He is then in the "Landwehr" for nine years, and then enrolled in the "Landsturm" till he is fifty. In case of war the regular army is called first, then the reserve, then the Landwehr. What the Miners Say of Hostetter's Stomach Bitters. During the season when the Gold Harvest is generally suspended, and the reapers of the glittering crop seek the cities to enjoy themselves, there is, of course, a good deal of conviviality among this enterprising and hard-working class, but drunk and dissipated is not carried to the excess that it was some years ago. This may fairly be attributed to the growing distaste for raw spirits engendered by the use of HOSTETTER'S STOMACH BITTERS. This famous stomachic is in universal favor with the miners. They take it with them to the interior, and use it regularly, not as a luxury, but as a strength sustaining tonic, and an antidote to the unhealthy influences to which they are exposed in the localities where they labor; and on returning to the cities and towns they find in its refreshing and invigorating properties the best safe guard, not only against the diseases, but against the dissipation of crowded communities. It is one of the peculiarities of the paper ration that it is an antidote to inebriety. It is one who takes it as an appetizer and invigorant, and that they have no desire whatever for liquor of any description, and, whatever fancies may think to the contrary, HOSTETTER'S BITTERS is a powerful ally of the temperance cause. It is because unmedicated alcohol weakens the stomach and the nervous system by its reaction, that it begets a craving for itself. It excites, and when the excitement passes off, debility ensues, and more labor is needed to renew the artificial fire that has, so to speak, burnt itself out. But the effect of the great vegetable tonic and alterative is to invigorate the system permanently and healthfully.
