#### PITIFUL, IF NOT DISGUSTING

Just before General Foch began to work out his plans to smash the last German offensive, and to start the Hun armies on their line the Americans are painting litbloody way back to Berlin, the leading newspapers of Germany were the black dots all over the Teutons. publishing long articles by "critics," attempting to prove to themselves and to convince the people of their country that General Foch but shooting first that counts. is a poor general.

A sample of these articles was by General von Ardenne, in the struction record is not broken in the Berlin Lokalanzeiger, in which he began by declaring that General development of America's fighting Great Britain's silent efforts. Foch is not one of the "intellectual giants" of military history, machine. The other day at one of best proof of what had been done, nor even one of the dominating characters.

Von Ardenne invents the statement that "English critics" have

lately called Foch "the commander without initiative." He says Foch is at the head of a "coalition army," all the parts of which represent separate interests, while the English and Amer-

icans in particular are in constant "rivalry." Von Ardenne ends his article as follows:

"Finally, when one considers that General Foch tried to give effect to the so-called unity of command by mixing up the separate contingents, that he is now reproached-perhaps not entirely without reason-with having too greatly favored the Italian front, and that fresh regroupings are now in preparation and partly carried out, one must admit that General Foch has not quite corresponded to the ideal which the imagination of the French and the Italians had made of him. In any case, the 67-year-old leader has not got a bed of roses."

Germany's well known historian, Friedrich Meincke, has a long the other day there was the launcharticle in one of the German magazines, telling how Paris is to be ing of a 12,000-ton steel ship within taken, then France overrun, and her stubbornness broken by force; then a "compromise peace" made with the United States and Great her keel. In times within the mem-

All this would be pitiful if it were not disgusting.

The German "intellectuals" have been fed up on the idea of world conquest.

They have read history provincially.

As some writer recently remarked, the trouble with Germany is that her people know no one but Germans. Their self-sufficiency has blinded them to world conditions. They do not understand the aspirations of other peoples.

They think only in German.

And, believing they are supermen, they imagine they are fitted for world domination; when, as a matter of fact, they are not fitted even for self government. They are merely overgrown children in a school that has been taught by military autocrats; and at a time in history when the rest of the world has outgrown such ideals and such forms.

The German ideal for peace is the largest amount of plunder that can be obtained by "compromise," which their leaders call a "peace by understanding" In other words, by bargaining. The mind of the Potsdam gang cannot yet grasp the idea of a peace for the good of the whole world; a peace that will make the world safe for democracy and that will guarantee the world against such wars in the future. But that is the only kind of a peace Germany can have; and she will be obliged to take that kind, which, in the long run, the German people themselves will come to know is the best kind of a peace for them and their children and their children's children. There will be a new Germany, deprising the old Germany in the iron grip of a military autocracy using the lives and fortunes of the enslaved people in their lust for world power.

Russia is coming back.

The German newspapers ask the kaiser to put forth a new declaration of war aims. They are no doubt inspired. Likely a new statement is forthcoming.
