Big Values in Blue Serge!

A neat, dressy, blue serge suit, made by our correct, particular tailors will make you look really "dressed up."
We now have a line of all wool blue serges that is unsurpassed in Salem. We can save you from \$10 to \$25 on each suit in value.
As to our accuracy in making suits to fit, nothing need be said. Our long experience in business in Salem and the many men who are now wearing our perfect fit suits, only stand to show what we can do.

ON THIS GLORIOUS EASTER DAY

Our gladness and rejoicing because "He is risen" is vastly increased because of a "World saved for Democracy." "His victory over death" and "Our Victory over Despotism and Militarism." What a wonderful day and time, how appropriate to be happy and joyous.

Let our Songs of Praise and Gladness be heard abroad.

And more, let our gladness reach so deep that we are willing to do our bit to "Finish the Job."

Gladly contributed by

Better Drainage, Larger Crops

The Oregon State Drainage Association was organized in February, 1915, and the present officers are: President, Samuel R. Brown, of Gervais, Marion county; secretary, W. L. Powers, Corvallis, Benton county; chairman of program committee, T. A. Teeter, Corvallis.

A communication from the secretary is as follows:

"The state legislature took favorable action on practically all measures endorsed by the Oregon Drainage Association. Laws enacted that facilitate the organization and operation of drainage districts include: provision for appropriation of water by drainage districts for supplemental irrigation, certification of drainage district bonds by the state reclamation commission, reduction of fees charged for certification of drainage and irrigation bonds by the secretary of state; redemption of drainage bonds at any time at 103, exempting property of irrigation or drainage districts from taxation and providing for drainage and irrigation investigations.

"A development measure referred to the people, to be voted on June 3 next, provides for state guarantee of interest on bonds of thoroughly feasible drainage or irrigation projects for a period of five years. The bill requires that the project must be carefully investigated at the expense of said district and found feasible in several particulars and that it must be found 'for the best interest of the district, and the state of Oregon' to receive certification. The measure gives preferential entry right to persons who have been engaged in military service. This measure if adopted should cause drainage bonds to sell several points higher and with less selling expense. Able speakers have offered their services in explaining this measure if a fund can be provided by drainage and irrigation districts to meet incidental expenses. Let us hear from drainage districts and organizations promptly as to what they desire to do in this matter.

"Two annual meetings and a field day have been held since publication of the biennial report. It is planned to publish a second biennial report of the association, including discussions, resolutions and lists of delegates. A brief statement of the status of each drainage district and irrigation district and the names of their officers should be included in this report and perhaps other reclamation data of timely character. A small number of copies of the first biennial report are still on hand and are now obtained upon request. This is a 120-page report, illustrated, and a 2000 edition."

An Inside Bath Makes You Look and Feel Fresh

Says a glass of hot water with phosphate before breakfast keeps illness away.

This excellent, common-sense health measure being adopted by millions.

Physicians the world over recommend the inside bath, claiming this is of vastly more importance than outside cleanliness, because the skin pores do not absorb impurities into the blood, causing ill health, while the pores in the ten yards of bowels do.

Men and women are urged to drink each morning, before breakfast a glass of hot water with a teaspoonful of limestone phosphate in it, as a harmless means of helping to wash from the stomach, liver and kidneys and bowels the previous day's indigestible material, poisons, sour bile and toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach.

Those who wake up with bad breath, coated tongue, nasty taste or have a dull, aching head, sallow complexion, acid stomach; others who are subject to bilious attacks or constipation, should obtain a quarter pound of limestone phosphate at the drug store. This will cost very little but is sufficient to demonstrate the value of inside bathing.

PREVENTION OF OAT SMUT.

Oat smut may be completely eradicated by a simple and inexpensive treatment. Enough seed oats for a 50-acre field may be treated at the expense of two men's time for about three hours and about \$2 for formaldehyde solution. The materials necessary are a shovel, several grain sacks, one or two barrels of water, a sprinkler can, and one pound of commercial formaldehyde solution (37 to 40 per cent) for every 40 bushels of grain. The grain should be put through a fanning mill if it is not reasonably clean. Formaldehyde solution may be bought at any drug store, at about 60 cents per pound. One pound of the solution added to

Hotel SEWARD

Alder at 10th Street

The most homelike hotel in Portland. All Oregon Electric trains stop at the SEWARD.
Rates \$1 and up. With private bath \$1.50 and up.
W. M. Seward, Manager.

