OUTSTANDING in the week's events, and of paramount importance on the yearly calendar, will be the annual club breakfast, which will be held in the auditorium of the Commercial club Saturday afternoon at 2:30 o'clock. The event is the second scheduled this season, and takes the place of the annual club breakfast, which has been an important affair each year heretofore.

Each member will be entitled to invite two guests Saturday. A general effort will be made to equal the women of the city with the club's efforts and activities.

Absence of Dredge is Inimical to Commerce

The dredge Chinook is now en route to Galveston where it will be in operation for more than three months, and no date for its return to the Columbia river has been fixed, according to a telegram received by Representative W. Representative Hawley says the absence of the dredge from its home base is inimical to the welfare of commerce on the Columbia river, since if any shoaling should occur a very unfavorable situation would be created before the dredge could reach the stream and resume operations.

Brand New Way to Remove Hairy Growths

(Actually Removes Roots and All)

The vexed question of how to completely remove superfluous hair has been solved at last! By means of the new pholacine process, the hairs entire, roots and all, come out before your very eyes—easily, harmlessly, "quick as a wink." It is so different from the depilatory, electrical and shaving methods, you simply must try it to fully appreciate its remarkable advantages.

Pholacine is perfectly odorless, non-irritating, non-poisonous—a child could use it without the least injury. It leaves the skin so soft, smooth and hairless, no one could tell you ever had a mole or other hairy growth. If you will procure a stick of pholacine from your druggist and follow the simple instructions, you will certainly be astonished and delighted with the result.

Mazola—the choice of leading hotels, clubs, and railroad dining cars in America!

WOMEN everywhere are finding out that lard is one of the most unsatisfactory of all cooking fats. It is absorbed into the food, making it heavy, soggy and indigestible at times. So much lard is taken up by the food during cooking that it becomes more expensive to use.

Mazola is 100% pure vegetable oil. It never penetrates into the food, but sears fish or meat over, and preserves all the good flavors. At the same time, it makes the food more digestible.

You too, should use Mazola for all cooking, baking, frying and sautéing purposes.

Thousands of people everywhere use Mazola as a delicious salad dressing, in preference to olive oil or any other vegetable oil. It costs about half what an acceptable grade of olive oil would cost.
