SAGE TEA KEEPS YOUR HAIR DARK

When Mixed with Sulphur It Brings Back Its Beautiful Lustre at Once.

Gray hair, however handsome, denotes advancing age. We all know the advantages of a youthful appearance. Your hair is your charm. It makes or mars the face. When it fades, turns gray and looks streaked, just a few applications of Sage Tea and Sulphur enhances its appearance a hundred-fold. Don't stay gray! Look young! Either prepare the recipe at home or get from any drug store a bottle of "Wyeth's Sage and Sulphur Compound," which is merely the old-time recipe improved by the addition of other ingredients. Thousands of folks recommend this ready-to-use preparation, because it darkens the hair satisfactorily, besides no one can possibly tell, as it darkens so naturally and evenly. You moisten a sponge or soft brush with it, drawing this through the hair, taking one small strand at a time. By morning the gray hair disappears; after another application or two, its natural color is restored and it becomes thick, glossy and lustrous, and you appear years younger.

Wyeth's Sage and Sulphur Compound is a delightful toilet requisite. It is not intended for the cure, mitigation or prevention of disease.

TALENT CORPS ORGANIZED.

A Talent corps has been formed in Washington, D. C., under the entertainment committee of the War Camp Community service. It is composed of 50 people who have been contributing to the entertainment of soldiers in near-by camps. The entertainment committee, Robert W. Bell, chairman and producing manager has placed vaudeville entertainments at eleven camps and cantonments near Washington during the year, some times three in the same evening in different camps. New members who have taken part in programs for the soldiers once a week for a period of two months are entitled to belong to the Talent corps and wear the special service pin.

High School Chorus One of Season's Best Offerings

Excellent training was manifest in every feature of the program rendered by the Salem high school chorus at the armory last night under the direction of Miss Minnetta Magers. It is rarely that a chorus of a hundred voices is heard in such finely blended harmony, and the audience showed the fullest appreciation by its encores. The numbers of the program were of a type to please the majority of listeners by their melodiousness and were still sufficiently exacting in technique to bring out all the qualities of the voices. The girls chorus made a very good impression by the four-part numbers. The concert must be classed as one of the brightest offerings of the season.