30 gallons of water may be used to treat 30 to 50 bushels of seed.

On a clean floor or tarpaulin, shovel the seed from one pile to another, while a helper sprinkles them thoroughly with the solution. Be sure that all the seed are thoroughly wet. This will require from one-half to one gallon of solution per bushel. Cover the pile of seed with grain sacks soaked in the solution. After the seed has stood for three to five hours, spread out in a thin layer to dry. It may be sown as soon as it is dry enough to run through the drill. The drill and everything else with which the seed comes in contact after treatment should be thoroughly washed with the same solution. The treatment will be useless if the seed are allowed to become reinfected by a drill containing smut spores. Formaldehyde is poisonous, but it evaporates quickly, and grain which has been dried thoroughly may be safely fed to stock if not used for seeding.

The seed swells by absorbing the moisture during the treatment, and consequently about 25 per cent more should be seeded per acre.

WOMEN! DRY CLEAN THINGS AT HOME

Try it! For a few cents you can dry clean everything.

Save five to ten dollars quickly by dry cleaning everything in the home with gasoline that would be ruined by soap and water—suits, coats, waists, silks, laces, gloves, shoes, furs, draperies, rugs—everything!

Place a gallon or more of gasoline in a dishpan or washbowl, then put in the things to be dry cleaned, then wash them with Solvite soap. Shortly everything comes out looking like new. Nothing fades, shrinks or wrinkles. Do not attempt to dry clean without Solvite soap. This gasoline soap is the secret of all dry cleaning.

A package of Solvite soap containing directions for home dry cleaning, costs little at any drug store. Dry clean outdoors or away from flame.

"I hear that Upson is a gentleman farmer now."

"Yes, and he's the real thing in that line. Put evening dress on all his scarecrows at dusk."—Boston Transcript.

Boxer Who Sings Between Rounds When He Starts Out to Entertain Wounded Soldiers

WILLIE McLEAN

Commander of U. S. Naval Forces Abroad Again With His Family

VICE-ADMIRAL WILLIAM S. SIMS and FAMILY

BEFORE THE DOCTOR COMES.

It is very easy to understand and learn how to tell the pulse, and not at all difficult to learn to use the clinical thermometer, and a carefully-kept record of the patient's condition from one of his visits to another is of great value to the doctor. An important item is to have everything in readiness for the doctor's visit. Do not wait until you see him coming, then hurry and hustle and bustle about, upsetting the patient's tranquility and your own. Have clean towels, fresh water, and whatever other articles he is in the habit of calling for.

To stop a bad case of hiccough, heat sweet milk to near the boiling point, but do not let it boil, and let the patient drink it as hot as can be borne, but it must be given in small quantities at a time until hiccough subsides.

Mustard is a very active and harmless emetic when stirred into a cupful of hot water—a teaspoonful to a small cupful. It is very useful in cases of poisoning or indigestion when there is severe pain or cramps. Dry boric powder sprinkled thickly over burns and small cuts and wounds is often all that is needed.

In a sudden case of bowel trouble and a douche is needed, a little glycerine and a little boric powder dissolved in the water adds greatly to the beneficial effects of the douche.

Ulcers in the mouth can be cured by covering with the dry boric powder, and to wash an infant's mouth twice daily with a saturated solution of boric acid, will prevent it becoming.

Nothing proves better than a good, dry heat to quiet pain, as it is heat, irritable and keep it sweet and clean, not moisture, that gives quick relief, and a relay of hot plates wrapped in woolen cloth will do wonders in giving relief to a patient.

In cases of nausea and vomiting, give toast water, toasting bread very brown, steeping it in hot water and giving the water in small quantities.

For sick headache, take one teaspoonful of soda. It will make you vomit and your head will get easy; a

small mustard plaster placed on the back of the neck will be found to relieve almost any case of headache.—A. M. H.

MANY TRACTORS TO BE MADE.

In 1918 the production of tractors in the United States was 132,697; and it is expected that during the present year there will be about 314,926 manufactured, this last total be-

ing based on the estimates submitted by the tractor makers in January, February as follows: Number on hand December 31, 1917, 15, number manufactured during 1918, 132,697; number sold in the U. S. during 1918, 96,470; number sold for export during 1918, 36, number on hand December 31, 1918, 15,401.
