## After Whooping Cough—What?

This is No. 4 of a series of advertisements, prepared by a competent physician, explaining how certain diseases which attack the air passages—such as Pneumonia, Influenza, Whooping Cough, Measles or even a long continued Cold—often leave these organs in an inflamed, congested state, thus affording a favorable foothold for invading germs. And how Vick's Vapo-Rub may be of value in this condition.

Whooping cough is the "meanest" disease that childhood is heir to. While rarely fatal in itself, except to children under two years of age, still it hangs on so long—the coughing paroxysms are so violent, preventing proper sleep and digestion—that when the disease does disappear it leaves the child weakened and run down. In addition the violent coughing racks and strains the air passages and after recovery this irritation frequently remains.

During this period of convalescence the child should be most carefully watched until full strength is restored and the air passages regain their normal tone. A prominent authority even goes so far as to say—"There is more criminal neglect in connection with whooping cough than with any other disease."

While the disease is active, Vick's VapoRub usually helps to lessen the violence of the coughing, but it is during convalescence that Vick's is most valuable.

Because Vick's acts locally by stimulation thru the skin to

draw out the inflammation, attract the blood away from the congested spots and relieve the cough. In addition the medicinal ingredients of Vick's are vaporized by the body heat. These vapors are breathed in all night long, thus bringing the medication to bear directly upon the inflamed areas.

Vick's should be rubbed in over the throat and chest until the skin is red—then spread on thickly and covered with hot flannel cloths. Leave the clothing loose around the neck and the bed clothes arranged in the form of a funnel so the vapors arising may be freely inhaled. If the cough is annoying swallow a small bit the size of a pea.

Children's digestions are delicate—easily disturbed by too much "dosing." Vick's, therefore, is particularly recommended, since it is externally applied and so can be used often and freely without the slightest harmful effects.

Samples to new users will be sent free on request to the Vick Chemical Company, 234 Broad Street, Greensboro, N. C.
