STATISTICS OF OREGON. BY A. J. DUFUR. NO. 17. LANE COUNTY.

This county extends from the Pacific ocean on the west to the Cascade Range on the east, and OFFICE-Corner of FIFTH and Main streets | covers an area of 2,240,000 acres of land, a large amount of which is well adapted to grain-growing, stock-raising and general farming purposes. Lying at the head of the great Willamette Valley, and bounded north by Benton and Linn counties east of the Cascade mountains, which separate it from

and west by Douglas and the Pacific ocean, this county has diversity of scenery, variety of climate and soil, natural advantages for manufacturing, lumbering and agricultural developments, that are ern MACHINE PRESSES, which will enable sure to soon repay the immigrant or new settler for time and capital invested within its boundaries, and render it one of the wealthiest as well as most important localities

> within this State. Three of the main branches of the upper Willamette river in the eastern part of this county, form their junction near its center, and make the upper Willamette, thereby giving water communication by

leys, capable of furnishing indus-

trious settlers with happy homes,

The McKenzie Fork, quite a large

tributary of the Willamette, rises

in the northeastern part of this

county, runs in an almost westerly

the Willamette, then takes a north-

westerly course, and enters the lat-

ter river near the center and north-

ern line of the county. This stream

and its tributaries waters some as

fine farming land as is to be found

in any State. Some small and

other quite extensive valleys along

its course are a rich, alluvial de-

posit of vegetable mold, capable of

producing, when properly culti-

vated, excellent crops of corn, to-

bacco, onions, tomatoes and

peaches, with every variety of

roots and vegetables; also wheat,

barley, oats, and all the different

kinds of small grain, together with

apples, pears, cherries, plums and

small fruits of every variety, and

tame and wild grasses of the most

luxuriant growth. This stream has

also a number of natural mill sites,

capable of being improved, so as to

Douglas county, and empties into

river.

than Lane county.

but seems to be of a thirsty nature, age will not be far from the correct and suffers if the summer drouth is amount.

of long duration. Along the banks Eugene City, situated seventy of the rivers and more extended five miles south of Salem, at the valleys, the soil is a rich alluvial head of navigation, on the west deposit of decomposed earth and side of the Willamette river, is a vegetable mold, producing grain, smart business point and the shiregrass, fruit and garden vegetables, town of the county. The life tains a population of between one the ship was felt thumping against raft, manned by the Chinese crew, would be different; but few tenthe bottom with no great violence, was then put into service. By 11 dered their services. The Captain

Lazaro would attract her attention.

At about 1:30 p. m., we were cut short in our conjectures by tidings that she was in sight. A boat was sent out to intercept her; after an exchange of signals with steamed round the point out of the Captain was going to make a speech and wanted us to be present. A box was placed in a commanding position, and after a few preliminary flourishes the objects of the meeting were gone into pro bono publico." He said that the Colorado would proceed twenty-five miles down the coast to a sheltered bay where we would embark in perfect safety. He hoped they would be found willing to do all in their power to consummate this laudable purpose; and lastly that he must be obeyed. It is likely that had any other of the officers made the appeal, the result Eugene City, near the center of country denote a sedimentary formation, with more or less of min-eral indications as you approach or less bank of the Willamette, deck. She rode ever this obstruc-tion and careered on with slightly boats continued hard at work dur-eoual to a refusal on their part THE JOURNEY TO SANTA MARIA.
