He brought back with him some of the finest cherries ever brought in here. They were picked from one of the pioneer trees of Washington, measuring two feet through the trunk.

Bridge Repairs Appreciated—Bumping the bumps is no longer a feature of traveling over the Commercial street bridge. It has gone on for about three years to the detriment of vehicles and dispositions. The last detail of the re-planking and re-paving has been finished—as to the west side of the bridge—and the crossing is now a delight to the rubber-tired. The double deck of fir plank required something like 20,000 feet, the labor cost was about \$125. There were more than 800 pounds of spikes used in the construction, making an item of about \$42. Monday the bridge gang will commence the work of relaying the plank of the church street bridge, which has long been in need of repair as it carries a big volume of traffic. In this case a new covering will be laid over the old plank-ing. About 20,000 feet of lumber will be used on this bridge.
