o'clock not a seat was left in the house. However, the Oregon management took care of every child who came to see the performance and aisles and balconies were crowded to their capacity. The performance of the popular actress, born, one might say, to bring joy to the child heart, was in a vehicle which even Salem groupings were not permitted to see until the kiddies had their treat. It was Miss Marguerite Clark in "The Seven Swans."

Bricks Blown Down—Just about noon yesterday, while the sidewalks were filled with pedestrians, a sudden gust of wind, over the roof of the Marion creamery, on South Commercial street, sliced off a piece of the coping of the building, which crashed upon the sidewalk thirty feet below. A temporary fence was built in front of the store and across the walk at each end of the debris to prevent injuries should other bricks fall.

WORLD SHIPPING SITUATION.

Striking figures on the present shipping situation with regard to the submarine menace have been published by the Patriotic Education Society. The following facts are outstanding:

Total ocean-going vessels now afloat number about 30,000 having a gross tonnage of about 45,000,000 tons. Losses of shipping during the war have totaled about 8,783,050 tons and the supply of ships is about 20 per cent short of normal.

The enormous war needs for munition ships added to those bottled up in neutral harbors leave a relatively small number of ships for carrying food.

Shipbuilding in France has been at a standstill since the beginning of the war; England's output is less than normal; Japan is hampered by lack of materials, and the American ship supply is only beginning.

This grim condition places stress on the importance of sending to Europe foods of concentrated nutritive value and those most urgently needed—especially meat, wheat, fats, and sugar.

TRANSPORTATION FOR ALL THE FARM PRODUCTS.

Representatives of the United States Department of Agriculture, after conference at the office of the director-general of railroads, were informed that the director-general has not promulgated a list of "non-essential" farm products which will be denied transportation facilities, and does not contemplate issuing any such order. Request was made that the department of agriculture disseminate this information as widely as possible to the farmers of the country.

The director-general believes that under the plan now being formulated it will be possible to provide adequate transportation for farm products this year. Farmers should place orders for cars when needed with local freight agents as has always been the practice.

WHAT TO DO FOR THE HORSE.

A good grooming costs no money, and is equal to two quarts of oats.

Keep your horse's feet soft, and have him shod often. More feet are ruined in the stable than on the road.

Humanely destroy the worn-out, incurably lame horse. If you sell him, the money that you receive is blood money.

Punctuality in feeding and watering the horses is very important. They will worry and lose flesh if kept waiting beyond the regular time.

If the hoof is kept supple and elastic by soaking, there will be much less trouble from foot lameness, which starts because of a dry, contracted hoof that has no elasticity.—Horse World.

TO AVOID CAN SHORTAGE.

Shortage of tin for commercial purposes threatens to make the dairy industry more and more dependent on the present supply of cans. The food administration recommends that all shippers of milk and cream locate and bring into use as soon as possible all cans along the highways and byways of traffic and keep them in good condition after washing, and by careful handling.

Managers of dairy establishments and shipping stations are asked to discontinue the practice of loaning cans. Experience has shown that loaned cans as a class are especially subject to rough treatment and are consequently short-lived.

Dairy men who ship cream can market as much butterfat as formerly in fewer cans by skimming the cream richer. Ten cans of 25 per cent cream contain, for instance, as much butterfat as 17 cans of 20 per cent cream. The richer cream leaves more milk on the farm and makes shipping charges considerably less per pound of butterfat.

ANGRY MOBS IN BRAZIL DESTROY HUNS' HOUSES

Sinking of Steamers in European Waters Causes Bitter Feeling

POLICE ARE HELPLESS

German Club Is Invaded and Several Newspapers Are Wrecked by Crowd

RIO DE JANEIRO, Brazil, Jan. 10.—(Correspondence of the Associated Press.)—A demonstration of bitter animosity against Germany, accompanied by riots, the burning of many German houses and destruction of other German property by mobs of angry Brazilians, was caused by the announcement here on November 3 of the sinking in European waters by German submarines of the Brazilian steamer Acary and Guahyba. The mobs visited their wrath on everything German.

As soon as the public learned of the torpedoing of the Brazilian vessels, thousands of people marched to the President's palace where their spokesmen expressed to the President the confidence of the Brazilian people. They then marched through the streets waving the Brazilian flag and the flags of the Entente allies, shouting "Death to the Germans and long live Brazil."

The crowd next surged into the Rua do Senado and stormed the German school although large police reinforcements were called out, they were helpless against the shouting crowd, which, after stoning the school and breaking all the windows, continued its march, stoning German bars and other buildings as they passed. As the crowd approached one bar in the Avenida Rio Branco, the principal thoroughfare of the city, some Germans who were in the bar shouted "Long Live Germany."

The result was like a powder explosion. The crowd rushed into the bar, which was set afire and everything it was burned. The people in the mob attacked everyone who dared to voice a protest against this destruction. Others save themselves only by flight and although the police were reinforced by cavalry troops they could only have stopped the destruction by shooting into the crowd and this was not done.

As the crowd left the bar after watching the flames die out, the cavalry succeeded in breaking up the mob by charging through it, but this only scattered the crowd into groups each of which found something German to destroy as it ran. Most of these groups managed to get together again in the Avenida and burned many of the large German business houses there. At various corners, government officials addressed the crowd and urged them to desist but all the pleading and speeches availed nothing.

Shortly before midnight another attempt was made to break up the crowd with a cavalry charge, but the mob stood its ground and there was a serious clash with the soldiers in which many people and one or two soldiers were reported injured.

After stoning and burning the principal German business houses, the crowd then went through the city tearing down the name plates of all the German physicians, dentists and lawyers.

Later in the night the police were

compelled to fire into the crowd at several points in the city in order to prevent the firing of buildings which might have resulted in the destruction of nearby property and several persons were wounded and had to be taken to hospital.

The German club was invaded and wrecked and were several German newspapers and the destruction did not stop until an early hour in the morning when the crowd had completely tired itself out.

The government has taken steps to keep close watch over the German residents of this city, many of whom are said to have threatened revenge for the destruction of their property.

SALEM MAN CURED OF CANCER

To the people of Salem: I suffered from cancer on the end of my nose for three years and was told it was incurable. I went to Dr. S. C. Stone for treatment.

He applied a paste for four days and then a simple ointment. In a few days the cancer fell out and the place healed over and is now sound and well.

A Chiropractic Victory

The science of Chiropractic has just received another merited endorsement. Chiropractic adjustments are now a prescribed part of the care given to heroes of the Canadian forces.

Although a comparatively young science its virtues are so apparent that national authorities are already giving it endorsement by prescribing its use.
