

MORE STORAGE PROVIDED AT JUICE PLANT

Series of Three Floors Being Installed in East Portion of Building

MUCH GLASS IS NEEDED

Over Fifty Carloads of Bottles on Hand and More Are Coming

During the past week carpenters have been at work in the Lofu factory putting in a series of three floors in the east portion of the building in order to provide greater storage room for the bottled product and for empty bottles which are arriving by the carload every week.

This alteration is but one of a number that are being made preparatory to the coming in of the new crop of berries. The old Phez plant has recently been put into operation working up the stock of juice on hand. An idea of the capacity of these plants may be gained from the fact that each one of the intelligent and infallible bottling and labeling machines is capable of turning out a completely sealed bottle every second of a sixteen-hour day. In fact, one is astonished at the immense amount of the product that can be turned out with a comparatively small working force.

Big Outlay in Glass.

The greatest single item of labor in the establishments is the handling of the empty bottles. There are myriads of them in storage, running all the way from the "one drink" size up to gallons. The outlay of capital in glass is something stupendous. The company has now on hand over fifty carloads of bottles, and as many more on the way.

Each one of these plants will employ something like fifty hands in all, the monthly payroll running about \$2500. A visitor on a tour of inspection of the plants was led to remark that the greatest thing about this great industry is the amount of money paid out for labor between the berry fields and the bottled sunshine.

This term is well applied, for no beverage ever put up has a more beautiful color and sparkle than the loganberry juice. Its popularity is attested by the fact that eight or ten cars a month are going out from Salem. Eighty per cent of it is going to the territory east of the Mississippi. If it were not for the world war it would doubtless be sparkling in the hills of royalty and peasantry in every part of civilized Europe, as the result of a campaign of ingenious and broad-gauge advertising. One of the most unique bits of advertising put out by the company is in the form of small sheets of spruce veneer, printed in red ink, carrying the label of the loganberry juice. This veneer, which is the cuttings from spruce used in the building of aeroplanes, is used in the packing cases of juice, thus bringing to the attention of the world two of Oregon's products.

Pressing Plants Assist. Supplementing the vast operations of the company in this city are several pressing plants in other parts of the valley, supplying the local

works with an amount of juice to keep a plant running the year round. The industry has now become such a vital part of the industrial life of this region that it is held out as a public duty for every person not otherwise engaged to lend assistance in harvesting the coming crop. It is not only a means of adding to the per capita wealth of this region but of adding to the prestige of Salem and the Willamette valley. It is estimated that no less than 3500 employees will be needed to gather the loganberry this season, but at present only a fraction of that number have been enrolled.

ALLIES MAKING GOOD

(Continued from page 1)

says the report from general headquarters today. "Local attacks west of Baillieux and north of the Lys were repulsed."

The evening official report from headquarters says: "South and west of Soissons we have made fresh progress. There were French counter-attacks on both sides of the Ourcq river."

Fresh French units have taken their place in the battle line, according to the official communication from general headquarters today. The Germans claim that these reinforcements have not been able to hold the positions assigned to them.

FIGHTING MORE INTENSE. PARIS, June 2.—The battle in France was resumed with great intensity during the night and in the course of the day, according to the war office announcement this evening. The Germans, with fresh troops, attacked between the Oise and the Ourcq with redoubled violence.

"The Germans have been checked west of Soissons," continues the statement. "We captured Favrolles."

"In the region south of Ville-en-Tardenois, the Franco-British troops maintained all their gains north of Champant."

HOSTILE RAIDS REPULSED.

LONDON, June 3.—Field Marshal Haig's report tonight from British headquarters in France reads: "Hostile raids were repulsed during the night by French troops east of Baillieux."

"The numbers of prisoners captured by us in last night's successful operations southeast of Strazeele is 288. We also captured a German anti-tank gun, in addition to 30 machine guns and several trench mortars."

"On the remainder of the British front there is nothing of special interest to report."

AMERICANS FIGHTING. WITH THE AMERICAN ARMY IN FRANCE, June 3.—After long inactivity, an artillery duel broke out this morning northwest of Toul. It lasted several hours, both American and German batteries letting loose everything they had. The Germans used much gas and high explosives. The terrific roar of the explosions gradually diminished until noon, when quiet reigned again.

