## Cocanut Oil Makes A Splendid Shampoo

If you want to keep your hair in good condition, be careful what you wash it with.

Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle and is very harmful. Mulsified coconut oil shampoo (which is pure and entirely greaseless), is much better than anything else you can use for shampooing, as this can't possibly injure the hair.

Simply moisten the hair with water and rub it in. One or two teaspoonfuls will make an abundance of rich, creamy lather, and cleanses the hair and scalp thoroughly. The lather rinses out easily and removes every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves it fine and silky, bright, fluffy and easy to manage.

You can get Mulsified coconut oil shampoo at most any drug store. It is very cheap, and a few ounces is enough to last everyone in the family for months.

The Grand Army of the Republic will have a social next Saturday afternoon at the home of Mrs. Mary Hesson. The assisting hostesses will be Mrs. Charles L. Davis and Mrs. Mary Pratt.

## MR. DELANO SAYS BUSINESS BOOMS

### Automobile Dealer Makes Immense Amount of Cash Sales Recently

F. G. Delano of the Salem Automobile company is very enthusiastic over the financial condition of Salem and the territory contiguous to it. His enthusiasm is, no doubt, due in a very large measure to the very flattering volume of cash business done by the Salem Automobile company since it opened business here February 15, 1918.

In these 23 months the company has sold 109 cars of automobiles and now has 62 unfilled orders. "In checking over the sales," says

The railroads are indispensable to our whole economic life, and railway securities are at the very heart of most investments, large and small, public and private, by individuals and by institutions.  
WOODROW WILSON

**THE war could not have been won without railroads.** Transport—by rail and sea—is an indispensable arm of national defence.

Carrying capacity, from the wheat fields and the mines and the steel mills to the front lines in France, was the measure of our power in war.

And it is the measure of our power in peace.

Industrial expansion—increasing national prosperity—greater world trade—are vitally dependent on railroad growth.

The limit to the productive power of this country is the limit set by railroad capacity to haul the products of our industry.

The amount of freight carried on American rails doubled from 1897 to 1905—since that year it has doubled again.

It will double still again.

To haul this rapidly growing traffic the country must have more railroads—more cars and engines—more tracks and terminals.

Sound national legislation, broad-visioned public regulation will encourage the expansion of railroads, without which the nation cannot grow.

Those desiring information concerning the railroad situation may obtain literature by writing to The Association of Railway Executives, 61 Broadway, New York

Mr. Delano, "I find that 71 3-4 per cent of them were spot cash. This speaks wonders for the financial condition of the people of this valley. In fact I would feel safe in defining any like territory in the United States to duplicate this record."

Since January 1 of this year the Salem Automobile company has sold cars to the tune of \$21,680, and practically all was spot cash. "Business is increasing all the time," says Mr. Delano, "and we expect this year's business to eclipse our past record."

The boys entered the George residence about 12 o'clock Monday and took some money, jewelry and a good watch. This was recovered ex-

cept for a part of the money which they claimed to have spent.
