FACTS About Flu

Some authorities treat certain febrile symptoms as a distinct type or form of flu. The chief symptoms of this form of flu are continued fever with delirium, dry brown tongue and other symptoms of a typhoid state.

It should be remembered that any combination of the symptoms of the various forms of flu may be found

Also, it should be remembered that there are many complications that must be provided against. This is one of the reasons a physician should be called at once.

The after effects that may develop are numerous, some of the most common being lung troubles, chronic gastro-intestinal catarrh, enlargement of the glands, chronic headache, neuritis, neuralgia, neurasthenia, insomnia, melancholia and ma-
