Governor Orders More Stringent Quarantine on Scabby Animals

After being informed by W. H. Lytle, state veterinarian and ex-officio state sheep inspector, that sheep scabies exist among the flocks of practically all states other than Oregon, Governor Olcott yesterday issued a proclamation establishing a more stringent quarantine than has existed heretofore on the importation of sheep into this state. The order is effective today.

The principal change made effective by the order is that after being dipped under inspection of the proper authority, sheep must, before allowed to come into the state, be held for a period of 90 days to ascertain if they are free from disease. The only exception to the rule is that sheep be allowed to come into the state without inspection for the disease if they are able to be slaughtered immediately.

Quarantine is held to be the only positive prevention of spread of the ailment. Inspection must show that the animals are free both from actual ailment and from exposure. If not infected or exposed a certificate is issued allowing them entry. In the case of affected sheep the certificate is issued at the expiration of the 90-day period following dipping if the animals are then free from disease.

Governor Cox is assured the solid Ohio delegation of 48 votes at the San Francisco convention. All candidates for delegates to be chosen at the primary April 27 are pledged to the governor.

Baltimore Men Buy Virginia Land From Canadian Estate

TORONTO, Ont., March 24.—The reported purchase by Baltimore interests of the 100,000 acres of timber and ore land in Virginia for approximately \$25,000,000 from the estate of the late Peter McLaren of Perth, Ont., former member of the Canadian senate, was given as partial explanation on the sudden improvement today in Canadian exchange. The New York banking house of J. P. Morgan and company is said to have carried out the transaction for the McLaren family.

The purchase price of \$25,000,000 at present exchange rates will mean, it is said, a loss of almost \$3,000,000 in Canadian funds to the McLaren estate as compared with the rate a month ago.

It was doubted in financial circles here whether the deal would affect the exchange situation in view of the fact that Canadian funds running into hundreds of millions of dollars are understood to have accumulated in the dominion for United States accounts as a result of Canadian dollar discounts.

Villa Wipes Out Whole Settlement in Wild Rage

EL PASO, Tex., March 24.—An entire Mexican farm settlement near Santa Barbara, Chihuahua, was wiped out Sunday, March 14, when massacred more than 50 men, women and children and burned their homes and crops, according to a report brought to the border today.

The farmers defended their homes and it was not until 25 or 30 of them had been killed and their ammunition exhausted that the survivors, 25 in number, surrendered.

Villa attacked in reprisal for shots fired at some of his men, the report said.

The survivors, there is reason to believe, would have escaped death, had not one young man, crazed with grief over the loss of his wife and family, attacked Villa and attempted to wrest the rebel leader's gun from his hand. Villa subdued the man after a struggle and shot him dead. In his fury Villa then ordered all the men of the community put to death and the houses, grain and other possessions of the community burned, it was said.

Keeps the Straightest, Unrattiest Hair in Curl

You've never seen anything work such wonders for straight, lank, unruly hair as plain liquid salineline. Nothing else will keep the hair in curl for so long a time—nor produce such beautifully lustrous, natural-looking curls and waves. Dump it, windy weather has no terrors for the woman who uses it. And no one need hesitate to use it, for it is so easily applied with a brush and is so perfectly harmless. It leaves no greasy, sticky or streaky trace. The curlsness can be acquired in three hours, though many prefer to apply the liquid at bedtime. When the hair is combed out it is delightfully soft and fluffy.

Anyone who will get a bottle of liquid salineline from the druggist and follow the accompanying directions will have a most agreeable surprise. The liquid is also valued as a splendid dressing for the hair.

THOUGHTS and THINGS

The business of living, when boiled down to its clearest essence and all the froth skimmed off, is just a matter of thinking.

Each of us is continually thinking ideas of our own and swapping them for the ideas of others. If there is a famine of outside ideas we shrivel up ourselves. Children with "nobody to play with" are unhappy and unmanageable.

From thinking with our heads to doing with our hands is but a little step and then our thoughts become things.

It is because men of America are so unfettered in their thinking and doing that this country is such a fine place to live in. It is also because these thoughts are freely radiated and spread broadcast, in the distribution of manufactured things and in the distribution of the facts about them (advertising) that this country is such a fine place to live in.

The originator of an idea is not much better off than before he originated it till he gets some one else to absorb it and enjoy it and benefit by it.

The man or woman surrounded by better thoughts and things but who pays not the slightest attention to them is not much better off than the one with "nobody to play with."

The advertisements in the papers are thoughts—telling you about the ideas that other men and women have thought out for your happiness. Read the ads. They are the voices from hundreds of thousands of looms, shops, foundries, studios, laboratories, where millions of minds are turning pleasant thoughts into worth while things for your comfort.
