> GIANT.-JANESVILE, Wis., August 24.—Several days ago, as some laborers were digging a foundation for a barn on the grounds of Mr. Stanley, in the town of Janesville, section 6, they unearthed a human skeleton of enormous size. It was found in a sitting posture, and is in a fair state of preervation. The skull measured 321 inches in circumference, and the thigh bones 444 inches in length. Dr. Towndrow examined the remains shortly after they were exhumed, and gave as his opinion that when alive he must have been not less than 14 feet in height. The teeth are very large, one which the doctor extracted measuring 11 inches in length. The lower 10 cts limbs, from the knees to the toes, are petrified, the flesh having turned to stone, and the parts being perfect in shape. Dr-Towndrow offered Mr. Stanley \$10,000 for the remains, which offer was promptly accepted. The news of the discovery created quite a sensation in the neighborhood. Dr. Towndrow has removed the skeleton to his home in Necsho. Dodge County, \$5,000 in behalf of the, widow of S. He proposes to prepare it for exhibition.
