CONSERVE YOUR HEALTH

Conservation seems to be one of the most important words in the American language today. Every citizen is requested to, as a matter of patriotism, conserve his food, light, fuel, etc. It seems to us that the most important feature has been overlooked. Conserve your health. This should be the attitude taken by every loyal American citizen at this time. Life was never worth more than it is today, healthy men and women are needed as never before have they been needed. Health is the greatest boon of humanity and every one is entitled to it. Don't be foolish and wait until your body is racked with pain before you consult a Chiropractor. Take time by the forelock and right now, when you are apparently in the best of health, rugged and strong, call upon your Chiropractor, ask him to make an examination and ascertain if you have a good healthy spine. It will cost you nothing and will be the means of giving you much satisfaction. If there is any nerve pressure, however slight, have the trouble adjusted before you get really ill. It will save you money, it will save you hours of pain, it will save your loved ones much worry and it will enable you to shoulder your responsibilities as a strong, healthy citizen should. Accordingly, we say to you emphatically, "Conserve Your Health."