No infantry action developed. **AIRMEN BUSY.** LONDON, June 3.—The official report on aerial operations tonight says: "Yesterday our airplanes carried out a good deal of observation for the artillery and took many photographs. Eighteen tons of bombs were dropped by our airplanes and heavy machine gun fire from the air was directed upon a great variety of targets."

"Eight German machines were destroyed in air fighting and fourteen were driven down out of control. Three of our machines are missing."

"On Sunday night we bombed Le Cateau, St. Quentin and Valenciennes railway stations and riddled tight tons of bombs. All our night flying machines returned."

STOMACH MISERY. Get Rid of That Sourness, Gas and Indigestion

When your stomach is out of order or run down, your food doesn't digest. It ferments in your stomach and forms gas which causes sourness, heartburn, foul breath, pain at pit of stomach and many other miserable symptoms.

Mi-o-na stomach tablets will give joyful relief in five minutes; if taken regularly for two weeks they will turn your flabby, sour, tired out stomach into a sweet, energetic, perfect working one.

You can't be very strong and vigorous if your food only half digests. Your appetite will go and nausea, dizziness, biliousness, nervousness, sick headache and constipation will follow.

Mi-o-na stomach tablets are small and easy to swallow and are guaranteed to banish indigestion and any or all of the above symptoms or money back. For sale by Daniel J. Fry and all leading druggists.

Council of Defense Is Circulating Petitions

DALLAS, June 1.—(Special to The Statesman.)—The members of the Polk county council of defense are circulating petitions throughout the county for signatures for a measure that will be placed upon the ballot this fall that will raise a special tax levy of one mill in Oregon for a war emergency fund. Oregon is at present without such a fund and expense incurred by military organizations will have to be paid without aid from the state. The petitions are being freely signed and it is safe to say they will be successfully voted by the people at the polls in the November election.

New Lumbering Concern to Operate at Ellendale

DALLAS, June 3.—(Special to The Statesman.)—A new Polk county lumbering concern to be known as the Robb Lumber company has been organized in Dallas and in the near future will begin lumber operations at a mill erected in the vicinity of Ellendale. H. A. Robb, county surveyor of Polk county, is one of the principal backers of the new concern which expects to do a general business in the lumber line. A large amount of marketable timber lies in the Ellendale district. One of the first sawmills in the county was formerly operated by a Polk county pioneer named Halleck at Ellendale.

Salem Has Only One Girl in Yeomanette Service

Garbed in her yeomanette uniform, Miss Iva Wechter, daughter of Mr. and Mrs. William Wechter, 1433 Center street, had the honor of being the only known enlisted Salem girl, aside from nurses, during her recent visit in Salem. She was in the city from Bremerton on a forty-eight hour leave of absence. Miss Wechter came to attend the marriage of her sister, Miss Virginia Wechter, to H. K. Donnelly on Saturday. Mr. Donnelly is a drafted man, and will be called in July. The yeomanette is a former Salem high school girl. Upon her graduation, several years ago, she went to Alaska, but prior to enlisting had been passing the past year with her parents in Salem.

CAMPAIN IN STAMPS BEGUN

Committee Heads Appointed at Meeting of Executive Committee

The executive committee of the thrift stamp campaign met yesterday afternoon at the Salem Commercial club for the purpose of perfecting the organization of sub-committees for the work throughout the county. The following heads of committees were appointed: W. M. Hamilton, chairman of soliciting teams in Salem, or school district No. 24; B. F. West, chairman of committee on the campaign outside of Salem; Daniel J. Fry, chairman of committee on speakers and arrangement of the meetings to be held throughout the county on June 22; R. P. Boise, chairman of publicity committee; E. T. Barnes, chairman of committee on posters and distribution of literature. A committee consisting of W. M. Hamilton, R. P. Boise and E. T. Barnes was appointed to interview the county court and negotiate for financial assistance in carrying through the campaign. Hal D. Patton was appointed as general of the drive forces in Salem and Chanucey Bishop and T. F. Rhodes were appointed as colonels. These chairmen are authorized to select their own co-workers. Further details of the work will be given later. One fact about the campaign can be stated at this time and made very emphatic; it will require hard work on the part of everyone concerned, and heavy sacrifices on the part of every citizen in order to meet demands of this campaign.

