front of them before fresh trans-Atlantic troops arrive in sufficiently strong force to turn the balance.

The heroism of the veteran troops which in these last days have inflicted such terrific losses on the flower of the German army has given the foe a rude shock. The Germans probably will try to break through somewhere else, but the allies, with their armies under the command of General Foch, are confident that they will check the Germans anywhere.

FRENCH ARE REPULSED
BERLIN, via London, June 14.—Heavy attacks by French against the Germans between Voormezele and Viertratt, southwest of Ypres, have been sanguinarily repulsed, according to the German field communication issued today. The communication reports only light fighting on the remainder of the western front.

The text of the communication follows:
Southwest of Ypres, the French launched violent attacks against our lines between Voormezele and Viertratt. They were repulsed with great slaughter and 150 prisoners remained in our hands.

"There have been successful re-connaitering engagements in the Kemmel sector.

"On the remainder of the front the fighting activity revolved only intermittently. The increased artillery activity has been kept up on the battlefield southwest of Noyon. In the neighborhood of Courcelles and Mery, as well as in the Metz region, immediately west of Oise, the enemy renewed his counter attacks but was repulsed with heavy losses.

"On both sides of the road between Soissons and Villers Cotterets we penetrated into the forest of Villers Gaterets.

"Since May 27, the army of General Von Boehm has captured more than 700 guns. This increased number of guns brought in by the army group of the German crown

prince since May 27 to 1050. Twenty-eight enemy airplanes were shot down yesterday. The losses of the enemy's air forces on the German front for the month of May amount to twenty-three captive balloons and 413 airplanes. Of the airplanes 223 fell behind our lines and the rest on the other side of the enemy's position. We have lost in air fighting 180 airplanes and 25 captive balloons.

LITTLE TO REPORT
LONDON, June 14.—The British official communication issued this afternoon says:
"In the sector north of Bailloul, French patrols brought in a few prisoners during the night."
"There is nothing further to report."

FIVE PLANES IN ATTACK
WASHINGTON, June 14.—Details of the American aircraft bombing expedition over the enemy lines June 13 were reported by General Pershing tonight in addition to yesterday's communique. Five planes carrying out the attack dropped 80 bombs and returned safely after fighting off three German pursuit machines.

HIRED HELP IS TO BE WATCHED

State Fire Marshal Urges Precaution Against L. W. W. Class.

"Be Careful Whom You Hire" is the title of a bulletin issued by State Fire Marshal Wells to the farmers of the state relative to the gathering of harvest crews for the coming glean season. Farmers are urged to ask prospective hired men whether they are American citizens and if they are Red Cross and liberty bond subscribers.

"If he is a 100 per cent American he will tell you all he knows," says the bulletin. "If he is an L. W. W. or an alien enemy he will consider it none of your business. In the latter case do not employ him or do not let your neighbor have him, but report him to the sheriff so that he can keep watch while he is in your community. You do your part in this direction and you will be assisting the home guards."

Farmers are warned not to permit men to smoke around the harvesters or in the grain fields. Many fires are attributed to the careless handling of matches by smokers.

Persons who live in small towns or at sidings where warehouses for storing grain are located are advised to procure a supply of ladders for use in the event of fires. Barrels and buckets should be kept at hand with plenty of water. Without this equipment, the bulletin warns, any number of persons will to fight fire would be reduced to helplessness should warehouse fires occur.

CARE AGAINST FIRES URGED

Harvey Wells Tells Wheat Growers How to Prevent Disasters.

Co-operative organization between farmers of any community and citizens of the nearest town is the most effective precaution to take against grain field fires, declares a bulletin to farmers that has been prepared by State Fire Marshal Wells. Farmers are urged to equip themselves with all the simple fire-fighting apparatus, such as buckets, barrels, sacks, blankets, etc., while co-operation with the nearest towns will make the equipment at the fire station available for use. The bulletin says:

"The most effective means of subduing a grain field fire is through co-operative organization between the farmers and the citizens of the nearest towns. A good scheme is to organize community fire zones which could embrace an agricultural area within a radius of ten miles in all directions from the nearest town or settlement. Once organized by a mass meeting of citizens and farmers the rest is easy."

Telephone Use Urged.

"The first thing to be done is to assemble fire fighting equipment, such as water tight barrels, buckets, old sacks, blankets, quilts or cast-off clothing, shovels and spades, at some central and convenient location, preferably at the fire station. Arrangements should be made with the telephone central station whereby, immediately a call comes in from the country, the operator notes the location of the fire and secures the name of the person giving the alarm, immediately notifying some designated person or persons in the city and imparts the necessary information. Such person, so designated to receive the alarm, causes the bell to be rung, or whistle blown, and remains on hand at the place of assembly to direct the volunteer fire fighters who respond. The barrels, buckets and other equipment are loaded into the first automobiles arriving at the point of assembly and equipment and fighters are hastened to the scene of the fire by the most direct route. Such an organization can be easily and effectively consummated and when once under way the details can be arranged to suit the conditions and topography of the country surrounding a community and avoid confusion and unpreparedness. Several tons and farming communities have already organized along these lines.

Farmers Must Prepare.

"Every farmer should have barrels, buckets, sacks, blankets, etc., always on hand and convenient for hauling to the scene of a fire on his premises at a moment's notice. Most important of all, he should have a plow always ready, with double-trees, clevis and pin attached and adjusted, that they can be thrown into the wagon and transported to the burn-

ing field without the slightest delay. As a precautioning measure against fire all farmers should plow several furrows around the edge of the grain, especially along public roads and railroad rights of way, around all settings as a fire break.

Convict Tirpitz Says He Is Not Relative of Admiral

Ernest Tirpitz, who is doing life in the state penitentiary on a determinate sentence of twenty years to life, today addressed a letter to Federal Commissioner Drake of England denying that he is a relative of Admiral Von Tirpitz of the German navy. The convict's name is Charles Tirpitz, who was arrested Hood River for failure to register June 5, claimed to be a nephew of the German naval officer. Charles Tirpitz and his father were born in Germany, according to the convict's story.
