applied for, and which have withstood practical tests with the best results, receiving flattering testimonials wherever seen or tried.

Now, the Farmers of Oregon are invited to give the Oregon City Manufacture a trial. Do not purchase a Plow of any description until you have examined our make and prices, as we are determined to sell at less than importer's rates, by giving you a more durable article, and a guarantee warranting the same.

FOR SALE BY Smith & Davis, Wholesale Druggists, Portland, Oregon. Bell & Peck, Oregon City.

CHANGE OF NAME! MERCADO & COMPANY, Successors to MERCADO & SEULLY. Have been obliged, for the benefit of the public, to change the name of their celebrated California Wine Bitters to

California Wine Bitters. We subjoin the following affidavit in injunction suit formerly pending between Mercado & Seully plaintiffs, and G. A. Simon, defendant.—T. Sainsevain, de jure sworn agent of the said G. A. Simon, de jure agent of the said California Wine Bitters, was manufactured by Mercado & Seully, about month of March 1861, without the said Simon's consent, having any concern in the manufacture of the same. That defendant has always known and considered said Mercado & Seully to be the Proprietors of the said California Wine Bitters.

Notwithstanding the above affidavit the said Simon, defendant, has continued to manufacture and sell the same under the name of Mercado & Seully, representing it to be the same as our original California Wine Bitters, and to the injury of our business and the loss of our name. We therefore demand that you issue an injunction against the said Simon, defendant, to prevent him from manufacturing and selling the same under the name of Mercado & Seully, and to prevent him from using the name of Mercado & Seully in connection with the sale of the same. We demand that you award costs to us. DEPT.—506 and 208 Jackson Street, San Francisco. [20m] MERCADO & COMPANY.

Dr. JULIAN PERRAULT, Doctor of Medicine of the Faculty of Paris, Graduate of the University Queen's College, and Physician of the St. John Baptist Society of San Francisco.
