How Signs Of Old Age Creep Into Your System When The Iron In Your Blood Runs Low

Old age has already sunk its talons into thousands of men and women who ought still to be enjoying the springtime and summer of life simply because they have allowed worry, overwork, nervous strain, dissipation and occupational poisons to sap the iron from their blood and thereby

destroy its power to change food into living tissue, muscle and brain. You will find plenty of people at 40 who are broken in health and steadily going

downward to physical and mental decay while others at 50 are strong, active, alert and seemingly growing younger every year. One class withers and dies like leaves in autumn while the other by keeping up a strong power of resistance against disease may pass the three score and ten mark with surprising health, strength and vigor. ### Monday, March 1st.

The operation of its lines which since January 1st, 1918, have been under control of the United States Railroad Administration.

YOUR PATRONAGE is asked on the ground of our giving you in return the best service at our command, and in which we all, officers and employes, hope to earn your commendation.

YOUR CONSIDERATION is asked because with the passage of the new Railroad Bill by the Congress determining the public control over the railroads, we only now have in sight the end of a long period of great uncertainty in which it was impossible to determine plans for the future. In the period of readjustment following March 1st, we reply upon your patience.

YOUR CO-OPERATION is asked in letting us have the benefit of your suggestions and counsel in connection with our service.
