per the easiest part of the business. How great an error. To look over fifty exchange papers daily, from which the question is not what shall, but what shall not be selected, is no very easy task. Commercial education will be taught. paper could have edited it, we m. to 12 m., and from 1 to 3 p. m. should have less complaints. Not unfrequently it is the case that an editor looks over his exchange papers for something interesting from 61 to 9. and finds absolutely nothing. Every paper is dryer than a contribution box and yet something must be had-his paper must be Out and something must be in it, and he does the best he can. To an editor who has the least care in what he selects, the writing he has to do is the ensiest part of his ⊙labor. Every subscriber thinks the paper is printed for his own benefit, and if there is nothing that suits him it must be good for nothing. As many subscribers as an editor has so many tastes he haseto consult. One wants something smart and sound. One likes anecdotes, fun and frolie, and his next door neighbor wonders that a mao of sense will put such stuff in his paper. Something spicy comes outpand the editor is a blackguard. Next comes something argumentative and the editor is a dull fool. And so, between them all, the poor fellow gets the worst of it. They never reflect that what does not please them, will please the next man; but they insist that if the BOOTS and SHOES paper does not please them, it is o good for nothing, and stop it immediately.

Graphic.—A Mississippi paper, which keeps a reporter expressly for description, has the following picture of a candidate for office of For Fall and Winter Wear, the party whom it opposes:

His head is about as large as a coon's and recedes so rapidly from the roof of his nose that if a stream Philadelphia Boot Store, of water were poured perpendicularly upon his brow, more of it would run off the back of his head than off his face. His organs of intellection, if he ever had any, have vacated and taken up their abode in the posterior part of his brain which makes the cerebellum appear like a market basket hung JOHN H. SCHRAM. to the back of his head. His teeth seem to be all gone, and his gums SADDLES, HARNESS, close up to keep his chin out of danger. His nose looks like the auger holes in a muskmelon rind.
