The personnel boards of Tacoma and Seattle are to meet in their respective cities tomorrow and examine a number of applicants for Y. M. C. A. work both in camp and with the expeditionary forces in France. O. E. Taylor, district secretary, is chairman of the Seattle board, and E. E. Curran of the Tacoma board.

RIVER MARNE CHECKS

(Continued from page 1) as it was begun. Allies Improve Positions.

The allies even have been able to improve their positions at some points. This was the case between Corey and Longpont today. Here the opposing lines run along the edge of the forest of Villers-Cotterets, into which the Germans are trying to obtain an entry. In the meanwhile the Germans have assaulted several times unsuccessfully. From this vicinity they have been bombarding La Ferté Milon, but have been unable to break down the barrier of allied resistance and have been subjected to very heavy losses. Their objective seems to be the envelopment of the allied troops occupying the bulge, or forcing them to fall back.

EFFORTS OF HUNS REPELLED

PARIS, June 5.—All the efforts of the Germans to advance in the French sectors have been repelled according to the war office announcement tonight. Ground has been regained by the French and prisoners taken. The text of the statement reads: "During the day the enemy at different points renewed his efforts to advance, but was everywhere repulsed, with serious losses. An attempt to cross the Oise near Montgache completely failed. "North of the Aisne our counter-attacks regained ground near Vignre. We captured more than 150 prisoners and some machine guns. "In the region of Longpont the Germans who had succeeded in making some progress around Chavigny farm were driven out, leaving in our hands about fifty prisoners. Everywhere else our positions were maintained. "Our aviators were very active in the whole fighting zone. On June 4 in the valley of the Savieres our bombing escadrille dropped more than seventeen tons of projectiles on enemy concentrations, which were completely dispersed. On the night of the fourth about fourteen tons of explosives were dropped on the railway stations at Fismes, Fere-en-Tar-

denois, Roye and Bohain. "Four enemy machines were brought down and two captive balloons burned. An enemy machine on a grand model, having four motors, was brought down on the night of June 1 in the region of Nanteuil le Haudouin. Its crew of eight men was made prisoner."

POSITIONS ARE STABLE.

LONDON, June 5.—(British Admiralty, per wireless press.)—The military correspondent of the British wireless service writes as follows concerning the operations on the western front: "The situation in the Aisne sector may almost be said to have reached that position of stability to disturb which would require the introduction of some new factor. All operations of the last 24 hours have had only local or tactical significance, and, in the balance, have been as much in favor of the allies as of the enemy. The appearance and successful operation of an American unit on the Chateau Thierry front, and the considered expression of confidence published by the allied supreme war council."

WASHINGTON, June 5.—Penetration of enemy positions in Picardy and Lorraine by American patrols inflicting losses upon the enemy in killed and wounded was reported tonight in General Pershing's communique. YANKEE MARINES WRITE GLORIOUS PAGE IN HISTORY

Beat Off Two German Attacks in Marne Battle—Enemy Wiped Out

TROOPS FORGET TO SLEEP

Another Group of Americans Put Up Fight Behind Hun Lines

WITH THE AMERICAN ARMY IN FRANCE, June 5.—American marines wrote another glorious page in their history Tuesday night and Wednesday morning in beating off two determined German attacks on the Marne battle. Last night they wiped out a large enemy patrol, this morning charged and captured enemy machine guns and this afternoon killed many of the enemy and took prisoners.

The Germans concentrated large forces before Veully wood and began a mass attack. They were mown down by the American machine guns and the attack was broken up before reaching the American line, the Germans fleeing in confusion.

The marines are fighting like Trojans and have no desire for sleep. After inflicting heavy losses on the enemy last night they almost annihilated an enemy patrol this morning. The out fought the German machine gun position this afternoon, killed seven Germans and captured a wounded German.

The story of how the Americans aided the French in stopping the German advance at Chateau Thierry is a most remarkable one. The regiment which bore the brunt of the fighting has had a glorious career dating back to revolutionary days. Although it is now composed mostly of newly enlisted men, many of whom had never been under fire, it arrived in France and marched direct to the battle line from its training camp. The regiment's fire was so deadly that they broke up an entire German formation and drove off the enemy in confusion. Their French comrades say they showed the greatest skill and accuracy while under fire.

Yankees Lie In Wait. An American patrol of 30 men penetrated the enemy third lines in the Luneville sector early this morning. The American encountered two hundred Germans and attacked them with grenades, bayonets and bullets.

The fight lasted twenty minutes and heavy losses were inflicted on the enemy. American loss was extremely light.

The Americans had crept into the German lines and were lying in wait for the enemy. Soon many shadows began to move about. The order was given and the Americans, kneeling and standing, delivered a barrage with hand grenades into the enemy ranks. The German were disorganized for a moment but recovered and opened up with rifle fire.

When they were apparently greatly outnumbered, the Americans retreated, still fighting. The Germans followed at a distance and many of them were seen to fall under the American fire. Soon afterward the American artillery deluged the German positions with shells.

Makes Daring Rescue. Two American lieutenants, both from Pittsburgh, played conspicuous parts in stemming the German advance along the Marne. Lieutenant Walter R. Flannery was the first American decorated with the French war cross for participation in the present great battle. Lieutenant John T. Bissel, a West Point graduate, commanding two machine gun units, was the first American to cross to north of the Marne during the fighting. Lieutenant Flannery volunteered to swim the Marne Monday night to rescue a wounded Frenchman who had been cut off and made prisoner by the Germans but had escaped. The Frenchman crept to the north bank of the river in the afternoon and signalled to the Americans. He was told to hide in a certain spot until night fall.

Tying a rope around himself, Lieutenant Flannery swam to the rescue while enemy bullets, hit all around him and brought the wounded man back. This afternoon French and American soldiers lined up while the lieutenant was decorated with war cross while the cannons boomed and enemy aircraft flew overhead.

Lieutenant Bissel had been cited for the French war cross. At the height of the fighting the Germans had captured Hill 204 and were sweeping the river front with their fire. Bissel and his men were in an isolated position and their retreat to the southern bank of the river had been cut off by allied guns which were sweeping a nearby bridge. After he had held up the German advance for 24 hours, Bissel signalled his comrades to cease firing. He and his men then recrossed the bridge and saved themselves and 200 Frenchmen, who also had been cut off. The bridge was then blown up.

Better System Relieves Spaulding Car Shortage

U. G. Holt of the Spaulding company states that the car shortage that has been holding up the production of the new camp on the Siletts has been relieved and the company is now putting out about 60,000 feet a day of the finest grade of fir timber, suitable for ship building and airplane construction. The company is supplied with labor for the time being, the scale of wages established by the joint action of the Loyal Legion and representatives of the government, being high enough to satisfy the laborers. The lowest price now paid in the larger camps is 40 cents an hour, this being the rate of wage for Japanese rojstabouts and white-boys. From this the schedule runs all the way up to 90 cents an hour for men who are performing hazardous or skilled operations. The great majority of men on the rolls are drawing from 50 to 80 cents an hour, and in camps where the work is unusually heavy the entire schedule is subject to a raise of 10 cents an hour. Not only is the labor status virtually in the hands of the government, but the output is so tied up with government stollations that no consignment of timber can be turned over even to a local purchaser without securing a release from the authorities in Portland.

McKelag is a former secretary of the league in North Dakota.

Wounded have been brought to American hospitals in the neighborhood of Paris, both from Cantigny and Vuilly wood.
