

Missing Natives Thought to be Eaten by Cannibals

BRISBANE, Australia, Nov. 17.—It is reported from New Guinea that two white men and 10 native carriers are missing and are be-

lieved to have been killed and eaten by the natives on the Fly river. The missing men were hunting birds of paradise in Dutch New Guinea. A searching party reported that on visiting a native village on the Fly river the vil-

lagers there, some footprints stained with blood, a photograph, some clothes and other evidences of the white men were found. If Greece wants a real, up-to-date ruler Champ Clark will soon be out of a job.

PLUNGES BRING CHAMPIONSHIP

California Squad Takes Big Game When They Score at Will, 38-0

Berkeley, Cal., Nov. 29.—University of California's undefeated football juggernaut plunged its way through the Cardinal hosts of Stanford university to the Pacific Coast conference championship before approximately 30,000 persons today in the "big game," the annual football spectacle of the coast. The score was: California, 38; Stanford, 0. A touchdown and subsequent goal four minutes after the start of the contest, followed six minutes later by a field goal by Toomey; a touchdown and goal in the third period, and three touchdowns and goals comprised the blue and gold scoring. Not once did Stanford threaten the California goal; in fact the cardinal failed to make the first down once during the contest. Only the "Stanford spirit"—invoked when California had the ball in the shadow of the cardinal goal posts—kept the score from assuming larger proportions. Twice Stanford repulsed within her own 10-yard line the California rushes which were irresistible in mid-field. The superiority of the California eleven was discernable almost from the first play when Stanford fumbled the kickoff which was recovered by California. Immediately following, California marched down the field to its first touchdown. But the superiority failed to detract from the interest displayed in the "big game," as the "big game."

California depended in the main on straight football, with several open plays interspersed in the first three periods. In the fourth period, with the game easily won, the blue and gold opened up and several successful long forward passes paved the way for the last touchdown, which were made with many of the California positions filled with substitutes.

National Forest Program to Come Before Congress

WASHINGTON, Nov. 18.—When congress meets in December a bill will be introduced for a national forest program including better fire protection for the forests. "This step, following an agreement by all the industries interested, marks the first united move in this direction in this country," says Charles Lathrop Pack, president of the American Forestry association, which announces the outline of features to be embodied in the proposed legislation. The plan calls for national appropriations of at least \$11,000,000 a year. The provisions of the proposed measure are two-fold—for a considerable extension of direct federal activity in forest ownership and production, and for the development with the states and encouragement of systematic policies in the several forested states to bring about adequate forest production and reproduction. The program provides specifically through co-operation between the government, the states and owners of timberlands, for adequate protection against forest fires, for reforestation of denuded lands, for obtaining essential information in regard to timber and timber lands, for extension of the national forest system and for other steps essential to continuous forest production on lands chiefly suitable for this purpose. The following legislation is proposed: Authorizing the secretary of agriculture, after consulting appropriate local agencies, to prove an adequate policy for each state, covering fire protection, reforestation, cutting and removing of timber crops. Not less than \$1,000,000 annually available for such co-operation with states. A survey of forest resources, forest production and forest requirements of the nation. Provision for study and experiments in forest reproduction methods, wood utilization, timber tests, wood preservation, development of by-products and other steps to bring about the most effective use of the nation's forest resources. Provision for a study of forest taxation, to assist states in devising tax laws which will encourage the conservation and growing of timber. Also methods of in-

suring against forest losses by fire. Provision for more rapid replanting of the vast areas of denuded lands within the national forests. Appropriation of \$10,000,000 a year for five years for the purchase of lands, which should be added to the national forest system, whether or not on the headwaters of navigable streams as such purchases are now limited.

VALUE OF THE DOLLAR.

An unidentified magazine writer makes a good point which he might carry still further to advantage. He wants America to get rid of the dangerous and half-baked idea that a dollar is only worth a half or a third of what it was. His philosophy is to remember that it is only the spent dollar that has lost this part of its purchasing power and that the saved dollar is just as valuable as ever it was. Nothing can be lost in assuming that he is right in this, as long as the assumption continues that the time is coming when the price level will descend approximately to normal. That it ever will return to the plane of ten years ago is open to serious doubt. But what is certain and beyond all doubt is that the saved dollar has the same debt-paying power as of old. It may not buy as much in the store, but when it comes to paying a note or lifting a mortgage it will go as far as in the cheapest period in our history. —St. Paul Pioneer Press.

A Few Eye "Ifs"

If an hour's reading makes your eyes ache. If printed matter occasionally gets "misty." If you are obliged to stop work periodically to rest your eyes for a few moments. If you find it easier to read nearer or further away than the normal twelve or fourteen inches—then something is wrong.

If you cannot recognize people across the street. If you have to make an effort to see clearly—knitting the brows, for example. If strong light gives you pain in the eyes or if you require more light than hitherto—your eyes need attention.

If you have any of these difficulties call and let us find out, definitely, just what the trouble is.

Is Your Child Under Weight?

The table below will show you what your child should weigh to be in proper proportion to his height. If the child is below the "danger point" it is time to act.

Heights and weights are given separately for boys and girls. Averages are given for births, for 3 months, for every month from 6 to 48, and thereafter for every year up to 16. The heights and weights of the children examined are to be compared with these average heights and weights. No heights and weights are given for the separate months after 48 months. With a child over 4 years of age, use the age at his last birthday.
