

Maxwell—

A Car of Assured Reliability

THE reliability of every Maxwell is assured by the volume produced. One model quantity production involves the investment of millions of dollars in special machinery, plants, laboratories, etc., before a single car is produced.

Therefore, the basic design must be right—right beyond any question—before this special equipment is installed.

And after production starts absolute accuracy in every part must be assured to prevent delays, wastage, hand-labor—things we can't afford.

No tools are too expensive—no precautions too elaborate—to assure this result.

This was our original plan and it has been consistently followed in producing the 300,000 Maxwells now on the roads of the world.

It is the reason why of Maxwell reliability—economy—uniformity.

A car made right to begin with saves you many a dollar even after you buy it.

Troy will lead a large chorus choir and sing solos at each service. The special meetings conducted by Barner and Troy will continue over next Sunday, every evening except Saturday. Everyone is invited.

Recreation Huts Will Replace Corner Saloon

CHICAGO, April 4.—"Recreation huts" to replace the saloon as a gathering place will be established soon by the Salvation army in the large cities of the western states, according to an announcement by Thomas Estill, commander of the organization in the western district.

Before July 1, when prohibition becomes effective, a dozen or more of the "huts," patterned after those operated in the war zone, will be opened in Chicago and if they prove successful the string will be extended to St. Louis, Milwaukee, St. Paul, Omaha, Kansas City, Denver and other western cities, Commander Estill said.

The places will be equipped with libraries, musical instruments, various kinds of games, gymnasiums and shower baths. Trained attendants will be in charge. The "huts" will be open to women as well as men.

Ice cream, soda water, doughnuts, and coffee will be sold at cost.

Social welfare organizations throughout the country will watch with interest the Salvation army's experiment in seeking a substitute for a saloon, Commander Estill said.

MIKE'S USE FOR A MILLION
Two Irish soldiers were "digging themselves in."

One, a six-foot giant, found himself handicapped by the shortness of his untracing tools, and he continuously paused and straightened himself to ease his aching back. During these pauses his comrade became conversational.

"Mike," he asked once, "what was ye doin' w' a million pounds?"

"Add four inches to the handle of this shovel!" replied Mike—Unidentified.

Freedom of The Seas—ons
