WHEN A FAMILY NEEDS A FRIEND

In the Absence of Doctors Nobly Gone to War, After Influenza, the Grip.
Those wonderfully useful medicines, Hood's Sarsaparilla, Pepton and Hood's Pills—Comprising the new combination family treatment—are warmly recommended.
If taken regularly Hood's Sarsaparilla before meals, Pepton after meals, and Hood's Pills at night as needed, they are reasonably sure to keep a family in health and prove to be reliable and always ready friends. They purify the blood, build up strength and regulate the system.
Get all, or any one, as you think you need, from your druggist today.

ADVICE TO "FLU" CONVALESCENTS

SPAIN AND ENGLAND REPORT INCREASE IN TUBERCULOSIS AFTER INFLUENZA EPIDEMIC.

U. S. Public Health Service Warns Public Against Tuberculosis. One Million Cases Tuberculosis in United States—Each a Source of Danger.

Influenza Convalescents Should Have Lungs Examined—Colds Which Hang On Often Beginning of Tuberculosis. No Cause for Alarm if Tuberculosis is Recognized Early—Patent Medicines Not to Be Trusted.

- * Beware tuberculosis after influenza. No need to worry if you take precautions in time.
- * Don't diagnose your own condition. Have your doctor examine your lungs several times at monthly intervals. Build up your strength with right living, good food and plenty of fresh air.
- * Don't waste money on patent medicines advertised to cure tuberculosis.
- * Become a fresh-air crank and enjoy life.

Washington, D. C. (Special).—According to a report made to the United States Public Health Service, the epidemic of influenza in Spain has already caused an increase in the prevalence and deaths from pulmonary tuberculosis. A similar association between influenza and tuberculosis was recently made by Sir Arthur Newsholme, the chief medical officer of the English public health service, in his analysis of the tuberculosis death rate in England.

In order that the people of the United States may profit by the experience of other countries Surgeon General Rupert Blue of the United States Public Health Service has just issued a warning emphasizing the need of special precautions at the present time. "Experience seems to indicate," says the Surgeon General, "that persons whose resistance has been weakened by an attack of influenza are peculiarly susceptible to tuberculosis. With millions of its people recently affected with influenza this country now offers conditions favoring the spread of tuberculosis."

One Million Consumptives in the United States.

"Then you consider this a serious menace?" "In my opinion it is, though I hasten to add it is distinctly one against which the people can guard. So far as one can estimate there are at present about one million cases of tuberculosis in the United States. There is unfortunately no complete census available to show exactly the number of tuberculous persons in each state despite the fact that most of the states have made the disease reportable. In New York city, where reporting has been in force for many years, over 35,000 cases of tuberculosis are registered with the Department of Health. Those familiar with the situation believe that the addition of unrecognized and unreported cases would make the number nearer 60,000. The very careful health survey conducted during the past two years in Framingham, Mass., revealed 200 cases of tuberculosis in a population of approximately 15,000. If these proportions hold true for the United States as a whole they would indicate that about one in every hundred persons is tuberculous. Each of these constitutes a source of danger to be guarded against."

What to Do.
In his statement to the public Surgeon General Blue points out how those who have had influenza should protect themselves against tuberculosis. "All who have recovered from influenza," says the Surgeon General, "should have their lungs carefully examined by a competent physician. In fact, it is desirable to have several examinations made a month apart. Such examinations cannot be made through the clothing nor can they be carried out in two or three minutes. If the lungs are found to be free from tuberculosis every effort should be made to keep them so. This can be done by right living, good food and plenty of fresh air."

Danger Signs.
The Surgeon General warned especially against certain danger signs, such as "decline" and "colds which hang on."

These, he explained, were often the beginning of tuberculosis. "If you do not get well promptly, if your cold seems to hang on or your health and strength decline, remember that these are often the early signs of tuberculosis. Place yourself at once under the care of a competent physician. Tuberculosis is curable in the early stages. Patent Medicines Dangerous in Tuberculosis.

"Above all do not trust in the misleading statements of unscrupulous patent medicine fakers. There is no specific medicine for the cure of tuberculosis. The money spent on such medicines is thrown away; it should be spent instead for good food and decent living."

GREAT CANNON WILL BE USED FOR SOUVENIR

French Would Place German "Big Bertha" in Place de la Concorde

VALUE SHORT LIVED

Movement on Foot to Have Government Request One of Deadly Weapons

PARIS, Jan. 18.—(Correspondence of The Associated Press)—The French people want one of the German "Big-Berthas" or supercannon which bombarded Paris to display in the Place de la Concorde as a souvenir of German frightfulness that failed of its purpose to destroy French morale.

The armistice does not stipulate that one of these instruments shall be surrendered but there is a movement to urge the government to demand it. There is no expectation that the Germans will include one of these weapons among the 2,500 guns they are required to give up under the armistice.

Facts obtained by military experts show that the first guns that fired upon Paris on March 23, last numbered three. They were installed near Mont-Jolie, in the forest of Saint Gobain. Two were on the same railroad spur leading out of Laon while the third was a little further east in the vicinity of Crepy.

BREAKS A COLD IN JUST A FEW HOURS

"Pape's Cold Compound" ends gripe misery—Don't stay stuffed-up!

You can end gripe and break up a severe cold either in head, chest, body or limbs, by taking a dose of "Pape's Cold Compound" every two hours until three doses are taken. It promptly opens clogged-up nostrils and air passages in the head, stops nasty discharge or nose running, relieves sick headache, dullness, feverishness, sore throat, sneezing, soreness and stiffness.

Don't stay stuffed up! Quit blowing and sniffling! Ease your throbbing head—nothing else in the world gives such prompt relief as "Pape's Cold Compound," which costs only a few cents at any drug store. It acts without assistance, tastes nice, and causes no inconvenience. Be sure you get the genuine.

