" To-day my darling little boy Is five years old," said she; And then she fixed me nicely up With collar neat and white And sent me to the village school To learn to read and write;

Twas thirty years ago or more, But I remember still Exactly how the school house looked That sat upon the hill.

And there I went from day to day And plainly I recall The places where I used to play. The house and grounds and all; I seem to see the little bell That in the belfry swung, The narrow little entries where

The scholars' things were hung. And passing in I take my seat Among the children still, So vivid seems the picture of The school-house on the hill.

I call to mind the little throng That helter-skelter ran. Enjoying every moment's time Until the school began;

And how, as soon as school was done, We bounded out with glee. As full of merriment and fun As children well could be : It warms my pulses even new, And makes them wildly thrill,

To think upon that happy place The school-house on the hill. But time upon the building wrought A gradual decay,

And workmen finally were sent, To tear it all way, And build another in its place, \* Of modern make and style;

But, O! my fancy has in view The old house all the while, And thronging memories that bring The tears against my will Are wakened by that dear old place, The school-nouse on the hill.

THE INTERNATIONAL. This is the name of the Pullman Dining Car attached to the special train, by which its inventor and a party of Eastern travelers and old Californians arrived at Sacduring a few days on exhibition to the general public. It is about 60 feet long by 10 wide, supported on eight-wheeled trucks, giving 16 wheels to each, for each car. This arrangement, and an elaborate combination of steel springs, gives such steadiness that no serious jolting unsettles a dish. The exterior of the car attracts attention chiefly by its appearance of solidity. Constructed of the best materials, it seems almost absolutely free from the

DAIN KILLER.

We beg leave to call the attention of terms. the public to this long celebrated and unrivalled Family Medicine. The Pain Killer is a purely vegetable compound, and while it is a most efficient remedy for Pain, it is a perfectly safe medicine even in the most unskillful hands for Summer Complaint, or any other form of bowel disease in children or adults, it is an almost certain cure, and has without doubt been more successful in curing the various kinds of Cholera, than any other known remedy, or even the most skill-ful physician. In India, Africa and China where this dreadful disease is ever more or less prevalent, the Pain Killer is considered by the natives, as well as European residents in those climates, a Sure Remedy.

PREMIUM GANG PLOWS. As the age in which we live demands

progress in Farming Implements as well as in all other branches of industry, we have entered extensively upon the Manufacture of the Celebrated

Pfell Gans Plow! Better known in Oregon as the WOL-GAMOT PLOW. This Plow com. bines all the desirable points of a perfect implement, being simple in construction, cheap, durable, and of light draft. The only Premiums which were awarded to Gang Plows at the great He MANUFACTURES FURNITURE Implement trial at Mattoon, Sept. 4, 1866, by the State Agricultural Society of Illinois, were awarded to this Plow. The following is an extract and he is prepared to fill all orders with from the Report of the Commissioner

to his salesroom, as containing the most may be found on page 246 of that re-"The Gang Plow made by J. C. Pfeil Arenzville, Cass county Illinois, is received with no little favor in the west. Almost incredible stories are told of its excellence and efficiency in plowing the prairie fields of Illinois and other States.

"The depth of the furrow is regulated by the crank-axle, which is so arranged that the ploughs can be driven deeper or shallower at the pleasure of the driver, when the team is moving, by means of the lever. We also manufacture sulkey plows for small boys, or infirm persons who are unable to manage a team of three or four horses. This gang or salkey plow, will cut a furrow from 2 to 10 inches deep.
"The committee who tested the draught

it ran lighter by 149 pounds, than other plows when running at the same depth, and held by the plowman while on foot." With this Plow one man can do more work than two men can do with walking Plows, and the same amount of team. Hence, it will be seen that it will more than pay for itself in one

of this plow with a dynamometer state, that

We will also manufacture the WEB-FOOT GANG PLOW! -AND THE-
