

**TAKING CHANCES**  
With aid glasses, other peoples' glasses, twenty-five cent glasses, bargain glasses or no glasses at all, is a risk that cannot be ignored. If you buy shoes and they don't fit, you lose money but you can get a new pair. But taking chances with your eyes may cost you both money and what is still harder to replace—your eyesight. **Mrs. Pugh Finds She Can Knit Socks Very Fast; Record Is Made**  
To knit or not to knit? That is not the question. It is how fast can you knit. Probably a Salem woman holds the record for fast knitting in Oregon. At least, one Salem woman is some knitter, whether she knitted for record or not. Any way, she timed herself and then discovered something. It was that she could knit a pair of socks awfully fast. For 101 the little clock had ticked away only three hours and forty-five minutes and she had knitted a pair of socks. She is Mrs. C. W. Pugh, 583 North Winter street. Recently Portland claimed a fast woman knitter. It was a Mrs. Wood and her record was one pair of socks in four hours.

dence. G. G. Evans and Sarah Evans are the appellants through whose hands the proposed road will pass. The decision of the county court was in favor of the petitioner, Lewis Anderson.

**'THAT MAN HAS BACKBONE'**  
The frequency of the above expression shows that everyone appreciates the importance of the backbone. It's the "communication trench" from the brain to the organs of the body. If it is in perfect condition the nerves carry the brain message to all the organs of the body and perfect health is the result.  
If the backbone is out of position, an adjustment is necessary. Chiropractors make these necessary adjustments by the simple "laying on of hands." They use no drugs or electricity.
