(Continued from page 3) which all of us are anxious to see worked one in the breasts of the

During my administration a detrils will open, the air passages of cidedly serious effort has been made your head will clear and you can to use the power of executive clemency conservatively. In all cases hawking, mucous discharge, dryness where conditional pardons have been or hendache; no struggling for breath applied for no consideration has Get a small bottle of Ely's Cream tirst receiving affirmative recom-Balm from your druggist and apply a mendations from the presiding judge little of this fragrant antiseptic cream and district attorney who acted This rule may have every air passage of the head, sooth- been deviated from in one or two ing and healing the swoolen or in- instances where the prisoner was in flamed mucous membrane, giving you a serious physical condition which demanded prompt outside attention. tarrh yield like magic. Don't stay but in those cases proper precau-

The parole board has used as cononservative a policy as very broad and liberal law of 1919 has allowed. That law, with its good time creditand the very low minimum established, has practically forced the parole board on occasions to make recommendations even against its judgment. This situation should be changed and because of its serious phases I carnestly urge your serious onsideration of these recommendafions that greater protection and safeguards may be thrown about the lives, persons and property of the citizens of our state.

Ratification of Suffrage Amendment-It will be my pleasure to have forwarded to your honorable ody for ratification the resolution of the congress of the United States of America providing for an amendment to our tederal constitution which will extend to the women of our nation the right of suffrage. This is a matter which I recommend to your early attention and I am certain you will not deem it presumptuous if I express the hope that you give your unanimous approval to the ratification of this amendment.

Fish and Game Legislation-Be ause of the relative value of Orecon's fish and game life in all that he state is endeavoring to accomplish in the attracting of tourists: in the move to make life better for our own citizens, and in light of the fact that it involves one of our greatest and most productive industries. I feel that it devolves upon one close to the hearts of many me to present at this special session of the legislature some pertinent recommendations in regard to the fish and game situation.

It is too well known a fact to need corroborative evidence from me that dissension and factionalism over the administration of this important branch of state government has resulted in robbing it of its highest degree of efficiency and materially impairing development and conservation work. I assume that all who expressed conflicting opinions as to the situation have done so with honesty of purpose and the best of intent. Regardless of this, dissension has been evident, the people of the state bhave developed distrust, and a condition has grown up which demands a speedy and effective

In prefacing ray proposals as to what I deem the most expedient and essential changer I wish to sa/ frankly that my familiarity with the situation and with the temper of the people in all parts of the state convinces me beyond the shawod of a doubt that unless some material and beneficial changes are male the life of one of our greatest industries -the salmon industry-may be placed in jeopardy. In addition the conservation of our wild game birds and fish may also suffer and their propagation may decline.

I have no intention or desire to enter into the merits of the various controversies which have shaken the fish and game administration. Regardless of what the merits of these entroversies may be, the fact remains that bickerings and wranglings have developed a hopeless situation which must be met by a new deal if we are to attain what we all desire-highest efficiency and the hest results. Doubt and distrust have existed. We must recognize this fact and that as long as such continue we will have a condition not conducive to the best welfare of the interests involved, or of the state

To meet the situation openly and frankly, to forget old trials and tribulations may be difficult to do, but I deem it our duty in the premises to do so. For that reson I have formulated certain suggestions which f trust you will weigh carefully and consider advisedly. If my suggestions may be improved upon. If a better plan can be devised to bring about the same results. I will welcome that solution with the same rort of an open mind which I am asking all interested to have when
