

# What will you do when you find that you need glasses?

THE first thing to do is to find an optometrist who is thoroughly competent and who understands the eyes and is able to ascertain their defects. The next important thing is that the Optometrist is completely equipped with accurate instruments with which the delicate examinations and findings can be made. And last you must find an optometrist on whose word you can rely, who will live up to every guarantee and promise.

It is the purpose of this advertisement to tell you that when the time comes for you to have your eyes examined, that our optical department is thoroughly equipped to the smallest detail, that all examinations are conducted by as competent a man as can be found in the profession and that we as an established firm with a reputation of years of fair dealing guarantee all optical work to fulfill every promise made and our glasses to give relief and satisfaction.

Consult our optometrist.
