COME, LOOK FOR YOURSELF

CIVILIZATION TAXES SIGHT

And Clouds Consequently Gather as Ones Age Advances

Practically every modern occupation strains the eyes. People work at close range—at desk or bench—at very close work which demands intense concentration of vision for long periods. The result is almost invariably eye strain.

Everyone pays the penalty whose vision is not what it ought to be—by the lessened earning capacity which bad eyesight always brings.

The injury that eyestrain wreaks upon the health also weakens the power to earn, which again means financial loss.

The prodigal waste of good vision in youth has to be accounted for, and nature strikes a balance by imposing the penalty of enfeebled eyes. How often might the depression and the greyness of age be lessened were only eyesight cared for and preserved. Life would not then lose its brightness—nor our pleasures the power to charm and cheer.

Scientific attention can do much today to improve sight which is failing; but it can do infinitely more—a splendid work indeed—in preventing the development of eye troubles.

If your eyes need attention see Dr. L. Hall Wilson, Eyesight Specialist, 210-211 U. S. National bank building.

REID ADDRESSES BUSINESS MEN

Irish Preacher Thinks Oregonians Can Make Fortunes From Flax

Dr. S. J. Reid, Irish preacher, addressed the Salem business men Monday noon at the Commercial club, using the subject of "Commercial Possibilities of Ireland."

Dr. Reid's keen sense of Irish humor was highly evident all through the address. Even when speaking of the present political problem facing his country he likened it to "just an Irish playful prank." He said that he realizes that probably no greater blessing has been bestowed upon Ireland since the days of the great famine. However, he declared the Irish being aggressive and thrifty, will form a solution, after which greater things are in store for them.

From an industrial point of view Dr. Reid says that Ireland is prosperous and happy. One reason to which he attributes this is the great cooperative commercial scheme, eliminating the middle man and undermining competition. Owing to the fertility of the soil and thrift of the Irish, he claims that "Ireland is the supply house of Great Britain." Every day except Sunday shiploads of products of Ireland are sent to Great Britain.

The per-capita bank deposits of Ireland are higher than those of either England, Scotland or Wales. This was laid to the undeniable thrift of the Irish.

Dr. Reid says that an Irishman can't be judged by his appearances. He claims that they do not try like the Americans, to make themselves appear just a little better than they are. Rather, they look a little worse.

"I'll bet if you saw Lloyd George

you'd think he'd be ashamed," said Dr. Reid. "You would find his pants baggy, his coat shabby, and that he needs his hair cut." In Ireland they wear their clothes until they are worn out. That's why they enjoy prosperity and happiness. Their life is not a sham.

Flax is one of the most important industries of Ireland and Dr. Reid is well acquainted with it. He said he could not see why Oregon should not be able to grow enough flax to suffice the demands of the entire United States.

"So long as Oregon is developing its resources it strikes me strange why this is not taken up," he said. "For I am sure that fortunes can be made with it here as they are in Ireland."

John W. Troy, singing evangelist who with Dr. Reid, is conducting evangelical services at the Baptist church, says for the business men the meeting was attended by a large crowd than ever before, many being turned away.

Any Compromise Favored by Willamette Students

Willamette university students are in favor of any kind of a compromise that will insure adoption of the treaty of peace and establishment of the league of nations. This is evident from a vote taken by Willamette students at the chapel here Monday on the peace treaty proposal.

The four proposed solutions of the problem and the vote cast for each were as follows:

Clause 1.—That the league of nations as first presented by President Wilson be accepted with no amendments or reservations, 57 votes.

Clause 2.—That there be a league at all, 15 votes.

Clause 3.—That the league be accepted with the Lodge reservations, 70 votes.

Clause 4.—That any kind of a compromise that will insure passage of the league be accepted, 72 votes.