Hair Often Ruined By Washing With Soap

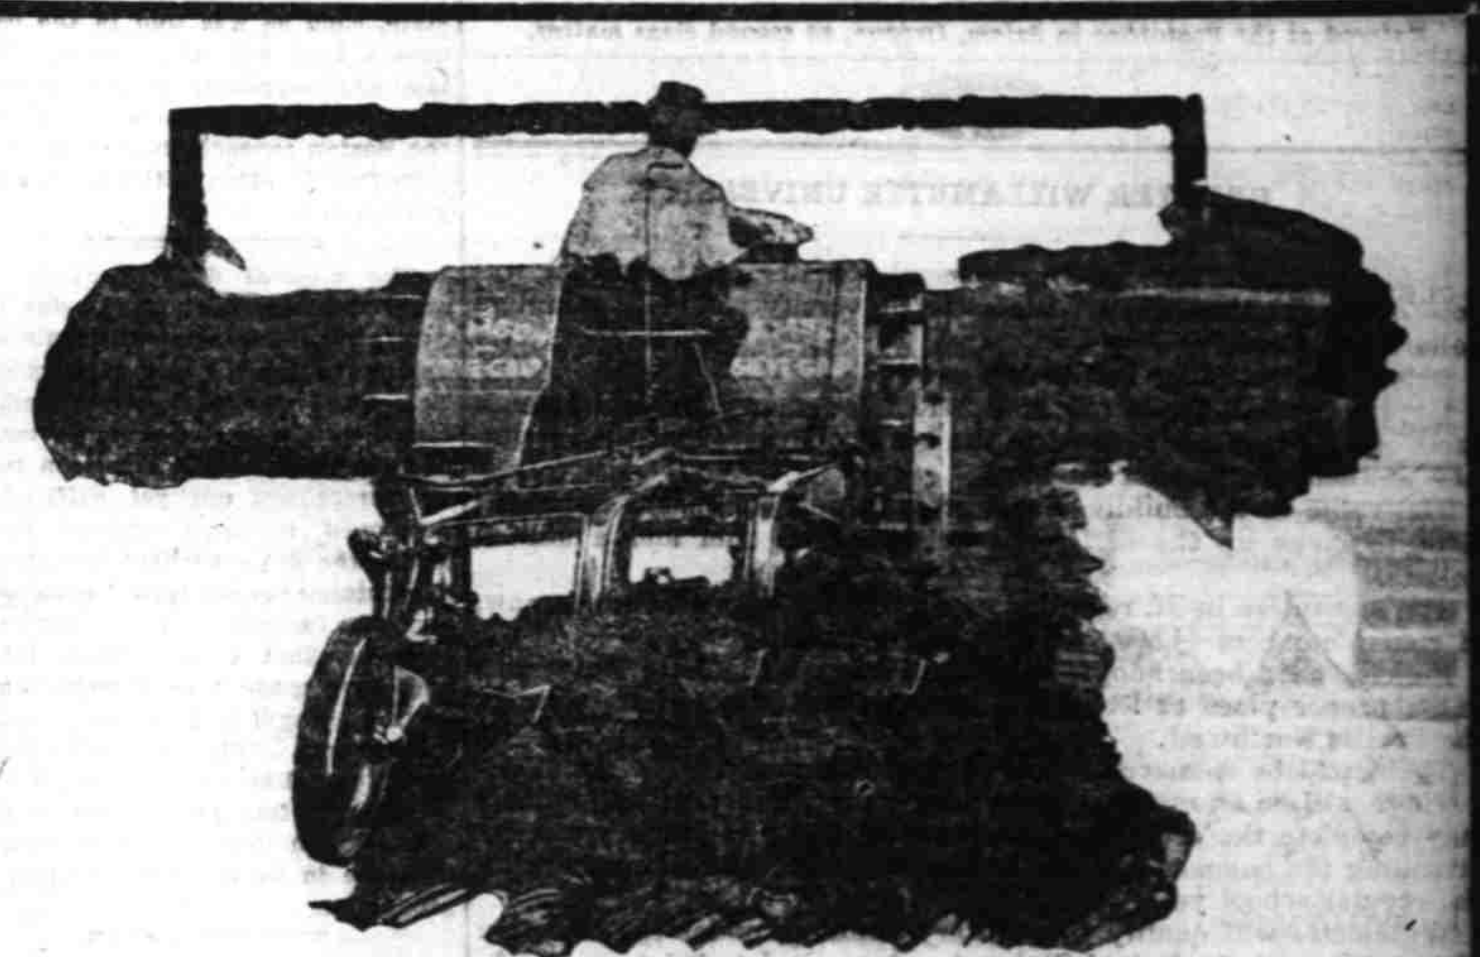

Soap should be used very carefully, if you want to keep your hair looking its best. Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and ruins it. The best thing for steady use is just ordinary mulsified coconut oil (which is pure and greaseless), and is better than the most expensive soap or anything else you can use. One or two teaspoons will cleanse the hair and scalp thoroughly. Simply moisten the hair with water and rub it in. It makes an abundance of rich, creamy leather, which rinses out easily, removing every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves the scalp soft, and the hair fine and silky, bright, lustrous, fluffy and easy to manage. You can get mulsified coconut oil

at any pharmacy, it's very cheap, and a few ounces will supply every member of the family for months.

DO MOTHERS ERR?

When we hear of so many school girls and girls in stores and offices who are often totally unfit to perform their daily duties because of some derangement peculiar to their sex, might this not have been prevented by the mother who, perhaps through neglect or carelessness, failed to get for that daughter the one great root and herb remedy for such ailments, Lydia E. Pinkham's Vegetable Compound? This old-fashioned medicine is said to have alleviated more suffering of woman kind than any other remedy known to medicine.

The Samson Tractor —mighty in service

THE good tractor with low center of gravity. This enables it to work like a horse—practically all power being delivered to the draw bar. Will not topple over on hillsides. The sieve-grip wheels are another feature. They absolutely will not slip on any soil. 25 horse power on belt pulley operated direct from the engine. 4 cylinder, 4 cycle engine of unusual smoothness and durability. Vertical tube fin-core radiator. Speeds from 1 1/2 to 3 1/2 miles per hour. Automatic governor control. Special sand wheel extension furnished. Its pulling capacity is equal to that of ten horses. With 3 plows it will plow an acre an hour.

It works best with Oliver Plows

When you see the Samson Tractor working with an Oliver you will get a new idea of intensive farming—a new vision of profits which must materialize. The Oliver Plow is backed by the world's greatest plow manufacturing organization. The combined rolling Coulters and Jointers bury all trash at the bottom of the furrow. The stop device maintains an even depth of furrow. The plow points enter and leave the ground first, allowing a full furrow clear to the ends of the field. The wooden pin breaks protect the plow against roots, boulders, etc. Trip rope raises or lowers plow bottoms from driver's seat. It is well worth your time to come in and let us figure with you and show the actual profits that this GMC-Oliver outfit will produce on your farm.
