

OREGON BLIND MAY BE AIDED

Need of Field Worker Placed Before Governor by Superintendent

In a letter to Governor Olcott J. W. Howard, superintendent of the Oregon State School for the Blind, declares that a field worker for the blind should be in the employ of the state.

Mr. Howard believes such an agent could confer with managers and foremen of factories and make arrangements for placing blind employees in the establishments. The agent also, Mr. Howard believes, could look up children of normal mentality who are unable to see sufficiently well to attend the public schools and could arrange to have them placed in the state school for the blind. "I am confident," says Mr. Howard, "that our attendance would more than double under this arrangement."

Further Mr. Howard believes the agent could do a good service by visiting the helpless and aged blind to put them in touch with the Braille system of reading and the free libraries for the blind, and also, if possible, aid them in

learning to work at home, such as chair-caning or weaving so they would become partially self-supporting.

Mr. Howard's letter was in reply to a letter of inquiry from the governor relative to industries by means of which the blind may become self-supporting. As for the problem of making them self-supporting, wholly or in part, is a difficult one, but he believes the establishment of a state employment institution for the adult blind will solve the problem in a large measure. The Oregon school, he says, is too small to branch out in industrial education for the adult blind.

California Asks Big Concession in Oregon

Percy A. Copper, state engineer, has received from Roy E. Swigart, president of the Shasta Valley Klamath irrigation project of Montague, Cal., an application covering the storage of 1,600,000 acre feet of water in Upper Klamath lake for the irrigation of lands and power development. The irrigation of 150,000 acres of land is contemplated in California and the organization of an irrigation district which will enter into a contract with the United States reclamation service for the necessary surveys and construction work is part of the scheme.

Other applications received by the state engineer are:

By Neils Nelson of Garibaldi, Ore., covering the appropriation of water from Canyon creek for domestic supply.

By Frank Sullivan of Canyonville, covering the appropriation of water from Canyon creek for irrigation of a small tract in Douglas county.

By L. E. Springer, J. F. Springer and William Falsgrove of Durfur, covering the appropriation of water from Fifteen Mile creek for irrigating 50 acres in Wasco county.

The Brogan irrigation district of Jamieson, Ore., has filed an application in the office of the state engineer, covering the storage of the waters of Willow creek and its tributaries, Pole creek, Blacks creek, Rhodes Canyon creek, Cow Valley creek, Mormon Basin creek, Lost Watch creek and Glasscock creek, for the irrigation of lands near Jamieson, Ore., Malheur county.

An application has been filed by William S. Hoffmen of Dayville, Ore., covering the appropriation of water from John Day river for irrigation of a small tract in Grant county.

Union County Treasurer is Defendant in Mandamus

The Ladd & Tilton bank of Portland has instituted proceedings in mandamus against John Frawley, Union county treasurer, to compel the payment of interest on \$60,000 county highway bonds which has been held up by action of the supreme court in holding invalid the Clackamas county issue, in which the same considerations are involved.

The petition for mandamus was filed in the supreme court yesterday, the alternate writ was issued and October 19 set as the date for hearing.

The Clackamas county issue was held invalid for the reason that it made the county's total bonded indebtedness exceed 2 per cent of the county's assessed valuation in property. While the issue was made after the people had raised the constitutional limit to 4 per cent it was shown that the amendment was not yet effective.

PRICE-ADJUSTMENT

SALE

Starts Saturday, Oct. 9, 9 A. M.

AT this time the general consensus of opinion is that prices must decline. We are in sympathy with price reduction. It is a constructive, sensible solution of present day conditions. Like a great many other merchants thruout the country we have decided to reduce our present selling price; forgetting profits and getting down to Earth. It does not mean that our seasonable goods were purchases at low prices, you know better. Nevertheless, our prices have gone down with a crash and we want you to know it. Every brand we carry bears the stamp of public approval and every item has been reduced.
