The truth of the matter is this; the Radical leaders have found that un-Oless the strong current which has set in against them be checked, atter and complete defeat will overtake them in 1872. They now know that with all their transpulation of the South, that they can no longer control, and that they must again reconstruct or see the power pass from their hands for all future time. Hence this late legislation by Congress and the appointment of the "Outrage Committee." The Radicals are showing that their professions for peace were false and hypocritical, and they seek to create another disturbance in order that they may longer tetain their power.
