Druggists and Doctors Astonished At Wonderful Power of Nicotol To Stop the Use of Tobacco To Detect Harmful Effects of Tobacco Try These Sample Tests

opinion regarding the merit of this article have been very favorable. Dr. Conner, formerly of Johns Hopkins Hospital, tells how to detect the harmful effects of tobacco. Here is what he says: "Many men who smoke, chew or sniff incessantly and who are seemingly healthy are suffering from progressive organic ailments. Thousands of them would never have been affected had it not been for the use of tobacco to excess, and thousands would soon get well if they would stop. The chief habit forming principle of tobacco is nicotine a deadly poison which when absorbed by the system, slowly affects the nerves, membrane, tissues and vital organs of the body. The harmful effect of tobacco varies and depends on circumstances. One will be afflicted with general debility, others with catarrh of the throat, indigestion, constipation, extreme nervousness, sleeplessness, loss of memory, lack of will power, mental confusion, etc. Others may suffer from heart disease, bronchial trouble, hardening of the arteries, tuberculosis, blindness or even cancer or the common affliction known as tobacco heart. If you use tobacco to excess in any form you can easily detect the harmful effects by making the following simple tests: Read about one full page from a book. If in the course of reading your voice becomes muffled, hoarse and indistinct and you must frequently clear your throat, the chances are that your throat is affected by catarrh and it may be the beginning of more serious trouble. Next, in the morning before

taking your usual smoke, walk up three flights of stairs at a regular pace then stop. If you find that you are out of breath, your heart beat is forced, trembling or irregular, you may be a victim of functional or organic heart trouble. If you feel that you must smoke, chew or sniff to quiet your nerves, you are a slave to the tobacco habit and are positively poisoning yourself with the deadly drug, nicotine. In either case you have just two alternatives—Keep on with the self poisoning process, irrespective of the dangers and suffer the consequences; or give up the habit and escape the dangers. You can overcome the craving and stop the habit in a very short time by using the following inexpensive formula. Go to any drug store and ask for Nicotol tablets, take one tablet after each meal, and in a comparatively short time you will have no desire for tobacco—the craving will have left you. With the nicotine poison out of your system, your general health will quickly improve." Note—When asked about Nicotol tablets one of our leading druggists said: "It is truly a wonderful remedy for the tobacco habit; away ahead of anything we have ever sold before. We are authorized by the manufacturer to refund the money to every dissatisfied customer, and we never permit the use of our name unless the remedy possesses unusual merit. Nicotol tablets are sold in this city under an iron-clad money-back guarantee by all up-to-date druggists, including J. J. Fry."