According to the latest information, the guns were pointed at an angle of more than 65 degrees, a charge of three hundred pounds of powder propelling the projectile to a height of one hundred thousand feet (nearly 19 miles) on its murderous mission to Paris. With every shot ten or twelve marine guns of sixteen or seventeen-inch calibre fired simultaneously upon targets unknown in order to conceal the location of supercannon. The shell was of 210 millimetre calibre (about eight inches). It weighed three hundred pounds but the charge of explosive contained therein varied between thirty and forty pounds.

In the manufacture of the shell resided an innovation of the Germans. It is said to have been made of special steel treated with tungsten so as to offer the maximum of resistance for a minimum of weight. The gun's only protection was in camouflage and it proved to be no protection at all as allied aviators soon located them. There is a report that several aviators, American, French, British, lost their lives in locating the first three Berthas in the forest of St. Gobain but upon that point officials are silent.

However on March 27 one of the Berthas was blown up by an aerial torpedo which tore a hole in the ground more than fifty feet in diameter, a photograph of which has been taken. The second was put out of business in the last days of April, while the third of the original three was silenced in May.

It is now asserted that two of these guns were remodeled into a larger calibre, nine-inch, and that these remodeled guns were the ones which resumed the shelling of Paris late in May last.

Subsequently the Germans succeeded in utilizing larger calibre guns for long distance firing, for in August, they used a marine gun from near Soissons, firing a 12 1/2 inch shell. They were preparing to subject Paris to an intensive bombardment such as Dunkirk had to suffer when they were driven out of their Soissons-Chateau Thierry line by the counter-offensive of the Allies.

Commandant Mirbel, the military expert, who organized the Turkish artillery before the Germans assumed charge of the military affairs of that country, told The Associated Press that the whole secret of the German long distance gun lay in the invention of a special high explosive powder which could only be used in guns constructed with a special steel of extraordinary resisting power. The Germans had commenced the generalization of the process and they were manufacturing several guns similar to their Soissons one but Marshal Foch's offensive deranged their plans.

"You must take what you can get these days," said the philosophic citizen.
"Yes," replied the weary one, "but some of these telephone numbers I get aren't of the slightest use to me."—Washington Star.

SCARLET RIDERS TO RE-ORGANIZE

Famous Canadian Mounted Police to Be Put on Pre-War Basis

REGINA, Sask., Jan. 18.—Canada's Scarlet Riders, the Royal Northwest Mounted Police, who left the dominion to further distinguish themselves on the battlefields of France, are to be reorganized on a pre-war basis, according to an announcement by government officials.

Squadrons of the famous riders who for years have patrolled the prairies, mountains, forests and Arctic wastes of Canada, will be returned from overseas and permitted to rejoin their old force, which will be recruited to a strength of 1,200 men. Regina will continue to be general headquarters and the territory policed will extend from Port Arthur to British Columbia and far into the vast stretches of the No Man's land of the north. District headquarters will be re-established at Winnipeg, Regina, Prince Albert, Lethbridge, Edmonton, Vancouver and Dawson. Outposts will be established at Macleod, Battleford, Maple Creek and Peace River.

As the war progressed, members of the famous band who had faced death innumerable times by daring dashes into the wilderness after criminals, one by one dropped out to join the overseas forces until the organization had all but disbanded. Official reports have shown that they continued their intrepid exploits in the war zone.

Government officials have said that the history of the Scarlet Riders is also the history of law and order in the Canadian northwest. The proud claim is made that the horsemen have never failed to account for a criminal after once taking the trail. It has not always been possible to bring back the man alive, however, and in each of these cases a formal notation is made telling where the body is buried.

The records at headquarters, which team with thrilling adventures show that on more than one occasion a single officer rode into the northern wilderness, used dog teams to penetrate still farther, and then "mashed" (walked) to his destination to arrest an Indian or Eskimo who had killed a white man or tribesman. Now and then a fugitive shot first and with true aim.

But official records show that no criminal who murdered an officer ever escaped vengeance of that officer's comrades.

Peanut Shortage Felt Among Texas Producers

DALLAS, Tex., Jan. 18.—A shortage of peanuts has resulted from unfavorable weather conditions in Texas last summer, according to big

dealers here. B. W. Higginbotham, one of the leading buyers, said the Texas crop this year would be only 25 percent of normal.

The severe drought last summer prevented farmers from raising more than a small share of their usual crop. The drought was followed by excessive rains that caused damage before the peanuts had reached maturity.

The government estimate showed that 15,000,000 bushels of peanuts were raised in Texas in 1917. One section which in 1917 produced 2000 carloads, this year produced only 300 carloads.

Conditions in east and south Texas were better than in northwest Texas which heretofore has been the principal district of production.

"I SUFFERED SEVEN YEARS"

Was Eventually Cured by Lydia E. Pinkham's Vegetable Compound.

Philadelphia, Pa.—"I suffered for seven long years with a lame back, irregularities and pain. I had one physician after another but they did me no good. I read about Lydia E. Pinkham's Vegetable Compound and gave it a trial and in a short time I felt benefited and am now feeling fine, and without weakness or pain. Many of my friends have also taken Lydia E. Pinkham's Vegetable Compound and been helped by it."—Mrs. MARGARET NESS, 1546 E. Hazard St., Philadelphia, Pa.

Women who suffer from displacement, irregularities, inflammation, ulceration, backache, sideache, headaches or "the blues" should not rest until they have given this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, a trial. If complications exist, write Lydia E. Pinkham Medicine Co., Lynn, Mass., for special suggestions. The result of its long experience is at your service.
