

Druggists and Doctors Astonished At Wonderful Power of Nicotol To Stop the Use of Tobacco To Detect Harmful Effects of Tobacco Try These Sample Tests

New York—Mr. Tobacco User, any druggist will tell you that a remedy to be successfully sold must, above every thing, possess merit, otherwise failure is inevitable. Nicotol, the famous remedy for the tobacco habit, was a success right from the start, simply because it quickly does the work promised. We publish a few letters from some of the best known druggists in the country to give you an idea of what they think of Nicotol, and you may rest assured that they would not permit the use of their names unless Nicotol was something out of the ordinary. The Peoples Drug Stores have five of the best stores in Washington, D. C. They write: "Since we have handled Nicotol the sale has been greater than that of all the rest of the articles of this nature which we have ever sold. The demand was so great that we were compelled to order it locally pending receipt of a shipment from you direct." Schramm-Johnson, who have six stores in Salt Lake City, say: "We take this opportunity of expressing ourselves relative to Nicotol. We have enjoyed a very large sale of same and it has given entire satisfaction to our customers. Jacob Brothers of Philadelphia, Pa., have this to say: "Our sales of Nicotol have passed our expectations. Our first order was placed late in March and we were forced to re-order before the end of April; the sales have kept up well ever since. There is no doubt that we are receiving many repeat orders from our customers and many expressions of

opinion regarding the merit of this article have been very favorable." Dr. Conner, formerly of Johns Hopkins Hospital, tells how to detect the harmful effects of tobacco. Here is what he says: "Many men who smoke, chew or snuff incessantly and who are seemingly healthy are suffering from progressive organic ailments. Thousands of them would never have been affected had it not been for the use of tobacco to excess, and thousands would soon get well if they would stop. The chief habit forming principle of tobacco is nicotine, a deadly poison which when absorbed by the system, slowly affects the nerves, membranes, tissues and vital organs of the body. The harmful effect of tobacco varies and depends on circumstances. One will be afflicted with general debility, others with catarrh of the throat, indigestion, constipation, extreme nervousness, sleeplessness, loss of memory, lack of will power, mental confusion, etc. Others may suffer from heart disease, bronchial trouble, hardening of the arteries, tuberculosis, blindness or even cancer of the common affliction known as tobacco heart. If you can detect the harmful effects, by making the following simple tests: Read aloud one full page from a book. If in the course of reading your voice becomes muffled, hoarse and indistinct and you must frequently clear your throat, the chances are that your throat is affected by catarrh and it may be the beginning of more serious

trouble. Next, in the morning before taking your usual smoke, walk up three flights of stairs at a regular pace then stop. If you find that you are out of breath, your heart beat is forced, trembling or irregular, you may be a victim of functional or organic heart trouble. If you feel that you must smoke, chew or snuff to quiet your nerves, you are a slave to the tobacco habit and are positively poisoning yourself with the deadly drug, nicotine. In either case you have just two alternatives—keep on with the poisoning process irrespective of the dangers and suffer the consequences; or give up the habit and escape the dangers. You can overcome the craving and stop the habit in a very short time by using the following inexpensive formula. Go to any drug store and ask for Nicotol tablets, take one tablet after each meal, and in a comparatively short time you will have no desire for tobacco—the craving will have left you. With the nicotine poison out of your system, your general health will quickly improve." Note—When asked about Nicotol tablets one of our leading druggists said: "It is truly a wonderful remedy for the tobacco habit; away ahead of anything we have ever seen. We are authorized by the manufacturer to refund the money to every dissatisfied customer, and we do not permit the use of our name unless the remedy possessed unusual merit." Nicotol tablets are guaranteed by an iron-clad money-back guarantee by all up to date druggists.

SCHOOL TESTS SHOW PROGRESS

Many Pupils of County Score Over Eighty Per Cent in Arithmetic Trials

County School Supervisors A. N. Arnold and Mrs. M. L. Fulkerson recently made a survey of the 148 schools in Marion county and report noticeable improvements in nearly all of the districts. At each of the schools and supplementary to other work an examination in the fundamentals of arithmetic was given the pupils of the schools, no warning being given of the coming test. Results of the test show a large percentage of pupils securing marks of 80 per cent and over.

Superintendent W. M. Smith also visited some of the districts and gave the examinations. The following is a list of the pupils of the district who scored 100 in the examinations. Many of the pupils who did not attain the high mark in these tests have signified their determination to make a good grade in the next examinations and a 100 per cent list is expected as a result of the interest and competitive spirit aroused.

Examinations Thorough and Scientific

By the most thorough and scientific examinations we ascertain the exact condition of your eyes, and then, if you need glasses, we fit you with precisely the kind you require.

