Your Printed Message Should Be Appropriate

It should harmonize with the business in which you are engaged. It makes no difference whether your message be a business card, a handbill, a letter, a pamphlet, or a catalog—the rule holds good in every case.

You would not expect a machinist or a coal dealer to be attired the same as a florist or a jeweler. It would not be appropriate. Neither would it be appropriate for their printed message to be similar. The coal ad may be printed in bold, black type, on coarse, heavy paper; but the high grade jewelry ad should be printed artistically with light face type, in refined colors and on finest quality paper.

What is more, the printed message should be up to the minute in style. Old, antiquated style in printing creates just as bad an impression as would the hoopskirt, the hobble skirt or the "train" if worn today.

It's our business to make your printed message appropriate. Our printing plant is supplied with the very latest type faces, ornaments and other equipment. The plant is in charge of a printer of unusual ability—a man who makes a study of what is appropriate and timely for each printing job. His services and his advice are at your disposal.
