NO CELL HOUSE NOW POSSIBLE Governor Says It's Needed, But Cost of Materials Is Too High

When it comes to cutting down on the approximately \$10,000,000 estimate of state needs for the next biennium one of the items that Governor Withycombe will favor eliminating will be Warden Murphy's estimate of \$100,000 for a new steel cell house at the penitentiary.

"There is no doubt that this building is needed," said the governor, "but because of the tremendous increase in the cost of materials, it isn't going to be possible to make any extensive improvements. Of course the segregation of prisoners which I favor will not be possible unless we have such a building, but just at present the need of segregation is not as pressing as it has been before."

A big percentage of the young offenders and first-timers who should be separated from the hardened criminals have been paroled and they are making good in the industries to which they have been sent.

KELLER SYSTEM BEST IN NATION So Declares Governor in Commenting on Parole Officer's Methods

Captain Joe Keller, state parole officer, is credited by Governor Withycombe with establishing at the state penitentiary the best parole systems in the United States.

By means of the records that have been established by Captain Keller it is possible for the prison authorities to know at all times where the paroled men are and what they are doing, as long as they have not violated their trust.

"Keller's system works out in a remarkably accurate way," said the governor. "By means of the records and charts he knows the whereabouts of every paroled man who is not a violator, and of course knows immediately when a parole is violated. The reports are kept up systematically and the paroled man's record is complete in every way."

FIELD CROPS HAVE FAILED Wheat Average Is Low, Clover Doesn't Produce and Aphis Gets Vetch

Hopes for a satisfactory wheat crop from Marion county have gone glimmering in the past three weeks while the threshers have been at work. Dry weather and aphis did their work effectively this year and the result is a yield varying from 10 to 25 bushels an acre, most of it nearer the lower figure.

Samples of wheat which have been brought into town have a head which is short and not well filled. The stacks which look so good in the field appear less attractive at close range.

Only one more week of threshing remains. About fifteen crews are at work within ten miles of Salem and are rapidly cleaning up the crop.

The prolonged dry spell did harm to other grains, as well as wheat. Spring oats are light and of poor quality. The clover crop is a complete failure and the aphis completely cleaned out the vetch in both Marion and Polk counties.

Little information is to be had on the barley and rye, of which only a small quantity was sown.

Black Rock Postoffice Closed by Government DALLAS, Ore., Aug. 17.—(Special to The Statesman)—The postoffice at Black Rock has been discontinued the order going into effect August 9.

THINGS CHANGE The old order changeth. In times past people depended on drugs to solve their health problems. Now comes the growing family of drugless healers with method of work that produces health in the sick and prevents sickness in the well without using any drugs whatever. Among these are the Chiropractors. They have established the merit of their work in favor of the public to the extent that one or more of them can be found in nearly every community. They have a place there, for people now, as in the past, know that the health, happiness and welfare of every individual is the item of first consideration in life. Chiropractors do much to supply these essentials. The Chiropractors say so and the people say so. So long as that combination of opinion prevails, we'll continue to be an active and ever growing factor in our public life. Dr. O. L. SCOTT, CHIROPRACTIC-SPINOLOGIST Rooms 404-7-8, U. S. National Bank Building. Office Phone 87. Residence Phone 828R
