Glass is Annoyance—The unusual amount of broken glass on the city streets is the cause of much concern to City Street Commissioner Walter Low. Leaving particles of broken glass on the streets is a violation of city ordinance, and the violators will be dealt harshly unless this practice is stopped, according to the authorities. Street accidents are responsible for many of the violations but this makes no difference. "If glass is scattered over the street by accident it is up to the responsible parties to remove it."

Cure that Tired Feeling. A Turkish Bath will do it.

The MILLINERY GOAL OF THE FRENCH SHOP

We do not expect, neither do we cater to the patronage of those who seek millinery of the cheaper quality or that which is passe as to materials and style.

What we are striving for is the patronage of those who are appreciative of the best that is to be had in style, materials and workmanship at a price that is commensurate with the value received, not that the price of these hats is high for we have made our margin of profit extremely low realizing that this will be more thoroughly appreciated just now than at any other time.

We have secured the exclusive selling privilege for the famous "Knox", "Biltmore" and "Meadowbrook" lines. These hats are too well known to require any comment.

Individuality Shown By Hats From Our Own Work-rooms

There's a touch of individuality—a distinguishing difference—in the new hats that we are now producing in our own workrooms.

We have a few of these productions which we are featuring this week

Expert Fitter Employed

The rapid growth of my patronage has rendered it absolutely impossible for me to give my personal attention to all patrons.

For this reason I have secured the services of Mrs. D. A. Sloan, an expert fitter whose knowledge of the trend of millinery styles will be available to customers.

Mrs. Sloan has had many years' experience in the millinery stores of the larger cities and is highly qualified to render intelligent assistance in the passing upon the becomingness of new models to individual patrons.
