The Radical Administration.

Never since the organization of our 'Government has there a party existed which has been guilty of greater usurpation and outrages on the rights of the people, and which has made more rapid strides towards despotism than the present party in power. They have broken every pledge they made to the people, and with reckless disregard for their sworn obligations, violated the plainest provisions of the Constitution. They have, says an address, deprived "the States of their sacred rights of self-government in matters purely local, and disarmed them of the power to enforce their own laws for the preservation of order within their own boundaries. They have passed bills of pains and penalties, operating on millions at once, without regard to the guilt or innocence of the parties. They have trampled on all the securities of life, liberty and property. They have treated the habeas corpus law with contempt, and denied the right of trial by jury. They have sent out swarms of their hireling agents with instructions to kidnap, imprison and kill free citizens for political offences, without judicial accusation, without warrant, and without trial. They have not only trodden upon the great principles embodied in the original constitution as it came from the hands of its framers, but even the amendments, which they themselves interpolated, have been broken without remorse whenever it suited their interests. In defiance of the Thirsteenth Amendment they have doomed many persons to the worst kind of "slavery or involuntary servitude" in the public rant of "the freedom of the American prisons, without the pretence of any people." But we do not believe that they "crime whereof the party was legally convicted." In the face of the Fourteenth they have abridged the "equal rights" of that the people will triumphantly elect whole masses of white citizens. The Act of Despotism.

The San Francisco Examiner, in speaksand-fold more encroachments upon pop. complete. It says: ular liberty than those enumerated in our declaration of Independence. If therefore, the people acquiesce in it, and continue to sustain at the ballot-box the men guilty of the great outrage, the freedom of the American people will have re-

ceived its death-warrant. We maintain that the Ku-Klux bill confers more absolute despotic powers on the President than those possessed by any crowned head of Europe, excepting only the Czar of Russia, and quite as great as his. It does not alter the fact to say that Grant does not attempt to exercise them. An election for his successor is near at hand, and prudence suggests moderation. Temporary freedom is not incompatible with despotic forms of government. The under a republic despoticly and corruptly governed. This has been clearly demonstrated by the history of our country since the Radical party got the control of it. They have gone on step by step in their encroachment upon the rights of the States and the people of the States until only the name is wanting to make our once giorious Union a great consolidated, centralized despotism. There is nothing to prevent Grant from making his own will, under the Ku-Klux act, the supreme law of any State. He can declare each or all of them under martial law and suspend the civil functions of all their officers. The question is not, Will he do it? but,

Can he do it? To the shame of the American people the question must be answered in the affirmative. Should, therefore, the people indorse this infamous law by reelecting Grant, it will be the death warwill indorse it. We believe that the days of the corrupt usurpers who have thus abused power are numbered. We believe their President, and demand that this infamous exactment and its twin act of prematurely crow over the success of their the peaceable remedies known to our laws. It will be shown by the future that, taking Brigham and his Elders at their own special forte, concubinage, Woods and Fitch will discount the whole tribe, and rival the operations of the worst Mowhile for talents and schemes in the "accumulation" of the substance of the people, Brigham's tithings collectors and Church-store swindles will pale their ineffeetual fires before the laws as interpreted by interested Judges and enforced by an interested Governor. Defeated, repudi ated and played out in their respective States, our quondam celebrities of Oregon and Nevada betake themselves to Utah. where, it was believed, the already congregated and accumulating elements of social corruption, political adventure and mining rascality, swept in from the sinks of Chicago, Omaha and other railroad centers, or stranded on those ill-starred shores from the wrecks of dissolving citizens may enjoy greater liberty under | stage lines and abandoned army camps an absolutism, wisely administered, than | would constitute a congenial and encouraging community in which to plant the panner of their political fortunes, and where, like dead bodies cast into filthy pools, they would surely rise to the top when fully rotten, to emulate Clay's alle gorical mackerel to "shine and stink, and stink and shine." Bankrupt in character, wholly irresponsible in every sense of the word, and without the least recommendation of any sort in the world, unless the brass of the mountebank and the effrontery of Satan be recommendations, these men beget themselves to official position in Utah in the same way that the contemptible ass arrayed himself in the skin of the fion and the thieving wolf donned the array of the innocent and unsuspected sheep. Woods had nothing when he was made Governor of Oregon, but somehow, on a salary of \$1.500 per year he managed to build and equip a residence at a cost of \$10,000, visited the States and sloshed up and down "me country" generally. And notwithstanding the facility with which Sam May drew warrants on the Treasury, which were peddled around at six bits on that Woods took any money to Utah. And in less than three months after he has set down in the city of the Saints, he makes oath that he is worth \$100,000 in that Territory. If it were not so much like our George, we should be inclined to ask "How is that for high?" And inasmuch as we have mentioned our polite ex Secretary of State, whose kids were always the admiration of the common herd, and who drew treasury warrants in favor of livery stables ad libitum, we may venture to suggest that the protecting wgis of a most convenient city of refuge from any requisition of the Governor of Oregon to make good those little unaccounted for are of Irish birth who have within a year | self." will be forgotten in the more splendid seek neither office nor political favorspeculations of the "Utah Tunnel," 'Silver

It is well understood by gentlemen in this city, that Woods and Fitch went to Utah to mutually aid each other in the U. Senate, and it seems that in pursuance of this contract. Woods is trying to capture the influence of the Gentiles, while Fitch lays slege to the affections of the Mormons; so that when the time comes their joint stock in trade may be brought to bear on a common focus, to wit: a seat in the Senate. Fitch has recently made a speech in Salt Lake City, repeating his Congressional speech in favor of Mormonsm, amended to suit the most bigoted polygamist. He aspires to be Chief Justice of Utah, and his claims to preferment are certainly equal to those of Woods. If he should attain this position, lowing morning between 5 and 6 o'clock the carpet baggers would be masters of the situation, Brigham's destruction would be complete, and if at the end of a four-years' term of office there is anything | ; in Utah which Woods, Fitch & Co., did not claim or own, or had not mortgaged to others, it would be Echo Canyon and Great Salt Lake.

He has deserved well of his party hammedan Prince in Asiatic Turkey, and country which have recognized his talents and worth and have continued him in public life. His many warm friends in Indiana have been urging his availability as the next Democratic candidate for Governor of that State. He. however, recently authorized the Terre Haute Journal to say that he will not be a candidate for that or any other position; furthermore, that he never expects to be a candidate for any office whatever. He declares that he has but one wish of a personal nature connected with political life, which is to see Hon. Thomas A. Hendricks the standard-bearer of the party in the Presidential campaign of 1872. "With the greatest respect for all other distinquished gentlemen who have been named in that connection," says the Journal, "Mr. Voorhees thinks Indiana has the most available man, and one who by his great ability and unquestioned integrity, would bring the office of chief magistrate of the republic back to its ancient dignity, efficiency and respectability. This has been the course of that paper. We have never gone back on our record like the editor of the Oregonian. In 1868 he was one of the strongest opponents of negro suffrage in Oregon; in 1870, he opposed the San Domingo swindle, and many other Radical measures, which he has swallowed and is prepared to "swear he always liked them." It takes a Radical editor to go back on his own record, especially if he gets a Federal office for correctly. Radicals are a consistent set so doing.
