Farwells and bonvoyage will be said to Mr. and Mrs. Arthur R. Wilson Wednesday when they will leave for their extensive tour of the world. Motoring to Tacoma they will ship their car, and go by rail to Vancouver, British Columbia, from which port they will sail on the Empress of Asia, July 10. They will pass through the Philippine Islands, Japan, India, China, Australia, Africa, South America, and many other countries through which their business with the steamship company takes them, arriving in England some time during May. They plan to make a similar tour each year for four years.

Among the most delightful of the numerous courtesies shown Mr. and Mrs. Arthur R. Wilson before their departure was the dinner for which Dr. and Mrs. C. H. Robertson were hosts Friday night. A bowl of beautiful American Beauty roses centered the table perfect in appointments around which covers were placed for five.

One of the charming events of the week was the dinner party Tuesday night given by Dr. and Mrs. Mark Skiff at their home in the Skiff apartments, celebrating the homecoming of a group of young men

lately returned from France, the birthday anniversary of the hosts. Yellow, poppies and white Shasta daisies in dainty baskets made the rooms most attractive and added to the yellow and white colors that were used in the dinner. Tiny yellow poppie place cards marked places for the following: Mr. and Mrs. Chester Craig, Mr. and Mrs. Clark Grove, Miss Euanine Craig, Miss Marie Marshall, Charles Craig, Gerold Kneevess, Theron Hoover, Mark Skiff, Jr., and the hosts.

Miss Frances Davis arrived this week to spend the summer with Mrs. H. R. Crawford.

## 300,000 Maxwells; they grow better as their numbers multiply

LIKE an artist who paints a picture, or a man in business, the Maxwell improves with each day's output.

Gradual, almost invisible to the man at the forge or in the accounting office but certain as the rising of the sun, there's an improvement well nigh daily.

There have been five years of making this Maxwell better and better, and the basic design has never changed once in that time.

At one time the Maxwell was known only as a hill-climber. Again it gained attention through its work in rough country. Then it earned a reputation on economy. But gradually it became better and better spoken of for its enduring, everlasting reliability.

That kind of reliability that doesn't burn your pocketbook with repair bills, that knows no task too difficult, that never complains of old age, that gives you about as much trouble as a pair of shoes, that travels on a very small gas appetite.

300,000 of them are in use throughout the world.

In those sections of the world where few cars make good, there you will find the Maxwell—often the dominating car.

The 300,000th Maxwell is the same basic car as Maxwell No. 1. No changes in design—but many improvements.

There's no doubt it's a better car today. Nearly 300,000 of one model has its obvious effects.