Lord Lieutenant Calls for 50,000 Irish Volunteers

DUBLIN, June 3.—The lord lieutenant issued a proclamation tonight asking for 50,000 voluntary recruits and thereafter 200 to 2000 monthly to maintain the Irish division. The first call is to men eighteen to twenty-seven years of age, and special inducement is offered of legislation to insure that land shall be available for the men who fight for their country.

CLOSER UNIT IS ADVOCATED

Big Questions Presented by Nasmyth and Gulick at Baptist Church

Dr. George W. Nasmyth and Dr. Sidney L. Gulick, two eminent lecturers, were greeted with an overflowing audience at the First Baptist church last night, and were heard with keenest interest in their analysis of the big subjects—"The Normal Aims of the War" and "The Problems of World Reconstruction."

Both gave evidence of the closest study and the broadest observation of the conditions and problems of the hour. Their work was not directed so much toward arousing patriotic enthusiasm but in directing the thought of the nation and so-ordinating effort. They were especially emphatic as to the influence and the duty of the Christian church not only in moulding national ideals but in directing the work for world peace. They emphasized the thought that the organization of a league of nations must be largely the work of the church and that while the boys at the front are being taught to shoot straight, the people of the nation should be led to think straight as to the meaning and the outcome of the world war.

President Wilson was eulogized for the clear cut position he has taken and the principles he has announced—principles which have become world standards. Over against these ideals were placed the monstrous assumptions of the German autocracy.

Dr. Lucas Gives First of Series of Demonstrations

Stop worrying. That is evidently one of Dr. Alzamon Ira Lucas's mottoes. Judging from his own recital of his recent accomplishments, he is a species of trouble doctor, in technical terms, a psycho-analyst. He answers any questions you are puzzled over.

Following his talk on "Vocational Guidance" at the Grand theatre last night Dr. Lucas, who boasts four college degrees and descent from an equal number of races, gave a demonstration of his skill in psychical readings by answering a number of questions prepared by the audience and dropped into a box at the entrance. Picking from the audience at random he told some man his life's story, correctly stated the profession of a young woman, and to a mother how many children she had. He capped the climax of his entertainment when he not only replied to a written question but handed it back to the author, although he had no means of identifying her.

Dr. Lewis will speak tonight on "The Sub-conscious Mind: How to Awaken It." He has promised to tell how the kaiser will meet his end and just how the closing of the present conflict will come about. The lecturer predicted last night that the end of the war will not come before 1921 and that America and Japan will aid in bringing this about by advancing through Russia.

SCOUTS PLAN BIGGER WORK

Temporary Organization of Council Is Effected at Meeting Held Sunday

Sunday afternoon the group of selected representatives who have in hand the organization of the Boy Scouts council met with Scout Executive Brockway of Portland for a conference at the Presbyterian church. Mr. Brockway gave a very interesting account of the work in Portland, where about 1500 boys are connected with the organization. He said that some of the leading citizens of Portland are now acting as scout masters and are connected with the council. They have become convinced of the possibilities of the organization and are taking the keenest interest in its activities.

Recently the council in that city pushed through a campaign and raised \$20,000 in subscriptions to carry on the work during the next three years. He urged the business men of Salem to get back of the scout movement here, declaring it would mean very much to the boy life of the city. At this meeting a temporary organization of the council was effected, the officers to serve until October 1, when with the boys all back in school, there will be opportunity to enter upon lines of work with full forces. At that time they will organize on a broader basis, taking in both Marion and Polk counties and the entire list of troops. Each troop will select some business man or prominent citizen as a member of the completed executive committee. The first meeting of the committee will be held early in July.

GOES TO KLAMATH. DALLAS, June 1.—(Special to The Statesman.)—S. B. Taylor a civil engineer of this city left this week for Klamath county where he will superintend the surveying and construction of a logging railway for the Pelican Bay Lumber company. Mrs. Taylor an children will join Mr. Taylor after the close of the Dallas schools.

USE OF ARMORED TRACTOR SHOWN

Huge Piece of Artillery Equipment Taken Through Rock Creek Park

WASHINGTON, June 3.—The latest production of the army ordnance bureau, a five-ton, armored artillery tractor for hauling field guns, was demonstrated here today with Secretary Baker, General March, chief of staff, and many foreign officers present.

