SALEM IS THE DEHYDRATION CENTER OF THE WORLD

Do you realize what that means? It means that there is a market, and a growing market for every vegetable and fruit that can be raised on the land in this territory. And that means more than is apparent to the stranger at first glance; for a greater variety of fruits and vegetables can be successfully grown here than in any other part of this country or the world. Dehydration is the greatest thing in the world, in food conservation. It takes out the water; the consumer puts it back, at any time in the future, anywhere under the shining sun—and then he has the fruit or the vegetable as good as fresh, in every nutritive quality, and in every other way. The saving will be billions, annually. And all the money comes to Salem excepting what is expended for the nails in the shipping boxes. Better than a gold mine; for it will never "pinch out." **KING'S PRODUCTS COMPANY SALEM OREGON** (This company is committed to the growth of this community, by a program that will make its output ten times its present output—that will employ 2500 people at its factory; that will pay to the growers \$20,000,000 a year for their products.)

The Indiana Silo

Permits you to control your own pasture by having it under cover. Would you buy a well giving bad water because the pump had a silver spout? Of course, not. Isn't it equally absurd to buy a silo because it has certain gee-haws, none of which have anything particular to do with the main job, which is making good sweet silage? If you keep in mind that the only thing on earth that a silo is good for is to make silage, and, if it doesn't do that well, it is worthless, it will be easy to determine the real value of these contraptions.

CHAS. K. SPAULDING LOGGING CO.
SALEM OREGON

THE SALEM DISTRICT CAN GROW AND MATURE GOOD CORN

The Salem district can grow good corn, both for the matured crop and for silage. And this does not necessarily apply to the warm, sandy soils of the river bottom lands only; it is true of the hill lands— As State Senator I. L. Patterson testifies in his communication in this issue, in which he records a yield of 48 bushels to the acre on 18 acres, on Polk county hill lands— And as A. R. Southwick, another Polk county grower asserts, giving 50 to 60 bushels to the acre as the yield that ought to be expected, on good ground. Our district needs more and more corn, for the many uses of the matured crops, and for the further building up of our rapidly growing dairying and live stock industries, with corn silage. There will be a great corn show in Salem in December—watch it. Next week's Salem Slogan subject is Celery.

DID YOU KNOW that Salem is the center of a good corn country; that with proper seed selection—a yield as high as the average crop of Eastern corn can be matured here; that our growers are favored in prices to the extent of the freight costs from the great corn states; that with the increase of the production of corn that is going on here the wasteful system of summer fallowing has been abandoned; that we need more corn growers; and especially that we need the growing of a great deal more corn for silage to aid the growth and add to the profits of dairying and live stock breeding?

CLETRAC Tank-Type-Tractor
As soon as the plowing job is finished, hook the Cletrac to the harrow and seeder, and finish the job. The CLETRAC rides the top of the soil lightly and does not pack the ground.
