FRENCH VEGETABLE SOUP.

Boil a beef soup bone, straining the liquor. For six quarts of soup, take four large, or six small potatoes, one large or two small parsnips, two large or four small onions, one large or two small carrots. Peel the vegetables, and put them in the pot to boil. When tender, strain them all from the soup, and pass them through a wire sieve; beat them well together, and stir them in the soup, season with pepper, salt, French mustard mixed, and tomato catsup; the two last to be added just before dish.

—In cooking, use cast iron pans, galvanized with tin linings. A China lining will crack soon, and the food be spoiled. Copper requires a good deal of work, and often in little crevices generates verdigris. Boiling water and washing soda used with a brush, will keep clean the galvanized iron.

—To make bread crumbs, dry stale bread in the oven, break it up, roll it with a pin, and pass it through a coarse sieve.

FRENCH TWIST BREAD.—Take one quart of light dough raised with home made yeast; mix in a large tablespoon of sweet butter, a salt-spoon of salt, and one egg; add flour, and knead well. Let it rise until light, then knead very gently; roll the dough in thin strips, measuring an inch in diameter; dredge lightly with flour, and braid loosely; let stand a few moments, and bake quickly without burning.

A WRINKLE ABOUT THE AGE OF HORSES.

—A short time ago we met a gentleman from Illinois who gave us a piece of information in regard to ascertaining the age of horses, after he or she passes the ninth year, which is news to us, and will be, we are sure, to the most of our readers. It is this: After the horse is nine years of age a wrinkle comes on the eyelid at the upper corner of the lower lid, and every year thereafter he has one well defined wrinkle for each year over nine. If, for instance, a horse has three wrinkles, he is twelve; if four, he is thirteen. Add the number of wrinkles to nine, and you will always get it. So says the gentleman, and he is confident that it never fails. As a good many people have horses over nine it is easily tried. If true, the horse dentist must give up his trade.

WHAT CONSTITUTES AN ACRE.—We find the following excellent table in the Ottawa (Illinois) Statesman, which farmers will do well to paste in a scrap book for future reference: 5 yards wide by 968 yards long contains one acre; 10 yards wide by 484 yards long contains one acre; 20 yards wide by 242 yards long contains 1 acre; 40 yards wide by 121 yards long contains 1 acre; 60 yards wide by 80 yards long contains 1 acre; 70 yards wide by 69-1/7 yards long contains 1 acre; 100 yards wide by 48-4/10 yards long contains 1 acre; 110 feet long contains 1 acre; 110 feet wide by 366 feet long contains 1 acre; 120 feet wide by 363 feet long contains 1 acre; 181-1/2 feet wide by 340 feet long contains 1 acre.
