

MANY DREAMS TO BE EVAPORATED

Plan to Destroy Fourteen Million Dollars' Worth of Opium Shortly

WASHINGTON, Nov. 20.—Fourteen million dollars worth of opium purchased by the Chinese government from foreign merchants at Shanghai, is to be destroyed, according to a cablegram received today from Peking by the Chinese legation.

The opium, which is packed in 1200 chests, will be burned at Shanghai under a mandate, soon to be issued by the president of China, the dispatch said. Foreign and Chinese residents of Shanghai will be invited to witness the event.

"Because of the strict prohibition by China against shipping any opium into the interior provinces," said the legation's statement, "the merchants had not been able to dispose of it. In view of the possible menace from this large stock remaining in the hands of unscrupulous foreign dealers to the welfare of the Chinese people, who had heretofore got rid of the opium habit in less than a decade, the Chinese government some time ago bought it with a view to keeping control over it and using it gradually for medicinal purposes, but public opinion in China unanimously demanded its destruction so as to do away with the evil once for all."

Of course Belgium will be restored. Does that mean another crop of the celebrated hares?—Ex.

Camp Lewis Men Still Hoping to Get Abroad

CAMP LEWIS, Tacoma, Wash., Nov. 20.—Orders received here today for the immediate formation here of Base Hospital No. 162 caused wide speculation among officers concerning the probability of foreign service. It is known that some specialists, particularly engineers and medical units, will be sent to Europe and officers here believe some more men may be sent to Siberia. Major M. C. Harding will command the new hospital unit.

Enlisted men here were advised officially not to cancel their government insurance as they have the opportunity to maintain insurance with the government at the very lowest rates even after their return to civil life. Since the signing of the armistice with Germany many soldiers have requested they be allowed to discontinue insurance premiums. The official bulletin on the subject said that during the recent influenza epidemic the army lost more soldiers than had been killed in the war.

Alien Enemy Custodian Still to Stay on Job

WASHINGTON, Nov. 20.—A. Mitchell Palmer, alien property custodian, in a statement tonight said the signing of the armistice does not change his functions or affect his policies in any way.

"The United States and Germany," said Mr. Palmer, "are still at war, and the trading with the enemy act is still in force. The alien property custodian will, therefore, continue to perform the duties which that act lays upon him, and will carry out the evident intent of the congress with relation to enemy property until final peace shall come."

"As long as the trading with the enemy act is in force it remains the duty of all persons having the custody or control of enemy property in this country to make report thereof to the alien property custodian. Speaking generally, only two classes of property have been or will be sold. These are:

"First—The enemy interests in partnerships, branches or agencies to which licenses to do business have been refused, or to which licenses have been granted for the purpose of liquidation. In these cases, in order to liquidate we have been compelled to sell property of various kinds.

"Second—The enemy-owned shares of stock or other interest in American corporations, where the enemy holding is large enough to influence or control the management of American industrial and commercial interests. It is perfectly clear that in granting the power of sale congress intended that the enemy interests in such corporation should be placed in American hands for fair value, after public sale thereof. At the time the armistice was signed, a large number of such properties were ready to be sold by the alien property custodian, and these sales will be proceeded with."

"Investments of individual German subjects, either in stocks, bonds, mortgages, real estate or other property in America, will not be sold except when they fall within the two classes herein mentioned."

Reconstruction Policy Is Adopted by Italy

WASHINGTON, Nov. 20.—Italy has embarked on a definite reconstruction program and nearly three and a half billion lire has been appropriated to carry it out, said a Rome official dispatch today. Measures have been adopted to permit all war factories to resume peace production immediately.

One billion, eight hundred million lire has been designated for railway reconstruction; one billion for public works; five hundred million for other work of public utility, and one hundred million to cope with the situation created by the large number of unemployed.

The dispatch also quotes Food Commissioner Crisp as saying that because of the addition of nearly five million people to Italy's population by reason of the evacuation, further restrictions on food rations will be necessary. The large stock of food supplies accumulated will be insufficient, Commissioner Crisp believes.

VERSAILLES PREPARES FOR PEACE CONGRESS

America's representation at the peace conference. Arrangements are being made steadily ahead, however, and an announcement of the peace commission's personnel with the program for the journey may be expected at any time.

Members of the senate who attended the white house conference last night told their colleagues today of the president's determination to go to France indefinitely, or until all the greater issues arising out of the war have been settled. How far this may be no one ventures to guess so the president will take with him a full executive staff, prepared to transact aboard ship or at the American embassy in Paris virtually all business of the white house.

In addition to Secretary Lansing who is to head the American delegation to the peace conference, are Colonel House, Elihu Root and Justice Brandeis, generally believed to have been selected by the president for membership, speculation upon a long list of names has centered upon only one for the fifth place, that Secretary Houston of the department of agriculture. He is being suggested persistently in official quarters.

Navy officials let it be known today that it is planned to take the president and the delegation across the Atlantic on a big passenger liner in use by the government as a transport. A dreadnaught and a fleet of destroyers probably will be coverted.