Three forms of eye trouble are commonly met with, any one of which may have existed from birth. Nature does not always make perfect eyes. We have nearsightedness, farsightedness and astigmatism which is a form of irregular sight. All of these defects require attention. If a child has any of these ocular defects and is expected to do close work of any kind, he must have his eyes carefully examined and wear such glasses as will correct the refraction of his eyes.

As well expect a child born with one leg shorter than the other to walk without limping as to ask one born with imperfect sight to do accurate eye work without suffering the consequences.

Our circle of clients includes people of all ages from children to octogenarians and the beauty of it all is—we please them all.

OBITUARY

Henry M. Gearhart of this city died at his home on Sunday, November 16, 1919 of cerebral hemorrhage after an illness of four days. He was 79 years of age, having been born February 29, 1840, at Burlington, Iowa. The greater part of his

life was spent in Iowa and Kansas, where he was engaged principally in agriculture. He was a Civil War veteran, enlisting in 1862 in Company C, 1st Iowa Cavalry and serving until 1866. He had lived in Salem since 1907. Surviving him he leaves his widow, six children and nine grandchildren. The funeral services were held at Webb & Clough's chapel, Wednesday, November 19, 1919, and were in charge of the G. A. R. Interment was made in City View cemetery.

B & C Motor Company Takes Lease on Permanent Store

The B. & C. Motor company handling the sales agency for Marion, Polk and Yamhill counties for the Lexington, Auburn and Elcar, now located temporarily at 256-58 State street, has leased the building at 178 South Commercial street and will occupy the same early in January, after the necessary changes have been made.

Watch Your Blood When The Iron Runs Low You Are In Danger

The Same As When The Mercury Goes Down You Know There Will be a Frost
How To Make The Test That Tells
Actual blood tests show that a tremendous number of people who are weak and ill lack iron in their blood and that they are ill for no other reason than lack of iron. Iron deficiency paralyzes the body's action, pulls down the whole organism and weakens the entire system. A pale face, a nervous, irritable disposition, a lack of strength and endurance and the inability to cope with the strong vigorous folks in the race of life—these are the sort of warning signals that Nature gives when the blood is getting thin, pale watery and literally starving for want of iron. If you are not sure of your condition, go to your doctor and have him take your blood count and see where you stand or else make the following test yourself. See how long you can walk or how far you can walk without becoming tired; next take two five-grain tablets of Purified Iron three times per day after meals for two weeks. Then test your strength again and see how much you have gained. By enriching the blood and creating new red blood cells Purified Iron strengthens the nerves, rebuilds the weakened tissues and helps to instill renewed energy and vigor into the whole system. Unlike the older inorganic iron products, Purified Iron is easily assimilated, does not irritate the stomach, makes the blood per se, and is entirely satisfactory results to every purchaser as they will refund your money, if it is dispensed by all good druggists. Daniel J. Fry and J. C. Perry

ORDER AFFECTS OREGON LUMBER

Milling in Transit Privilege to Wait Return of Railroads

The request of Fred G. Buchtel, chairman of the public service commission of Oregon, for the establishment of milling in transit privileges on lumber at points along the Southern Pacific lines in Oregon, has been refused by the United States railroad administration, according to a letter received by Mr. Buchtel. The reason given for the refusal is that the railroads are soon to return to private ownership and the government does not desire to put into effect orders which might be changed in the course of a few weeks.

About 100 small lumber mills in western Oregon are affected by the refusal. Milling in transit privileges permit a mill to ship its rough lumber to a planing mill or other finishing plant and then reshipping it to its destination without an advance in rate over the straight shipment.

NEW ELGIN CAR SHINES IN TEST

First Try-Out of T. H. Vogel Is Journey Across America

It is often that a new car owner has an opportunity to find out, right at the start, just what his car will do under prolonged and adverse circumstances. He generally has to have it for a while. On the other hand, the few who may have occasion to test the endurance of their cars while the paint is still new,

seldom find so effective a means of analyzing its merit as did a prominent western motorist, T. H. Vogel, a few days ago.

No sooner had he made his purchase of the new Elgin Six from C. P. Iles, Elgin distributor for Seattle, Washington, than he was behind the wheel and off with a party of guests on a 2,300 mile journey south across the states to old Mexico.

Two remarkable things, one the particular interest to Mr. Iles and the other well, to whole lots of people these days—are revealed in the enthusiastic letter which he wrote upon reaching his destination: "We averaged a little over 22 1/2 miles to the gallon of gasoline and 400 miles to the quart of oil. In Oregon we encountered quite a number of severe detours, and hills that were long and steep—some pitches all of 30 per cent—but in spite of these mighty rough roads and extremely heavy load we were carrying we averaged 140 miles a day, and when it came to those three and four mile grades we stayed with the best of them. Haven't had a wrench on the car or made an adjustment of any kind."

As the enclosed picture will show, we were over the southern line in old Mexico today; and we thought
