AMERICANS ON

(Continued from page one)

men and material before they reach safety. Still another division of Americans is with General Gouraudthe French leader who commands east of Rheims, where the enemy assault hit against a stone wall defense.

General March's explanation of the disposition of American forces indicated that at least 196,000 American fighting troops are in the battle and probably the total force is nearer 300,000 than 200,000. Each division has a fighting strength of 27,000 men and each of the two detached negro regiments a strength of 3600. The full strength of each division with auxiliary units is 45,000 men,

Interest is Shifting General March said:

"Since I last talked with you the the Italian and Balkan fronts to our

on his sleeve the five wound stripes. He has lost one arm, and a man of less determination and force could never have survived. The French call him 'Tres Soldat'- 'every inch a soldier.' He is a man of such determination and force that in any German drive against his troops his men will be inspired by his presence to die where they are.

Ground More Difficult "Along the Marne between Chateau-Thierry and Rheims, the Germans made an advance of from four to five miles on a 23-mile front. The t/rrain at that point is very difficult, wooded hills rising to a hight of from 400 to 500 feet perhaps. The general movement has been brought to standstill. ject like an advance on Paris or an der its own commander."

cial reports said there were 1255 men aboard and if they are correct, the loss of life would not exceed 72. The names of three of those missing were announced today. Rear-Admiral Palmer, acting secetary of the navy, tonight made public detailed account of the destruction and rescue, but it added othing to previous reports from aptain H. B. Christy and other surivors as to the cause of the sink-Belief that the San Diego was a victim of a mine grew among naval officials after the commander of the American patrol boats operating off Fire Island reported his craft picked

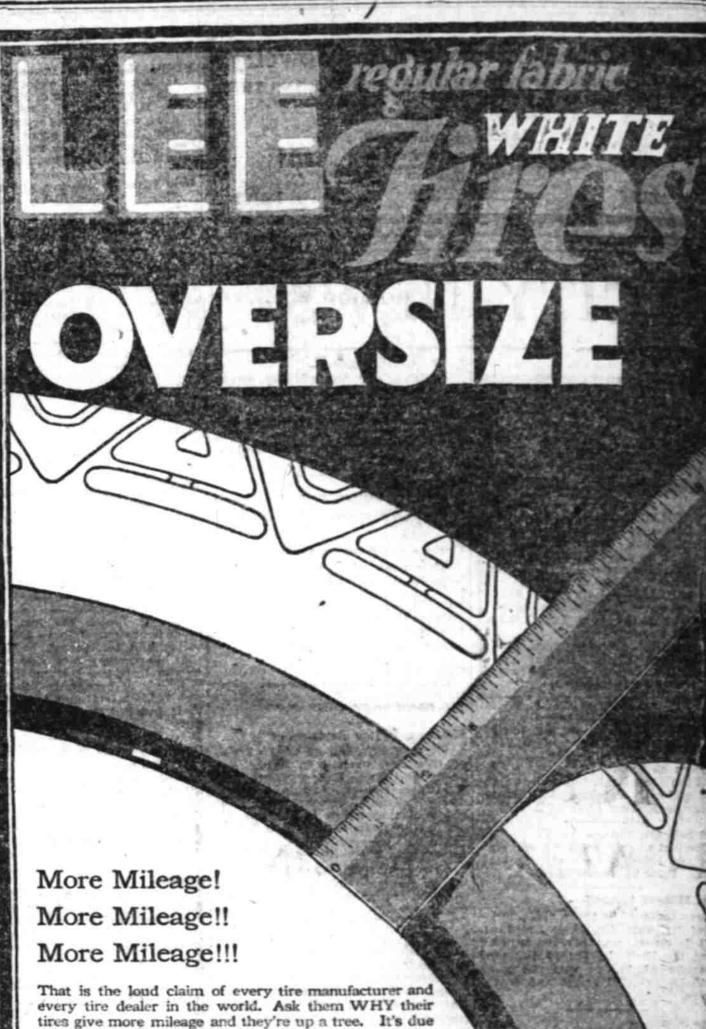

up several mines of foreign design. Theories Disagree. Among the survivors opinion seemed to be equally divided as to whether a submarine or a mine was responsible for the loss of the cruiser. Many held that an enemy torpedo struck the warship, while as many held to the theory that the vessel hit a mine. No reference to the cause of the explosion which was heard aboard the cruiser was contained in the account of the sinking made public tonight by Admiral Palmer. The statement follows: "Fuller particulars received re-

garding the sinking of the U.S.S. San Diego show the explosion took place on the port side just aft of the orward port engineroom bulkhead. The feed tank and circulating pump were blown in, and the port engine wrecked. Full speed ahead was running and the starboard engine operated until it was stopped by water ising in the engineroom.

Travels Four Feet.

"Machinist's Mate Hawthorne was at the throttle in the port engineroom, was blown four . . feet under the engineroom desk. He got up. closed the throttle on the engine, which had already stopped, all then escaped up the engineroom ladder. Lieutenant Millen, on watch in the starboard engineroom, closed the watertight door to the engineroom and gave the necessary instructions to the fire room to protect the boilers. "The ship listed to port heavily so the water entered the gun ports on the gun decks. The vessel listed eight degrees quickly then hung for seven minutes; then gradually listed the speed increasing until 35 degrees was reached. At this time the port quarter deck was three feet, under water. Then the ship rapidly turned turtle and sank.

"Captain Christy went down the bridge down two ladders to the boat deck, slid down a line to the armored belt, then dropped down four feet to the bilge keel, and thence to the dock keel, which at that time was eight feet above water. From there he jumped into the water. The ship was about five minutes in turning over after she reached 35 degrees heel. Torpedo Not Seen. "No wake of a torpedo was seen. The first thing Captain Christy noticed was, while standing on the wheel house, eight feet above the forward bridge, he felt and heard a explosion. He immediately dull

Cancer of Nose Cured

Prominent resident Certifies to cure by Dr. C. S. Stone of Salem, Salem, Oregon, June 5, 1918.

To whom it may concern: For one year or more I was troubled with a cancer on my ose. I fully realized it was constantly getting worse and after duly considering the dangers of cancer I concluded to go under the treatment of Dr. C. S. Stone of Salem, Oregon. The doctor gave me a liquid to apply as directed for several days and then a simple ointment and in a few days the cancer came out and healed up nicely and has given me no more trouble. I cheerfully treatment. My home is near Gerrecommend Dr. Stone and his vais on route 2.

Signed, J. H. Flassey.

I will be pleased to refer you to many other people whom I have recently cured of cancer.
