

3 ACCIDENT BILLS PASS

Commission Expects to Begin Operation Under New Laws Today

Legislation filling out the program of the state industrial accident commission, which was given by Governor Olcott as the primary reason for calling a special session, was passed by the senate in the form of three bills, listed on the calendar as House Bills 1, 2 and 3. The bills go at once to the governor for his signature and the commission expects to begin operating under the new com-

pensation today. The bills carry emergency clauses.

These are three companion bills relating to the workmen's compensation law.

Big Increase Provided
One of the bills provide for a flat increase of 30 per cent on all compensation benefits to be paid by the industrial accident commission from December 1, 1919, to June 30, 1921. This increase will apply to the injured worker who is being paid for temporary time loss, as well as those

WHO SHOULD WEAR GLASSES

This is a Problem That Confronts Us All

Whether you are young or old, rich or poor, the question of "who should wear glasses" is one that touches you very closely.

They who "refuse to be bored" by learning anything about their eyes, simply because their vision seems to be good, are taking the most serious risk with their most precious faculty. No one can afford to lose good vision—but it often is lost solely by reason of that neglect which arises from lack of appreciation of the importance of care of the eyes.

Those who cannot see clearly need no warning to take care of their eyes. But the human eye is a long suffering servant, which never tries to avoid work which it can accomplish, even by extreme difficulty, and hence it is very apt to create a false impression of greater power than it really possesses.

These people have had vision without realizing it, they can see clearly, but do not understand what a terrible strain the eyes are having to achieve this desirable result. This condition is called Eye-strain, and it results in severe headaches and nerve troubles.

You may get your sight in a similar fashion! You cannot prove whether you do or not unless you have your eyes scientifically tested. The only evidence you have of eye defects may be in the form of headache.

We can tell you scientifically whether your eyes need help or not. We can ascertain whether your vision is good or bad in the sense of how it is obtained, whether at cost of undue effort or not.

The method of Sight-Testing employed by us is a thoroughly scientific process by which the exact condition of the eyes can be established, and corrective glasses, if necessary, can be furnished. Your optical defects of vision can, in this way, be perfectly corrected.

If your eyes need attention see Dr. L. Hall Wilson, Eyesight Specialist, 210-211 U. S. National Bank building.

who are being paid for permanent and permanent partial disability. It also will apply to the widows and children who are drawing compensation benefits during this period. The bill does not affect the rates for contribution to the industrial accident fund by the employers or employees of the state, as the present rates are considered ample to take care of the emergency payments.

Fund to Aid Cripples
The second fund creates a rehabilitation fund to be used by the industrial accident commission for the vocational rehabilitation of men and women who are seriously injured in industrial accidents.

The bill directs the state treasurer to transfer \$100,000 from the industrial accident fund to the rehabilitation fund and provide further that 2½ per cent of the total monthly receipts of the commission shall go into this fund.

This fund will be used by the commission to retrain or re-educate men and women who have been so seriously crippled that they are unable to follow their usual vocations. The purpose is to assist these cripples in preparing to become self-supporting in spite of their handicap. Provision is made in the bill that injured workers may be admitted to the vocational departments of the public schools or the state school for the blind and the state school for the deaf upon application of the commission. The commission will pay their tuition.

The third bill merely returns to the industrial accident fund the \$40,000 which was set aside by the act of the last legislature for the building and equipping of a reconstruction hospital. It was intended to establish this hospital in Portland, but the enabling act, which was submitted to the people at the special election in June, 1919, was defeated.

MONEY CANNOT BUY ANY BETTER

E. D. Grappe, a leading merchant of St. Maurice, La., writes: "For a cathartic I especially recommend Foley's Cathartic Tablets, knowing as I do that money cannot buy any better." They act promptly, without pain or nausea. They clear the bowels, sweeten the stomach and tone up the liver. Not habit forming. J. C. Perry.