Hooked to a 4.7 inch field howitzer, the machine ran over the rough muddy ground of Rock creek park, which recently balked the British tank Britannia. It went through the ditches and holes without a stop, cut down trees and climbed over the fallen trunks dragging the gun behind it, climbed a 45 degree hill, where the mud was a foot deep, as a result of recent rains, and wound up the performance by rattling down a paved avenue at a 12-mile gait, without leaving a mark on the paving.

The whole load, including the gun and tractor, was approximately 20,000 pounds.

Officers who saw the demonstration are convinced that no shell-torn territory will stop the rapid movement of American field guns when they are sent to support infantry advances. Moreover, the machines are shrapnel proof and can be disabled only by a direct shell hit. Secretary Baker and General March rode in the tractor as it dragged the gun about the broken ground. Later, they puffed up and down hill beside it, obviously pleased with the machine's powers.

In the British, French and German armies only the guns above six-inch are motorized. Heretofore, it has not been found practical to put tractors on the lighter weapons, because they must leave the roads.

Youths in Salem Quick To Respond To Call

Five out of the eleven grammar school graduates to be drawn from this section under the recent call, are already enrolled as volunteers, evidently eager to profit by the two months of special training in mechanics offered by the government. The five are Raymond G. Larsen, Howard B. Churchill, J. H. Humphreys, Merrill D. Richmond and Clyde C. Hoyce, all of Salem. One or two other applicants are also hovering about the registration office.

BOXER RETAINS PLENTY OF PUNCH

French-Yankee Bout in New York—Memorial Day Sport at Gettysburg

NEW YORK, June 2.—That Georges Carpentier, the French heavyweight, has not lost his punching or boxing skill as a result of his three years service in the army was conclusively demonstrated recently at the expense of an American boxer who took ring liberties with the French pugilist. It was Sergeant Ray Williams of the American army who tried to rough it with Carpentier in the first round of a boxing exhibition at St. Aignan Loir-et-Cher. As a result Williams was knocked out in the second round and the memory of that right swing to the chin will linger in Sergeant Williams's memory for years to come.

A crowd of more than 10,000 witnessed the athletic sports at St. Aignan. General Cotter of the French army presided, with Brigadier Generals Alexander and Volruth of the American army assisting. After Anderson had won the hundred yards in 12 seconds, the 22 and 25 and Steele had broken the tape for the mile race in 5.24 minutes, a four round or rather what was to have been a four round boxing exhibition, was put on with the French champion Georges Carpentier and Sergeant Ray Williams as the contestants.

Cherished by his friends among the spectators Williams started in with a rush that nearly took the French champion off his feet, he planted some heavy blows to the head and body and Carpentier was surprised; he had expected a mere sparring exhibition. Williams had the best of the first round and was loudly applauded as he went to his corner. It was plain to all that Carpentier meant business when he stepped out for the second round. He feinted William into a knot, jabbed him lightly in the stomach with his left which caused the American to lower his guard and crossed his right to the chin and William went down and out. The round had lasted ten seconds.

After Williams came to, he shook hands with Carpentier and said, "I got mine, I am satisfied." Later he explained to a friend that he understood now why they spelled it "Gorges." "There are so many of him," he said. The annual Memorial Day exercises which usually draw thousands of spectators to Gettysburg, Pa., will be augmented this year by a great military athletic carnival which is to be held to Nixon Field, the athletic grounds of the Pennsylvania college, Gettysburg. The meet has been arranged by hardy athletics of the 329th Battalion, Tank Corps, U. S. A., now training at Camp Colt. Lieutenant Wallace C. Meyers and other officers of the Corps have prepared an extensive program of events which includes track and field contests, a

MAJOR RAOUL LUFBERY

This photograph of Major Raoul Lufbery of Willingford, Conn., reached the United States the day he was shot down by a German triplane over Toul in France. He was the most famous American aviator in the Lafayette Escadrille and the American service he had officially shot down sixteen German planes and some others which fell behind the German lines. Lufbery has trained strictly and faithfully under the direction of their instructors so that they will show up in every competition. CREW OF TEXEL LANDED. ATLANTIC CITY, N. J., June 3.—The steamer Texel was sunk by a German submarine Sunday afternoon, 40 miles off the coast. The crew of 35 men landed here tonight. Dr. Anna Howard Shaw will be the only woman on the program of the Win-the-War convention to be
